"Particularly relevant in an election year...This book is full of data—on the economy, technology, and more—that will help millennials articulate their generational rage and help boomers understand where they're coming from." —The Washington Post "Jill Filipovic cuts through the noise with characteristic clarity and nuance. Behind the meme is a thoughtfully reported book that greatly contributes to our understanding of generational change." —Irin Carmon, coauthor of the New York Times bestseller Notorious RBG Baby Boomers are the most prosperous generation in American history, but their kids are screwed. In this eye-opening book, journalist Jill Filipovic breaks down the massive problems facing Millennials including climate, money, housing, and healthcare. In *OK Boomer, Let's Talk*, journalist (and Millennial) Jill Filipovic tells the definitive story of her generation. Talking to gig workers, economists, policy makers, and dozens of struggling Millennials drowning in debt on a planet quite literally in flames, Filipovic paints a shocking and nuanced portrait of a generation being left behind: -Millennials are the most educated generation in American history—and also the most broke. -Millennials hold just 3 percent of American wealth. When they were the same age, Boomers held 21 percent. -The average older Millennial has \$15,000 in student loan debt. The average Boomer at the same age? Just \$2,300 in today's dollars. -Millennials are paying almost 40 percent more for their first homes than Boomers did. -American families spend twice as much on healthcare now than they did when Boomers were young parents. Filipovic shows that Millennials are not the avocado-toast-eating snowflakes of Boomer outrage fantasies. But they are the first American generation that will do worse than their parents. "OK, Boomer" isn't just a sarcastic dismissal—it's a recognition that Millennials are in crisis, and that Boomer voters, bankers, and policy makers are responsible. Filipovic goes beyond the meme, upending dated assumptions with revelatory data and revealing portraits of young people delaying adulthood to pay down debt, obsessed with "wellness" because they can't afford real healthcare, and struggling to #hustle in the precarious gig economy. *OK Boomer, Let's Talk* is at once an explainer and an extended olive branch that will finally allow these two generations to truly understand each other.

Why do catastrophes happen? What sets off earthquakes, for example? What about mass extinctions of species? The outbreak of major wars? Massive traffic jams that seem to appear out of nowhere? Why does the stock market periodically suffer dramatic crashes? Why do some forest fires become superheated infernos that rage totally out of control? Experts have never been able to explain the causes of any of these disasters. Now scientists have discovered that these seemingly unrelated cataclysms, both natural and human, almost certainly all happen for one fundamental reason. More than that, there is not and never will be any way to predict them. Critically acclaimed science journalist Mark Buchanan tells the fascinating story of the discovery that there is a natural structure of instability woven into the fabric of our world. From humble beginnings studying the physics of sandpiles, scientists have learned that an astonishing range of things—Earth's crust, cars on a highway, the market for stocks, and the tightly woven networks of human society—have a natural tendency to organize themselves into what's called the "critical state," in which they are poised on what Buchanan describes as the "knife-edge of instability." The more places scientists have looked for the critical state, the more places they've found it, and some believe that the pervasiveness of instability must now be seen as a fundamental feature of our world. *Ubiquity* is packed with stories of real-life catastrophes, such as the huge earthquake that in 1995 hit Kobe, Japan, killing 5,000 people; the forest fires that ravaged Yellowstone National Park in 1988; the stock market crash of 1987; the mass extinction that killed off the dinosaurs; and the outbreak of World War I. Combining

literary flair with scientific rigor, Buchanan introduces the researchers who have pieced together the evidence of the critical state, explaining their ingenious work and unexpected insights in beautifully lucid prose. At the dawn of this new century, Buchanan reveals, we are witnessing the emergence of an extraordinarily powerful new field of science that will help us comprehend the bewildering and unruly rhythms that dominate our lives and may even lead to a true science of the dynamics of human culture and history.

*Linguistic Landscape in the Spanish-speaking World* is the first book dedicated to languages in the urban space of the Spanish-speaking world filling a gap in the extensive research that highlights the richness and complexity of Spanish Linguistic Landscapes. This book provides scholars with an instrument to access a variety of studies in the field within a monolingual or multilingual setting from a theoretical, sociolinguistic and pragmatic perspective. The works contained in this volume aim to answer questions such as, how the linguistic landscape of certain territories includes new discourses that, ultimately, contribute to a fairer society; how the linguistic landscape of minority or low-income communities can enforce changes on language policy and who determines advertising planning; how these decisions are made and how these decisions affect vendors, customers, and the general public alike. All in all, this collective volume uncovers the voices of minority groups within the communities under study.

