**Naval Register** Pearson Higher Education AU

It is no longer the case that it's only society which benefits from CSR actions. A corporation actually helps itself when operating sustainably and does well because of its triple bottom line actions. The editors of *People, Planet and Profit* believe that whilst Corporate Social Responsibility is by now a familiar concept to academics or practitioners, insufficient attention has been paid to the end product of CSR in practice, which they define in terms of social and economic developmental effect. The contributions in this edited volume explain the developmental aspect of CSR from a conceptual perspective and provide empirical evidence of the impact of CSR delivery on stakeholders in different corners of the World. The emphasis is on what corporations take from and give back to their stakeholders whilst trying to behave in a corporately responsible fashion. Stakeholders, including employees, customers, host communities, governments and NGOs have diverse interests and expectations of CSR. This gives rise to questions about whether the activities corporations support are the ones today's stakeholders need; whether the CSR programmes being delivered are adequate; and about the relationship between the corporations' view of what constitutes CSR and that of the supposed beneficiaries. This book offers thoughtful answers to these questions and assesses the outcomes of corporate activities both in developed and developing countries and regions, in terms of economic progress and social and political advancement.

**Principles of Accounting Volume 1 - Financial Accounting** Frontiers E-books

The untold saga of John Randolph's 383 slaves, freed in his much-contested will of 1821, finally comes to light. Few legal cases in American history are as riveting as the controversy surrounding the will of Virginia Senator John Randolph (1773-1833), which—almost inexplicably—freed all 383 of his slaves in one of the largest and most publicized manumissions in American history. So famous is the case that Ta-Nehisi Coates has used it to condemn Randolph's cousin, Thomas Jefferson, for failing to free his own slaves. With this groundbreaking investigation, historian Gregory May now reveals a more surprising story, showing how madness and scandal shaped John Randolph's wildly shifting attitudes toward his slaves—and how endemic prejudice in the North ultimately deprived the freedmen of the land Randolph had promised them. Sweeping from the legal spectacle of the contested will through the freedmen's dramatic flight and horrific reception in Ohio, *A Madman's Will* is an extraordinary saga about the alluring promise of freedom and its tragic limitations.

*Unmasking Financial Psychopaths* Routledge

My experience in teaching Neurology residents, fellows and other colleagues who are particularly interested in the clinical neurosciences is they are too seldom exposed to the critical integration of clinical data with the breadth and depth of neuropathology. For this reason we developed these clinic-pathologic exercises for *Frontiers in Neurology Education*, particularly aimed at neurologists in training and other colleagues involved in the care of these patients. We hope that by providing practical, straightforward, readily accessible, and user friendly clinico-neuropathological material the educational needs of our readers will be met. We also hope to "recruit" newcomers to this ever exciting and intellectually challenging discipline of the clinical neurosciences.

**Accounts and Papers of the House of Commons** Routledge

Covering the entire world of business from heavy industry to the financial houses of Wall Street, this book shines a spotlight on 100 of the most infamous cases of misconduct and malfeasance in corporate history. Corporations are in the business of making money. But when companies forget ethics, take operational shortcuts, or willingly endanger customers and the general public in their

quest for profits, disasters of enormous magnitude can result. This book examines 100 of the worst cases of corporate greed and irresponsibility and poses the questions: Is it necessary or desirable to conduct business in this manner? Do the penalties and other punishments levied against these companies go far enough? And what is the government's responsibility for keeping corporate misdeeds in check? Coauthored by distinguished public policy experts, *When Good Companies Go Bad: 100 Corporate Miscalculations and Misdeeds* presents a representative sample of cases on a variety of topics, such as the financial sector, health care, environmental protection, product liability, and copyright. This broad introduction to the dark side of the corporate world focuses on events and scandals that resulted in substantial financial penalties, regulatory actions, or criminal convictions. The cases are presented in a readable and engaging format, making the book an illuminating and informative read for high school and college students as well as businesspeople, lawyers, journalists, and professors who teach American politics, public law, or public policy.

