Ontological mathematics is the rational core of Hyperianism. It's the science of the future that proves the shocking truth that the world is not material but a collective dream, that so-called "matter" is an illusion, and the ultimate reality is a domain of pure mind. This is not a belief but a deductive, mathematical certainty. Ontological Mathematics was originally leaked to the public via a controversial hidden society operating under various pseudonyms. Since then, it has taken the world by storm. Ontological mathematics isn't any one person's idea. It's a new way of thinking that is championed by the greatest thinkers of the age. Nearly 100 books have been written about it by various authors and independent ontological mathematics research groups are appearing around the world. Ontological mathematics and Hyperianism is a global phenomenon. We have made the groundbreaking knowledge of our system available to all by introducing the reader to the foundational concepts of ontological mathematics in an accessible way. This text assumes the

reader has only minimal philosophical knowledge, and it is written in such a way that anyone can begin learning the mathematics of our system. Imagine living in a time and place where the Earth is believed to be flat and humans created by a god. Now imagine you discover a book containing many astounding facts of science such as the spheroidal shape of the Earth and evolution. How exciting would that be? As you read the book, your entire perspective of reality would change. Your world would never be the same. This is such a book. You currently exist in a time and place where existence is viewed as material. This book reveals that the world is in fact a shared dream. Ontological mathematics is the study of the mathematical wave nature of existence. This is not a reality of matter, rather, it's a reality mind, of thought. And what is thought? Thoughts are mathematical sinusoidal waves. So ontological mathematics is the study of the mathematical waveforms of mind that make up all of existence and your very being. The spacetime world isn't a material reality at all. It's the Holos, which is a mathematical Fourier projection from a frequency singularity known as the Source. When properly understood and integrated, the information within this text will change your existence forever and elevate you to a new level of consciousness. This is the science of the future that one day soon will be taught in every school throughout the

world. You are a Mind. Existence is Thought. The World is a Dream. The Science of the Future is Here.

In Two Minds is the first comprehensive biography of Jonathan Miller – the story of one of post-war Britain's most intriguing polymaths. Descended from immigrants who fled Tsarist anti-Semitism to become shopkeepers in Ireland and London's East End, Miller was born into an intellectual milieu, between Bloomsbury and Harley Street – the son of a novelist and a leading child psychiatrist. Miller trained as an actor but then forged a career as a stellar comedian and as a world-renowned theatre and opera director. He is a controversial humorist, public intellectual and TV personality. As a star in the groundbreaking satirical revue *Beyond the Fringe*, he shot to fame alongside Peter Cook, Dudley Moore and Alan Bennett. His expertise and interests encompass many areas, from medicine (he wrote and presented the hugely acclaimed BBC documentary series *The Body in Question*) to the history of art, Mozart, atheism and the nature of laughter. Jonathan Miller is one of the most multi-talented Britons of his generation, celebrated for his dazzling intelligence and anti-establishmentarian wit. Drawing on in-depth interviews, this is an entertaining and illuminating portrait of a fascinatingly complex man.

"Philosophy is a battle against the bewitchment of our intelligence by means of language." – Wittgenstein. We use language to think, to talk to each other, to write, to form beliefs, religions, philosophies, and so on. But what if we are using the wrong language? Do we have "wrong thoughts" because we are using the wrong language? Do we have wrong religions and philosophies for exactly the same reason? What's the right language? If we could find the right language, could we then think correctly, without error, without delusion, without fantasy? Would the right language give us the right religion, the right philosophy? Would it explain reality to us? Discordians hate Truth. The struggle between the Discordians (in all their various forms) and the Illuminati is the most important there is. The soul of humanity is at stake. The Truth itself is the prize to be won or lost.

Ancient cultures were faced with two immense problems. Why is there something rather than nothing and why is the universe ordered rather than chaotic? To answer these questions, they invented cosmologies, which were also the basis of their religious beliefs. A person's cosmological and religious beliefs are always interdependent. The ordered universe of the ancients was divided into four: 1) the World (that we inhabit), 2) the Overworld (the sky and heavens that the gods inhabit), 3) the Underworld (that the dead inhabit), and 4) Dreamworld (the mysterious zone between sleep and death that connects the living, dead and the gods). This is the incredible story of these four worlds and how they have influenced the development of all human thought, right up to the present day.