*Sociolinguistics and Language Education* Vanderbilt University Press

This book, addressed to experienced and novice language educators, provides an up-to-date overview of sociolinguistics, reflecting changes in the global situation and the continuing evolution of the field and its relevance to language education around the world. Topics covered include nationalism and popular culture, style and identity, creole languages, critical language awareness, gender and ethnicity, multimodal literacies, classroom discourse, and ideologies and power. Whether considering the role of English as an international language or innovative initiatives in Indigenous language revitalization, in every context of the world sociolinguistic perspectives highlight the fluid and flexible use of language in communities and classrooms, and the importance of teacher practices that open up spaces of awareness and acceptance of --and access to--the widest possible communicative repertoire for students.

*Transfeminist Perspectives in and beyond Transgender and Gender Studies* University of Michigan Press

With contributions by researchers from India, Europe, North America and the Caribbean, *In Translation - Reflections, refractions, transformations* touches on questions of method and on topics - including copyright, cultural hybridity, globalization, identity construction, and minority languages - which are important for the disciplinary development of translation studies but also of interest to other fields as well, most notably comparative literature, cultural studies and world literature. The volume provides a forum for new voices to be heard alongside those of well-established scholars and for current concerns to express themselves, often focusing on practices in areas of the world other than Europe or North America, which have until now tended to dominate the field. Acknowledging difference and celebrating it, the contributions conceive of translation as a process which reconstitutes and transforms, which brings renewal and growth, an interaction in a new context, a new reading, a new writing.

"This fascinating, well-written book explores how tequila has come to symbolize what it means to be Mexican . . . A must read." —Choice ¡Tequila! Distilling the Spirit of Mexico traces how and why tequila became Mexico's national drink and symbol. Starting in Mexico's colonial era and tracing the drink's rise through the present day, Marie Sarita Gaytán reveals the formative roles played by some unlikely characters—such as the revolutionary Pancho Villa, who was himself a teetotaler. She also

shows how tequila's cultural status was shaped by US-Mexican relations, the tourism industry, shifting gender roles, technology, regulation, film, music, and literature. Like all stories about national symbols, the rise of tequila forms a complicated, unexpected, and poignant tale. By unraveling its inner workings, Gaytán encourages us to think critically about national symbols more generally—especially the ways they both reveal and conceal—to tell a story about a place, a culture, and a people. In many ways, the story of tequila is the story of Mexico.

Heritage languages, such as the Turkish varieties spoken in Berlin or the Spanish used in Los Angeles, are non-dominant languages, often with little prestige. Their speakers also speak the dominant language of the country they live in. Often heritage languages undergo changes due to their special status. They have received a lot of scholarly attention and provide a link between academic concerns and educational issues. This book takes a language contact perspective: we consider heritage languages from the perspective of their history, their structural properties, and their interaction with other surrounding languages.

**The Language Instinct Crown**

This book examines how neoliberalism finds expression in foreign language textbooks. Moving beyond the usual focus on English, Pau Bori explores the impact of neoliberal ideology on Catalan textbooks. By comparing Catalan textbooks to English textbooks, this book interrogates the similarities and differences between a minor and a global language in the age of neoliberalism. Drawing on insights from critical theory and critical pedagogy, this study provides a fresh perspective on foreign language textbooks and second language education more broadly. *Language Textbooks in the Era of Neoliberalism* paves the way for new critical perspectives in language education that will challenge the current hegemony of neoliberalism.

When British anthropologist Nigel Barley set up home among the Dowayo people in northern Cameroon, he knew how fieldwork should be conducted. Unfortunately, nobody had told the Dowayo. His compulsive, witty account of first fieldwork offers a wonderfully inspiring introduction to the real life of a cultural anthropologist doing research in a Third World area. Both touching and hilarious, Barley's unconventional story—in which he survived boredom, hostility, disaster, and illness—addresses many critical issues in anthropology and in fieldwork.

This book explores multilingualism as an imaginative articulation of the experience of modernity in twentieth-century Spanish and American literature. It argues that while individual multilingual practices are highly singular, literary multilingualism exceeds the conventional bounds of modernism to become emblematic of the modern age. The book explores the confluence of multilingualism and modernity in the theme of barbarism, examining the significance of this theme to the relationship between language and modernity in the Spanish-speaking world, and the work of five authors in particular. These authors – Ramón del Valle-Inclán, Ernest Hemingway, José María Arguedas, Jorge Semprún and Juan Goytisolo – explore the stylistic and conceptual potential of the interaction between languages, including Spanish, French, English, Galician, Quechua and Arabic, their work reflecting the eclecticism of literary multilingualism while revealing its significance as a mode of response to modernity.