**Universal Health Coverage for Inclusive and Sustainable Development** Chandresh Agrawal  
*Troubled Transit* considers the situation of asylum seekers stuck in limbo in Indonesia from a number of perspectives. It presents not only the narratives of many transit migrants but also the perceptions of Indonesian authorities and of representatives of international and non-government organizations responsible for the care of transiting asylum seekers. Fascinated by the extraordinary and seemingly limitless resilience shown by asylum seekers during their often lengthy and dangerous journeys, the author highlights one particular fragment of their journeys — their time in Indonesia, which many expect to be the last stepping stone to a new life. While they long for their new life to unfold, most asylum seekers become embroiled in the complexities of living in transit. Indonesia, a vast archipelago of more than 17,000 islands, is more than a location where people spend time waiting; it is a nation state that interacts with transiting asylum seekers and formulates policies that have a profound impact on their experience in transit there. *Troubled Transit* tries to explain the complexities faced by the transiting migrants within the context of the Indonesian government and its political challenges, including its relationship with Australia. The Australia-centric view of recent asylum seeker issues has tended to ignore the larger socio-political context of the migratory routes and the perspectives of transit states towards asylum seekers stuck in transit. This book hopes to direct the Australia-centric gaze northwards to take Indonesian policies and policymaking into account, thereby giving Indonesia more relevance as a transit country and as an important partner in regional protection schemes and migration management. Even though some Indonesian policies and practices are less than favourable for asylum seekers, and even reprehensible from a human rights perspective, more attention must be paid to ongoing developments that impact on transiting asylum seekers in Indonesia if any of the hardships they suffer there are to be alleviated.

*Register of the Commissioned and Warrant Officers of the Navy of the United States and of the Marine Corps* Routledge

*Dead Pledges* is the first book to explore the ways that U.S. culture—from novels and poems to photojournalism and horror movies—has responded to the collapse of the financialized consumer credit economy in 2008. Connecting debt theory to questions of cultural form, this book argues that artists, filmmakers, and writers have re-imagined what it means to owe and to own in a period when debt is what makes our economic lives possible. Encompassing both popular entertainment and avant-garde art, the post-crisis productions examined here help to map the landscape of

contemporary debt: from foreclosure to credit scoring, student debt to securitized risk, microeconomic theory to anti-eviction activism. A searing critique of the ideology of debt, *Dead Pledges* dismantles the discourse of moral obligation so often invoked to make us repay. Debt is no longer a source of economic credibility, it contends, but a system of dispossession that threatens the basic fabric of social life.

*GPSC Exam PDF-Gujarat Municipal Accounts Officer-Class-2 Exam eBook PDF* Penguin UK

The goals of universal health coverage (UHC) are to ensure that all people can access quality health services, to safeguard all people from public health risks, and to protect all people from impoverishment due to illness, whether from out-of-pocket payments for health care or loss of income when a household member falls sick. Countries as diverse as Brazil, France, Japan, Thailand, and Turkey have shown how UHC can serve as a vital mechanism for improving the health and welfare of their citizens and lay the foundation for economic growth and competitiveness grounded in the principles of equity and sustainability. Ensuring universal access to affordable, quality health services will be an important contribution to ending extreme poverty by 2030 and boosting shared prosperity in low-income and middle-income countries, where most of the world's poor live. Universal Health Coverage for Inclusive and Sustainable Development synthesizes the experiences from 11 countries: Bangladesh, Brazil, Ethiopia, France, Ghana, Indonesia, Japan, Peru, Thailand, Turkey, and Vietnam in implementing policies and strategies to achieve and sustain UHC. These countries represent diverse geographic and economic conditions, but all have committed to UHC as a key national aspiration and are approaching it in different ways. The book examines the UHC policies for each country around three common themes: (1) the political economy and policy process for adopting, achieving, and sustaining UHC; (2) health financing policies to enhance health coverage; and (3) human resources for health policies for achieving UHC. The findings from these country studies are intended to provide lessons that can be used by countries aspiring to adopt, achieve, and sustain UHC. Although the path to UHC is specific to each country, countries can benefit from the experiences of others in learning about different approaches and avoiding potential risks.

