Improve Your Lateral Thinking Sterling Publishing Company, Inc.

For the first time in the Pocket Posh series we offer lateral-thinking puzzles, the popular conundrums that train you to think outside the box. Lateral thinking means sideways thinking. There is more than one way of looking at a problem, and through these puzzles, you can train your brain to think differently. Lateral thinking is a set of strategies for thinking in new directions. The 50 puzzles in this Pocket Posh collection will help you think laterally to find

new ways to solve problems, free up rigid thought patterns, and avoid getting stuck. How and why do we see things in a particular way? Why do we miss things? How do we shift perspective? As you work through these puzzles, you'll be training your brain to see things laterally—or sideways.

Cunning Lateral Thinking Puzzles Andrews McMeel Publishing

Lateral thinking puzzles start with a normal situation—then they quickly become weird.

Take Bob. He smashes the taillights of a stranger's car. But the cops arrest the car's owner, not Bob. Why? Bob had been kidnapped and was inside the trunk when he broke the lights. That's just a taste of the strange situations and irresistible challenges you'll encounter here!

The Sunday Times

Teasers Book 1 Sterling Publishing Company, Inc. "A man writes the same number, and nothing else, on 20 sheets of paper. Why?" "A man went

around the world in a ship. Yet he was always in sight of land. How come?" These are examples of lateral thinking puzzles. You're given a statement about a situation that you have to use as a starting point to arrive at a particular explanation or solution. Often there can be many possible scenarios to explain the puzzle, but the challenge is that you have to find the "right" answer. Typically the puzzles contain insufficient information for you to immediately figure out

the solution (clues are provided). When you get stuck, attack the problem from a new direction-- think laterally! Not only are these puzzles fun, they also help to develop skills in questioning, deduction, logic, and, of course, lateral thinking. Answers: It's January and he is writing the date of the year on all the checks in his checkbook to avoid putting last year's date by mistake; He was an astronaut in a space ship. 96 pages, 25 b/w illus., 5 3/8 x 8 1/4.
