AVILA ALINA

MotorBoating CRC Press

Widely adopted around the world, Engineering Materials 1 is a core materials science and engineering text for third- and fourth-year undergraduate students; it provides a broad introduction to the mechanical and environmental properties of materials used in a wide range of engineering applications. The text is deliberately concise, with each chapter designed to cover the content of one lecture. As in previous editions, chapters are arranged in groups dealing with particular classes of properties, each group covering property definitions, measurement, underlying principles, and materials selection techniques. Every group concludes with a chapter of case studies that demonstrate practical engineering problems involving materials. The 5th edition boasts expanded properties coverage, new case studies, more exercises and examples, and all-around improved pedagogy. Engineering Materials 1, Fifth Edition is perfect as a stand-alone text for a one-semester course in engineering materials or a first text with its companion Engineering Materials 2: An Introduction to Microstructures and Processing, in a two-semester course or sequence. - New chapters on magnetic, optical, thermal and electrical properties, with appropriate case studies of applications - Improved pedagogy, featuring more relevant photographs, new glossary of terms, additional worked examples, plus 50% more exercises than in previous edition, now graded according to difficulty - Improved discussion of supply and demand in Chapter 2 - Discussion at various points throughout the book of how nanomaterials can differ from larger-scale materials in their properties - New case studies on medical materials/biomaterials

Arctic and Northern Waters McGraw Hill

This text gives a broad introduction to the properties of materials used in engineering applications, and is intended to provide a course in engineering materials for students with no previous background in the subject.

Maritime Technology and Engineering 5 Volume 1 Springer

Exactly what you need for the AS Level GCE Double Award in Applied ICT for AQA - this student book matches the specification and provides all information needed for the double award.

What's Your Competitive Advantage? offers a way to work with the realities of a complex world and the changing needs of your business. No-one can predict the future and we can't predict the ultimate effect of any actions we take. What's your Competitive Advantage? sets out an approach to managing change that reflects this complex reality. Built on insights from research into value creation and complex systems the book explains seven value creating strategies and the practices and change processes they require. Each play has an associated set of capabilities which deliver customer value efficiently: SPECIALISATION - choose to focus on a single product or product group and compete through superior product performance. ADAPTIVE - increase the system's ability to respond to changing circumstances, particularly to changing customer needs. LOW COST - Deliver

equivalent product quality compared to competitors but with a continual and relentless focus on cost reduction INNOVATION - Competing through product innovations. EXCELLENCE - Continuous incremental improvement of product or service quality NO-FRILLS - Serve price sensitive customers with a stripped down alternative product or service. TARGETING - Focus on a specific market segment and serve the needs of these customers more effectively than less targeted rivals The full text downloaded to your computer With eBooks you can: search for key concepts, words and phrases make highlights and notes as you study share your notes with friends eBooks are downloaded to your computer and accessible either offline through the Bookshelf (available as a free download), available online and also via the iPad and Android apps. Upon purchase, you'll gain instant access to this eBook. Time limit The eBooks products do not have an expiry date. You will continue to access your digital ebook products whilst you have your Bookshelf installed.

Boating CRC Press

The fifth European edition of Corporate Finance takes an applied approach to cover all the latest research and topic areas important to students taking Finance courses. The new edition provides an international perspective on all areas of corporate finance and has been updated to include discussion on current trends such as the integrated nature of global supply chains, financial risk management, and key regulatory changes impacting the sector. It addresses the impact that FinTech, the climate and geopolitics are having on the development of corporate finance, considers the questions brought about by the global corona virus pandemic, and looks to the future of the industry. Understanding and Application •Clear, user-friendly style •Example boxes in every chapter provide hypothetical examples to illustrate theoretical concepts such as cash flow timing, dividend smoothing and differential growth. •Real World Insight boxes use companies like Apple, Volkswagen and Adidas to show how they have applied corporate finance theories and concepts to their business decisions. •Chapter links throughout provide quick cross-referencing to show the connections between topics. Practice and Proficiency •Mini and Practical cases present scenarios and questions to practice application and learning. •Questions and Problems in each chapter, categorised by topic and level of difficulty, allow for rigorous testing of the chapter content. •Numbered maths equations and key notation boxes listing the variables and acronyms that will be encountered in each chapter, designed to encourage mastery of Maths. •Exam Questions designed to take 45 minutes and test you on material learned in a more formal exam style. •Connect® resources include algorithmic questions designed to ensure equations and calculations are not learned by rote but by thorough understanding and practice. New to This Edition •Sustainability in Action boxes draw on issues relating to the environment, society, the economy and climate change to show how corporate finance is so important to the resolution of sustainability challenges. •Updated discussions and new sections on sustainable value added, green bonds, dividend policy and share repurchases, Islamic Financing, intangible valuation, and the differential value method. Available on McGraw Hill's Connect®, the well-established online learning platform, which features our award-winning adaptive reading experience as well as resources to help faculty and institutions improve student outcomes and course delivery efficiency. To learn more, visit mheducation.co.uk/connect David Hillier is

