Book of the Moon Usborne

Thirty years have passed since Christine and her father Heinz had a disastrous vacation together, when her father left her at a gas station to teach her a lesson. But now Christine's mother is insisting that Christine and her best friend, Dorothea, take Heinz along on a relaxing girls' trip to the beach. Will this vacation also be a disaster? Or will Christine realize that she may not be too grown up to need her father?

Lift-The-Flap Telling the Time Little, Brown Books for Young Readers

Press the pages of this enchantingly illustrated book to hear the farmyard world come to life. Little children will love discovering the animals and all the other things making noises on the busy

farm; there's a noisy tractor, a crowing cockerel, buzzing bees, a mooing cow, cheeping chicks and more. Also includes lots of die-cuts and peep-holes alongside the sounds, creating a multi-sensory, interactive activity. Provides a great introduction to farmyard animals with plenty of items to look and spot for eager eyes and little fingers.

Baby's Very First Noisy Book Dial Press

From the author of *The Italian Teacher*, this acclaimed debut novel set in Rome follows the topsy-turvy lives of the denizens of an English language newspaper. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Janet Maslin, *The New York Times* • *The Economist* • NPR • Slate • *The Christian Science Monitor* • *Financial Times* • *The Plain Dealer* • *Minneapolis Star Tribune* • *St. Louis Post-Dispatch* • *The Kansas City Star* • *The Globe and Mail* • *Publishers Weekly* Look in the back of the book for a conversation between Tom Rachman and Malcolm Gladwell Fifty years and many changes have ensued since the paper was founded by an enigmatic millionaire, and now, amid the stained carpeting and dingy office furniture, the staff's personal dramas seem far more important than the daily headlines. Kathleen, the imperious editor in chief, is smarting from a betrayal in her open marriage; Arthur, the lazy obituary writer, is transformed by a personal tragedy; Abby, the embattled financial officer, discovers that her job cuts and her love life are intertwined in a most unexpected way. Out in the field, a veteran Paris freelancer goes to desperate lengths for his next byline, while the new Cairo stringer is mercilessly manipulated by an outrageous war correspondent with an outsize ego. And in the shadows is the isolated young publisher who pays more attention to his prized

basset hound, Schopenhauer, than to the fate of his family's quirky newspaper. As the era of print news gives way to the Internet age and this imperfect crew stumbles toward an uncertain future, the paper's rich history is revealed, including the surprising truth about its founder's intentions. Spirited, moving, and highly original, *The Imperfectionists* will establish Tom Rachman as one of our most perceptive, assured literary talents.

The Wolf and the Fly Sound Books

Thomas J Watson Sr's motto for IBM was THINK, and for more than a century, that one little word worked overtime. In *Making the World Work Better: The Ideas That Shaped a Century and a Company*, journalists Kevin Maney, Steve Hamm, and Jeffrey M. O'Brien mark the Centennial of IBM's founding by examining how IBM has distinctly contributed to the evolution of technology and the modern corporation over the past 100 years. The authors offer a fresh analysis through interviews of many key figures, chronicling the Nobel Prize-winning work of the company's research laboratories and uncovering rich archival material, including hundreds of vintage photographs and drawings. The book recounts the company's missteps, as well as its successes. It captures moments of high drama - from the bet-the-business gamble on the legendary System/360 in the 1960s to the turnaround from the company's near-death experience in the early 1990s. The authors have shaped a narrative of discoveries, struggles, individual insights and lasting impact on technology, business and society. Taken together, their essays reveal a distinctive mindset and organizational culture, animated by a deeply held commitment to the hard work of progress. IBM

engineers and scientists invented many of the building blocks of modern information technology, including the memory chip, the disk drive, the scanning tunneling microscope (essential to nanotechnology) and even new fields of mathematics. IBM brought the punch-card tabulator, the mainframe and the personal computer into the mainstream of business and modern life. IBM was the first large American company to pay all employees salaries rather than hourly wages, an early champion of hiring women and minorities and a pioneer of new approaches to doing business--with its model of the globally integrated enterprise. And it has had a lasting impact on the course of society from enabling the US Social Security System, to the space program, to airline reservations, modern banking and retail, to many of the ways our world today works. The lessons for all businesses - indeed, all institutions - are powerful: To survive and succeed over a long period, you have to anticipate change and to be willing and able to continually transform. But while change happens, progress is deliberate. IBM - deliberately led by a pioneering culture and grounded in a set of core ideas - came into being, grew, thrived, nearly died, transformed itself... and is now charting a new path forward for its second century toward a perhaps surprising future on a planetary scale.