Our view of football will never be the same again... Written by a world-respected football historian, this football history/gift title reveals the global game's greatest myths and untruths. Football has been completely mythologized and many of the things football fans think they know about football and its history turn out not to be true. We want to believe the myths, and so they become accepted. So much football writing is not properly researched, and so the myths get repeated... again and again and again. Backed up by the highest level of academic research yet written in an accessible, mass-market style, the book will explore the truth behind many accepted myths. For example, did you know: - The Germans took football to Brazil, not the English - Rugby and not football could quite easily have been the world's leading sport - There are gay professional players ...and always have been! - Goalkeepers should not dive for penalties - Football hooliganism did not begin in England - Shirt colours do make a difference - Cambridge and not Sheffield is the home of the oldest football club in the world - Arsenal should not be in the Premier League... they cheated to be there - The Dynamo Kiev team were not executed after beating a German SS team in 1941 -

England did not win the World Cup fairly in 1966 ... but not in the way you think! Written by Kevin Moore, the founding director of the National Football Museum (the world's leading football museum), this thoroughly researched and authoritative book will debunk more than 50 of the greatest myths surrounding football.

What is the nature of the New Order proposed by the Pythagorean Illuminati, the world's most controversial secret society? The Illuminati advocate the replacement of democracy by meritocracy, the abolition of all monarchies, dynastic families and privileged elites. How can the corrupt reign of the Old World Order finally be brought to an end? The Illuminati have proposed the most radical and revolutionary redistributive policy of all time: 100% inheritance tax. With this single measure, the iniquitous rule of elite families such as the Rothschilds and Bushes would be terminated. The super rich defy the natural law of the regression to the mean. The rich just keep getting richer, and the poor poorer. 100% inheritance tax restores the law of nature; it brings back healthy social equilibrium. It prevents the formation of dynasties that bestride the globe for centuries. It gives everyone a fair chance in life.

Artists' Letters Bloomsbury Publishing

Three hundred years ago, it was possible to have read all of the important books in the world. Most intelligent people of the time believed the world was a living organism. Matter was alive (hylozoism), or mind was everywhere (panpsychism), or God was everywhere (theism), or God and Nature were one (pantheism). A hundred years later, the world was viewed as a vast, purposeless machine. Either there was no God (atheism), or he was a remote God of Laws (deism) and not of revelation and salvation. Leibniz was the last genius to know everything and to accept that the universe was an organism – a mathematical organism. Leibniz was the secret author of the Illuminati's Grand Unified Theory of Everything based on "nothing". He created an entire universe out of a "Big Bang" singularity comprising infinite "monads" (zeros), each with infinite energy capacity. This is the story of the first mathematical Theory of Everything. Leibniz's monads have one last, incredible secret to reveal: they are souls!

Christianity: The Devil's Greatest Trick Magus Books

It's a simple fact that most Christians know next to nothing about Christianity. How many people are aware of the many heresies that were stamped out by the early Church? Had any of these heresies triumphed, the world would be a very different, and much saner place. Find out about the monstrous St Augustine and his doctrines of grace, Original Sin, Predestination and the Total Depravity of the human race. This "saint" was happy to send to hell unbaptised babies that died in infancy. His great enemy was the humane and rational Celtic monk Pelagius. The great tragedy of Christianity is that it listened to Augustine rather than Pelagius. Were the Jews advocates of temple prostitution, even within the confines of Solomon's holy temple to Yahweh? The material in this book is provided by the Pythagorean Illuminati, the oldest secret society in the world, and is not for petty, cheap, narrow-minded religious fanatics.

Why would a smart New York investment banker pay \$12 million for the decaying, stuffed carcass of a shark? By what alchemy does Jackson Pollock's drip painting No. 5, 1948 sell for \$140 million? Intriguing and entertaining, *The \$12 Million Stuffed Shark* is a Freakonomics approach to the economics and psychology of the contemporary art world. Why were record prices achieved at auction for works by 131 contemporary artists in 2006 alone, with astonishing new heights reached in 2007? Don Thompson explores the money, lust, and self-aggrandizement of the art world in an attempt to determine what makes a particular work valuable while others are ignored. This book is the first to look at the economics and the marketing strategies that enable the modern art market to generate such astronomical prices. Drawing on interviews with past and present executives of auction houses and art dealerships, artists, and the buyers who move the market,

Thompson launches the reader on a journey of discovery through the peculiar world of modern art. Surprising, passionate, gossipy, revelatory, *The \$12 Million Stuffed Shark* reveals a great deal that even experienced auction purchasers do not know.