The Puerto Rican debt crisis, the challenges of social, political, and economic transition in Cuba, and the populist politics of Duterte in the Philippines—these topics are typically seen as disparate experiences of social reality. Though these island territories were colonized by the same two colonial powers—by the Spanish Empire and, after 1898, by the United States—research in the fields of history and the social sciences rarely draws links between these three contexts. Located at the intersection of Postcolonial Studies, Latin American Studies, Caribbean Studies, and History, this interdisciplinary volume brings together scholars from the US, Europe, Latin America, the Caribbean, and the Philippines to examine the colonial legacies of the three island nations of Cuba, Puerto Rico, and the Philippines. Instead of focusing on the legacies of US colonialism, the continuing legacies of Spanish colonialism are put center-stage. The analyses offered in the volume yield new and surprising insights into the study of colonial and postcolonial constellations that are of interest not only for experts, but also for readers interested in the social, political, economic, and cultural dynamics of Cuba, Puerto Rico, and the Philippines during Spanish colonization and in the present. The empirical material profits from a rigorous and systematic analytical framework and is thus easily accessible for students, researchers, and the interested public alike.

**An Introduction to Social Psychology Multilingual Matters**

From the Nobel laureate, a book-length poem on two educations in painting, a century apart "Between me and Venice the thigh of a hound; my awe of the ordinary, because even as I write, paused on a step of this couplet, I have never found its image again, a hound in astounding light." Tiepolo's Hound joins the quests of two Caribbean men: Camille Pissarro--a Sephardic Jew born in 1830 who leaves his native St. Thomas to follow his vocation as a painter in Paris--and the poet himself, who longs to rediscover a detail--"a slash of pink on the inner thigh / of a white hound"--of a Venetian painting encountered on an early visit from St. Lucia to New York. Both journeys take us through a Europe of the mind's eye, in search of a connection between the lost, actual landscape of a childhood and the mythical landscape of empire. Published with twenty-five full-color reproductions of Derek Walcott's own paintings, the poem is at once the spiritual biography of a great artist in self-imposed exile, a history in verse of Impressionist painting, and a memoir of the poet's desire to catch the visual world in more than words.

Shift happens: Emerging technologies and globalization have resulted in political, social and cultural changes. These changes have a profound impact on all aspects of human life, including education.

Yet while society has changed and continues to change, schools are slow to keep up. This book explores issues related to transforming and modernizing our educational systems, including the impact of societal shifts on education, the efforts at various levels to bring schools into the 21st century, the identification of 21st century skills, the reformation of the curriculum, the creation of alternative models of schooling, the innovative use of technology in education, and many others. It addresses questions like the following: Should schools systems adapt to better meet the needs of tomorrow's world and how should this be accomplished? How can society better prepare students for a changing and challenging modern world? What skills do students need to lead successful lives and become productive citizens in the 21st century? How can educators create learning environments that are relevant and meaningful for digital natives? How can the school curriculum be made more rigorous to meet the needs of the 21st century? This book encourages readers to transcend the limits of their own educational experience, to think beyond familiar notions of schooling, instruction and curriculum, to consider how to best structure learning so that it will benefit future generations. It encourages a deeper analysis of the existing education system and offers practical insights into future directions focused on preparing students with 21st century skills.

This book is designed as a laboratory guide for the food microbiologist, to assist in the isolation and identification of common food-borne fungi. We emphasise the fungi which cause food spoilage, but also devote space to the fungi commonly encountered in foods at harvest, and in the food factory. As far as possible, we have kept the text simple, although the need for clarity in the descriptions has necessitated the use of some specialised mycological terms. The identification keys have been designed for use by microbiologists with little or no prior knowledge of mycology. For identification to genus level, they are based primarily on the cultural and physiological characteristics of fungi grown under a standardised set of conditions. The microscopic features of the various fungi become more important when identifying isolates at the species level. Nearly all of the species treated have been illustrated with colony photographs, together with photomicrographs or line drawings. The photomicrographs were taken using a Zeiss WL microscope fitted with Nomarski interference contrast optics. We are indebted to Mr W. Rushton and Ms L. Burton, who printed the many hundreds of photographs used to make up the figures in this book. We also wish to express our appreciation to Dr D.L. Hawksworth, Dr A.H.S.