Associate Principal and Executive Dean of the University of Strathclyde Business School. A Professor of Finance, David was recognized as being in the top 3 per cent of the most prolific finance researchers in the world over the past 50 years (Heck and Cooley, 2009) and appears regularly in the media as a business commentator. His YouTube channel of finance lectures (professordavidhillier) has attracted nearly half a million views worldwide. This European edition is originally based on the Corporate Finance text by Stephen A. Ross, Randolph W. Westerfield, Jeffrey F. Jaffe, and Bradford D. Jordan.

Adventure Tourism Management Cengage Learning

As the nations of the Caribbean respond to the emerging effects of climate change and prepare for those to come, tourism has the potential to either worsen or mitigate these impacts. In this book we look specifically at marine recreation and how its various sectors—ranging from surfing, diving and sport fishing, to yachting and cruise ships—are coping with and preparing for climate change in the Caribbean. Through essays and case studies by scientists, business leaders, government and NGO staff, and others, we show that tourism could lead the way in reducing human-induced climate impacts, protecting and restoring crucial ecosystems and habitats, and building sustainable futures for the people of the Caribbean and beyond.

Towards Green Marine Technology and Transport CRC Press

Towards Green Marine Technology and Transport covers recent developments in marine technology and transport. The book brings together a selection of papers reflecting fundamental areas of recent research and development in the fields of ship hydrodynamics, marine structures, ship design, shipyard technology, ship machinery, maritime transportation,

Managing Tourism Enterprises Imray, Laurie, Norie and Wilson Ltd

Ebook: *Fundamentals of Corporate Finance*

Yachting Heinemann

This book, written for the benefit of engineering students and practicing engineers alike, is the culmination of the author's four decades of experience related to the subject of electrical measurements, comprising nearly 30 years of experimental research and more than 15 years of teaching at several engineering institutions. The unique feature of this book, apart from covering the syllabi of various universities, is the style of presentation of all important aspects and features of electrical measurements, with neatly and clearly drawn figures, diagrams and colour and b/w photos that illustrate details of instruments among other things, making the text easy to follow and comprehend. Enhancing the chapters are interspersed explanatory comments and, where necessary, footnotes to help better understanding of the chapter contents. Also, each chapter begins with a "recall" to link the subject matter with the related science or phenomenon and fundamental background. The first few chapters of the book comprise "Units, Dimensions and Standards"; "Electricity, Magnetism and Electromagnetism" and "Network Analysis". These topics form the basics of electrical measurements and provide a better understanding of the main topics discussed in later chapters. The last two chapters represent valuable assets of the book, and relate to (a) "Magnetic Measurements", describing many unique features not easily available elsewhere, a good study of which is essential for the design and development of most electric equipment – from motors to transformers and alternators, and (b) "Measurement of Non-electrical Quantities", dealing

extensively with the measuring techniques of a number of variables that constitute an important requirement of engineering measurement practices. The book is supplemented by ten appendices covering various aspects dealing with the art and science of electrical measurement and of relevance to some of the topics in main chapters. Other useful features of the book include an elaborate chapter-by-chapter list of symbols, worked examples, exercises and quiz questions at the end of each chapter, and extensive authors' and subject index. This book will be of interest to all students taking courses in electrical measurements as a part of a B.Tech. in electrical engineering. Professionals in the field of electrical engineering will also find the book of use.

