SANCHEZ MOONEY

Roman Private Law Thieme Medical Publishers

This atlas of pharmacology first deals with general aspects, such as formulation, absorption, distribution, & molecular mechanisms of action of medicinal agents. It then looks at various groups of medicinal agents with special emphasis on functional & therapeutic aspects. Attention is given less to the chemical properties of the medicinal agents than to their action on body functions & the therapeutic possibilities of their application.

Thieme Atlas of Anatomy OUP USA

This volume introduces Roman property law by means of "cases" consisting of brief excerpts from Roman juristic sources in Latin with English translations. The cases are followed by series of analytical questions and translated excerpts from modern civil codes to illustrate the dynamic character and continuing life of the Roman legal tradition.

International Economics Thieme

The contents of this text book cover markets and prices; producers, consumers and competitive markets; market structure and competitive strategy; and information, market failure and the role of government.

Personality Rights in European Tort Law Walter de Gruyter
 Originally presented as author's thesis (Ph.D.)--Universiteit Maastricht, 2013.

How Children Develop Cambridge University Press

This handbook provides reliable information on private law in an increasingly integrated Europe. It contains a collection of specially commissioned essays, including contributions on: corporation law, trust, law of sales, competition law, products liability, personal injuries law, limitation periods, the harmonization of European private law, and more. The essays are designed not only to offer a comprehensive overview of the different topics, but also to display and provoke lively and controversial debate. The handbook addresses some issues that appear to be both growing in momentum and largely overlooked by contemporary literature, namely a) the need to examine current and possible future developments in European private law institutions and issues affecting the legal lives of private, business, and public actors; b) the opportunity to fill a gap in the comparative literature through a concise reference book, which offers quick and easy access to the most relevant legal issues; and c) the cultural debate as to what European private law is and could be, rather than what it ought to be. It follows that the handbook is not meant to simply describe substantive law, but instead to "compare" private law institutions and cultures.

European Union Property Law Sellier European Law Pub

This volume provides a comprehensive analysis of civil liability for invasion of personality interests in Europe. It is the final product of the collaboration of twenty-seven scholars and includes case studies of fourteen European jurisdictions, as well as an introductory chapter written from a US perspective. The case studies focus in particular on the legal protection of honour and reputation, privacy, self-determination and image. This volume

aims to detect hidden similarities (the 'common core') in the actual legal treatment accorded by different European countries to personal interests which in some of these countries qualify as 'personality rights', and also to detect hidden disparities in the 'law in action' of countries whose 'law in the books' seem to protect one and the same personality interest in the same way.

Microeconomics Macmillan

"The THIEME atlas of anatomy integrates anatomy and clinical concepts and now includes access to WinkingSkull.com PLUS, the must-have online study aid for learning anatomy. Highlights: organized intuitively, with self-contained guides to specific topics on every two-page spread; hundreds of clinical applications integrated into the anatomical descriptions, emphasizing the critical link between anatomical structure and function; beautifully illustrated with expertly rendered digital watercolors, cross-sections, x-rays, and CT and MRI scans; clearly labeled images help you easily identify each structure; summary tables throughout -- ideal for rapid review; with 1,200 original illustrations, this work features comprehensive coverage of neuroanatomy, skillfully guiding the reader through the anatomy of the head, from cranial bones, ligaments, and joints to muscles, cranial nerves, topographical anatomy, and the anatomy of sensory organs; Winking Skull.com PLUS includes more than 450 anatomy illustrations and radiologic images, 'labels-on, labels-off' function, and timed self-tests"--Page 4 of cover

Environmental Liability and Ecological Damage In European Law Carolina Academic Press

This is the third volume of a series of national reports on basic issues concerning the acquisition and loss of ownership of movable assets. The series covers 28 European legal systems. Starting with general property law issues like the concepts of ownership and possession employed in the respective legal systems, and the related means of protection, the reports primarily deal with the 'derivative' transfer of ownership, but extend to good faith acquisition from a non-owner, acquisitive prescription, processing and commingling, and further related issues. The reports provide the reader with detailed information about the respective rules, case law and legal literature, prepared by national property law experts. These reports are a starting point for further comparative research in property law and also a tool for practitioners searching for information on foreign legal systems.

National Reports on the Transfer of Movables in Europe

Cambridge University Press

Providing a comprehensive analysis of environmental liability law in Europe, this book offers a general introduction to the status of environmental liability in Europe. It describes the relevant international treaties and the EC-Environmental Liability Directive and discusses the conflict of laws issues regarding transfrontier environmental damage. It also contains the results of a comparative project covering 14 jurisdictions in 13 European countries (Austria, Belgium, England and Wales, Finland, France, Germany, Greece, Ireland, Italy, Netherlands, Portugal, Scotland, Spain, Sweden) on the private law aspects of environmental liability. It addresses the main problems of the application of tort

law in environmental law, such as the availability of non-fault liability, the establishment of causation, the scope of available remedies and the issue of legal standing. Due to the very limited harmonizing effect of the EC-Environmental Liability Directive national tort law will keep its importance in the field of environmental liability.

Understanding Human Rights

Krugman and Obstfeld provide a unified model of open-economy macroeconomics based upon an asset-market approach to exchange rate determination with a central role for expectations. This ninth edition integrates research, data and policy in hot topics such as outsourcing, geographic geography and financial derivatives.

Pocket Atlas of Pharmacology

This volume contains the major result of the work undertaken by the international research group "Transfer of Movables" which belonged to the Study Group on a European Civil Code. It covers the most important aspects of the law of property in movables, such as the transfer of ownership based on the transferor's right and the good faith acquisition of ownership. The suggested black letter provisions are accompanied by extensive explanatory comments and comparative notes providing information on the existing rules of the EU Member States. As compared to Book VIII of the DCFR, this volume contains additional and partly revised national notes, extended comments, translations of the black letter rules and adapted registers. The "Principles of European Law" are published in co-operation with Oxford University Press and Staempfli (Switzerland).

Acquisition and Loss of Ownership of Goods

The authors emphasize the fundamental principles and enduring themes underlying children's development and focus on key research. This new edition also contains a new chapter on gender, as well as recent work on conceptual development.

European Private Law

This third edition of Understanding Human Rights has been elaborated by the European Training and Research Center for Human Rights and Democracy (ETC) in Graz, originally for the Human Security Network (HSN) at the initiative of the Austrian Ministry for Foreign Affairs. The objective is to assist human rights education efforts worldwide. The book's thematic modules on selected human rights issues cover topics such as: the prohibition of torture, freedom from poverty, human rights of women and children, human rights in armed conflict, freedom of expression, and democracy. New to this updated edition are chapters reflecting current trends in human rights, including new modules on privacy (such as challenges posed by Internet use), minority rights, and the right to asylum. Translations of the earlier editions already exist in 15 languages, among them all the official United Nations languages. Understanding Human Rights has become a basic text for human rights education and training in different countries, on different levels, and for different audiences, from university lectures in China to NGO training in Mali to police training in Kosovo.