**Global Value Chains in a Changing World Penguin**

Electronic open access edition funded by the National Endowment for the Humanities. Covering from 1915 to the present, this book deals with the role that artists and intellectuals have played regarding projects of European integration. Consciously or not, they partake of a tradition of Euroskepticism. Because Euroskepticism is often associated with the discourse of political elites, its literary and artistic expressions have gone largely unnoticed. This book addresses that gap. Taking Spain as a case study, author Luis Martín-Estudillo analyzes its conflict over its own Europeanness or exceptionalism, as well as the European view of Spain. He ranges from canonical writers like Unamuno, Ortega y Gasset, and Zambrano to new media artists like Valeriano López, Carlos Spottorno, and Santiago Sierra. Martín-Estudillo provides a new context for the current refugee crisis, the North-South divide among EU countries, and the generalized disaffection toward the project of European integration. The eclipsed critical tradition he discusses contributes to a deeper understanding of the notion of Europe and its institutional embodiments. It gives resonance to the intellectual and cultural history of Europe's "peripheries" and re-evaluates Euroskeptic contributions as one of the few hopes left to imagine ways to renew the promise of a union of the European nations.

2011 Reprint of 1961 Edition. Many social scientists have attempted to lump the unique Inca society into modern political and economic categories. Louis Baudin argued that Incan society was socialistic. He claimed that the ayllu system is what classified the Inca as a system of state socialism. Baudin defines state socialism as being based on the idea of the regulative action of a central power in social relations. According to Baudin, the idea of private property in Europe had been in existence for centuries, but no such idea existed at the times of the Incas. He claims, that society in Peru rested on a foundation of collective ownership which, to a certain extent, facilitated its establishment, because the effacement of the individual within a group prepared him to allow himself to be absorbed. Baudin argued that the higher ranking Incas tried, and succeeded to an extent, to force a degree of uniformity on the common Inca. The Inca were forced to dress similarly, eat the same food, practice the same religion, and speak the same language, Quechua.

**Spanish at Work Routledge**

A WALL STREET JOURNAL NATIONAL BESTSELLER \*AS SEEN ON TUCKER CARLSON TODAY AND THE JOE ROGAN EXPERIENCE\* A guide for the times—breaking down the lies about COVID-19 and shedding light on why we came to believe them. When he invented the original mRNA vaccine technology as a medical and graduate student in the late 1980s, Robert Malone could not have imagined that he would become a leader in a movement to expose the dangers of mRNA vaccines that billions of people have received—too often without being informed of the risks. For voicing opposition to the “mainstream” narrative, Dr. Robert Malone was censored by Big Tech and vilified by the media. But he continues to speak out and alert the world to the web of lies that we have all experienced. From vaccine safety and effectiveness to early treatments like ivermectin, to lockdowns, masks, and more, Dr. Malone is the signature dissident voice telling the other side of the story about COVID, the role of corporate media, censorship, propaganda, and the brave new world of transhumanism promoted by the World Economic Forum and its acolytes. What effect did the COVID policies have on lives, livelihoods, and democracies? How is it possible that the lies spread by governments would persist, and that our institutions would fail to correct them? Lies My Gov't Told Me takes a hard look at these questions and illustrates how data, information, and psychology have been distorted during the pandemic. Governments intentionally weaponized fear to mold behavior. The media smeared anyone who objected to the narrative. And Big Pharma—aligned with larger globalist interests exemplified by the likes of Bill Gates and the World Economic Forum—had captured the agencies that are supposed to regulate it long before the pandemic began. Dr. Malone explores these perverse connections between Pharma, government, and media, and tells us what can be done about it. With contributed chapters from other leading thinkers, such as Dr. Paul Marik and Professor Mattias Desmet, and drawing upon history, psychology, and economics, Lies My Gov't Told Me looks at COVID from numerous angles. Never satisfied with a simple answer or easy solution, Dr. Malone proposes multiple action plans for a better future. Dr. Malone calls on each of us to find our own solutions, our own ways to resist the control of fascist, corporatist, and totalitarian overlords. If we are to step out of the darkness—toward a world that defends the principles of the Constitution, upholds individual rights, and honors free speech—we all must play a part in the transition.