MotorBoating Business Expert Press

This book reports on research and developments in human-technology interaction. A special emphasis is given to human-computer interaction, and its implementation for a wide range of purposes such as healthcare, aerospace, telecommunication, and education, among others. The human aspects are analyzed in detail. Timely studies on human-centered design, wearable technologies, social and affective computing, augmented, virtual and mixed reality simulation, human rehabilitation and biomechanics represent the core of the book. Emerging technology applications in business, security, and infrastructure are also critically examined, thus offering a timely, scientifically-grounded, but also professionally-oriented snapshot of the current state of the field. The book is based on contributions presented at the 3rd International Conference on Human Interaction and Emerging Technologies: Future Applications, IHET 2020, held on August 27-29, 2020. It offers a timely survey and a practice-oriented reference guide to researchers and professionals dealing with design and/or management of the new generation of service systems.

Sustainable Development and Planning VI CABI

Corporate Finance, by Ross, Westerfield, Jaffe and Jordan was written to convey the most important corporate finance concepts and applications as a level that is approachable to the widest possible audience. The concise format, managerial context and design, and student-friendly writing style are key attributes in this text. We took the best from RWJ Fundamentals and RWJ Corporate to create a book that fits an underserved need in the market. RWJ Core Principles strikes a balance by introducing and covering the essentials, while leaving more specialized topics to follow-up courses. This text distills the subject of corporate finance down to its core, while also maintaining a deciding modern approach. The well-respected author team is known for their clear, accessible presentation of material that makes this text an excellent teaching tool.

A comprehensive second edition of *Business Management for the IB Diploma*, revised for first teaching in 2014.

Tourism in Pacific Islands Springer Nature

The national maritime SAR review.

Marine Tourism, Climate Change, and Resilience in the Caribbean, Volume II McGraw Hill

Forest trees cover 30% of the earth's land surface, providing renewable fuel, wood, timber, shelter, fruits, leaves, bark, roots, and are source of medicinal products in addition to benefits such as

carbon sequestration, water shed protection, and habitat for 1/3 of terrestrial species. However, the genetic analysis and breeding of trees has lagged behind that of crop plants. Therefore, systematic conservation, sustainable improvement and pragmatic utilization of trees are global priorities. This book provides comprehensive and up to date information about tree characterization, biological understanding, and improvement through biotechnological and molecular tools.

Engineering Materials 1 Pearson UK

Exploring the role of direct action within times of severe social and ecological upheaval, this book evokes the rich, diverse world that radical environmental activists and indigenous environmental protectors are fighting for.

On Scene W. W. Norton & Company

Pacific Island Countries have been shown to be especially vulnerable to such external influences as natural disasters, political unrest and downturns in the global economy and their tourism industries have been notably affected. In particular, they typically have a narrow resource base and a fragile and often vulnerable natural environment. While there is some research on islands and small states, there is a dearth of information on the South Pacific and very little research is being undertaken in the region compared to other geographical regions in the world. This volume brings together current

work in Pacific Island tourism. In this collection, three main themes arise: Images of the South Pacific; Socio-economic Impacts of Tourism; and Pacific Island Countries and the Outside World. The first focus is on the question of image, namely, stereotypes of a destination held by tourists and potential tourists, the extent to which residents, for their part, really welcome visitors, and the role tourism might play in changing pre-established images. The second theme is tourism's impacts, notably the economic and socio-cultural effects of international tourism's intrusion in the region which, though often hotly debated, have attracted relatively little empirical research. The third focus is on the challenges of how PICs articulate with their external geo-political and physical environment. These involve existing relations with formal colonial centres, geographical isolation, the need for greater air access to the outside world and for more tourists, and the continuing threat to several PICs of global warming, which increased air travel will inevitably exacerbate. This text will be of interest to tourism students, researchers and academics in the fields of tourism, development studies and cultural studies.

What's Your Competitive Advantage? Cambridge University Press

Covers a wide range of tourism activities - such as skiing, surfing, horse-riding and hiking. This is the essential textbook for students interested in this rapidly growing area of tourism industry. Ralf Buckley, Griffith Uni, Australia.