Eidomorphism: The World as Math and Representation is a book comprising a total system of philosophical knowledge, encompassing science, religion, mathematics, and logic. Eidomorphism is a synthesis of the philosophies of the Pythagoras, Plotinus, Spinoza, Leibniz, Schopenhauer and Gödel. Eidomorphism proposes a single mathematical substance as a unity of objective form and subjective content, united in unit-point entities outside of space and time. As a philosophical, mathematical, and scientific system and theory of everything, Eidomorphism unites quantum theory with philosophy, biology with psychology, and cosmology with first causes in a single, mathematical system based on the simplest and smallest entities imaginable. No stone is left unturned and no question is left unanswered in this mathematical answer to the riddle of the Philosopher's Stone.

Wicked Messenger Magus Books

Bob Dylan's abrupt abandonment of overtly political songwriting in the mid-1960s caused an uproar among critics and fans. In *Wicked Messenger*, acclaimed cultural-political commentator Mike Marqusee advances the new thesis that Dylan did not drop politics from his songs but changed the manner of his critique to address the changing political and cultural climate and, more importantly, his own evolving aesthetic. *Wicked Messenger* is also a riveting political history of the United States in the 1960s. Tracing the development of the decade's political and cultural dissent movements, Marqusee shows how their twists and turns were anticipated in the poetic aesthetic—anarchic, unaccountable, contradictory, punk—of Dylan's mid-sixties albums, as well as in his recent artistic ventures in *Chronicles, Vol. I* and *Masked and Anonymous*. Dylan's anguished, self-obsessed, prickly artistic evolution, Marqusee asserts, was a deeply creative response to a deeply disturbing situation. "He can no longer tell the story straight," Marqusee concludes, "because any story told straight is a false one."

They came seeking Illumination. Did they find it? Well, how would they know? What makes you think you're "enlightened"? Maybe you're one of those false awakeners. How do you know that your "enlightenment" isn't illusory? What criteria are you using to determine what "enlightenment" is? Why those criteria? Have you ever even thought about it? And if you haven't, how can you possibly be enlightened? Enlightenment isn't ignorance. It's not about willfully ignoring the facts. It's not about turning your back on reason and logic. It's not about severe cognitive deficits. It's not about annihilating your mind ("nirvana"). It's not about unconditional love. It's not about your feelings at all. It's not about super-duper mystical intuition. It's not about perfecting your senses. It's about none of those. Project Illumination is about showing what Illumination is really all about. Come inside and expose yourself to the light of reason, the only thing that can truly illuminate you. Are you ready to receive the light? Let's light this thing up.

You many think you know everything you need to know about the historical figure "Jesus Christ", but every cherished belief you have is false. Jesus Christ is a fraud. For a start, his name wasn't Jesus Christ but Yehoshua ben Yosef. And, just as his name is a fiction designed to disguise the truth, so is everything else about him. We will demonstrate the following: 1) The central promise of Christianity – the resurrection of the dead – is utterly wrong. The Christian Gospels demonstrate conclusively that Jesus Christ was reincarnated. 2) Jesus Christ was the central figure in one of the most audacious plots in history. 3) He was head of an Elite Family that wished to rule the world.

The Family exists to this day. 4) Jesus Christ was the leader of an army that sought to overthrow Roman rule in Judea. He was executed as a violent revolutionary attempting to set himself up as a king. 5) Judas, the infamous traitor, was the brother of Christ. The greatest lie in history has endured too long.

If you consider it impossible that the morally perfect God would order a father to make a human sacrifice of his innocent son for no reason other than to demonstrate absolute, mindless obedience, then the God of Abraham cannot be God. So who is he? The ancient Gnostics had the obvious answer - he's Satan. Doesn't that explain the horrific history of the Abrahamic religions and their grotesque propensity for violence? Abrahamism is a terrorist religion, led by a terrorist God who demands unwavering obedience even when it contradicts morality. The Jews, Christians

and Muslims who trace their common ancestry to Abraham are thus revealed as Devil worshippers. This book provides a theological dissection of the tale of Abraham from the Jewish, Christian and Muslim perspectives. It reveals Abraham as one of the most evil men in history and unquestionably the world's first psychopath. Like the Nazis, he put obedience to a tyrannical monster above human life.