*Austere Histories in European Societies* Bloomsbury Publishing USA

'This is more than a richly detailed story about the hubris, corruption and incompetence that doomed Credit Suisse; it's a stark warning to all of us about what happens when we let bankers do what they like' - Oliver Bullough, bestselling author of *Butler to the World* --- For centuries, Swiss banks have served the globe's wealthiest individuals, employing a strict culture of anonymity and gaining massive wealth in the process. But when Credit Suisse collapsed, the veil of secrecy came down and the world was suddenly privy to the corruption, scandal and empty hubris that keep our biggest banks alive. It was a 166-year-old bastion of Swiss banking, amongst the most important and influential financial institutions in the world - but a veneer of high-class service disguised a darker, dirtier reality. From its sterile Zurich headquarters, the bank catered to a clientele that included dictators, drug dealers and former Nazi officers, and helped fleece its own clients out of billions of dollars. This continued for decades, even as Credit Suisse continued to expand, acquiring smaller banks and granting its own executives lucrative bonus contracts. Meltdown is the story of how the house of cards fell apart. Bloomberg investigative journalist and bestselling author of *Pyramid of Lies* Duncan Mavin takes readers inside the bank's hushed marble corridors, detailing its secretive culture and the series of increasingly selfish decisions, made by a handful of men at the top, which ultimately led to disaster. This is the fascinating history of one of the biggest financial institutions of our times - and a thrilling exposé of the wider financial services sector - which promises to give readers a shocking and brutally honest look into a previously-unknown world of greed, lies and unrelenting human ambition. --- "A riveting autopsy of how one of banking's titans gradually, then suddenly, crumbled under the weight of its own misdeeds" - Bradley Hope, New York Times bestselling author of *Billion Dollar Whale* and *Blood and Oil* "This financial thriller of a book offers a tantalising glimpse into the rot at the heart of one of the world's most powerful banks" - Parmy Olson, bestselling author of *We Are Anonymous* and *Supremacy* "We're used by now to bankers behaving badly, but Duncan Mavin takes it to another shocking, anger-inducing level. Credit Suisse stood for propriety, but he shows this to be a total fabrication" - Chris Blackhurst, former editor of *The Independent* and bestselling author of *Too Big to Jail* "A gripping story of power, greed and panic, and a humbling reminder of the enormous cost of capitalism going awry" - Josie Cox, author of *Women, Money and Power*

*Oswaal CBSE Sample Question Papers Class 11 Accountancy Book (For 2024 Exams) | 2023-24 CQ Press*

Success in Accounting begins here! The technical details you need to know and decision-making processes you need to understand, with plain-language explanations and unlimited practice. Financial Accounting is an engaging resource that focuses on current accounting theory and practice in Australia, within a business context. It emphasises how financial decision-making is based on accurate and complete accounting information and uses case studies to illustrate this in a practical way. The new 7th edition is accurate and up to date, guided by extensive technical review feedback and incorporating the latest Australian Accounting Standards. It also provides updated coverage of some of the most significant current issues in accounting such as ethics, information systems and sustainability.

**Oswaal CBSE 10 Years' Solved Papers Class 12 Science PCM - English Core | Physics | Chemistry & Mathematics Book For 2025 Board Exam** Stanford University Press

In recent years European states have turned toward more austere political regimes, entailing budget cuts, deregulation of labour markets, restrictions of welfare systems, securitization of borders and new regimes of migration and citizenship. In the wake of such changes, new forms of social inclusion and exclusion appear that are justified through a reactivation of differences of race, class and gender. Against this backdrop, this collection investigates contemporary understandings of history and cultural memory. In doing so, the reader will join the leading European contributors of this title in examining how crisis and decline in contemporary Europe trigger a selective forgetting and remodelling of the past. Indeed, *Austere Histories in European Societies* breaks new paths in scholarship by synthesising and connecting current European debates on migration, racism and multiculturalism. In addition to this, the authors present debates on cultural memory and the place of the colonial legacy within an extensive comparative framework and across the boundaries of the humanities and social sciences. This book will appeal to scholars and students across the social sciences and humanities, particularly in European studies, memory studies, sociology, postcolonial studies, migration studies, European history, cultural policy, cultural heritage, economics and political theory.

**Mobility, Modernity and the Slum** ISEAS - YUSOF ISHAK INSTITUTE

A psychiatrist puts leadership "on the couch," with a provocative exploration of its crucial, often ignored, psychological and personal character foundations. Elias Aboujaoude's distinctive

exploration of leadership provides unusual insight into understanding who should and should not be striving for leadership positions. Dr Aboujaoude takes on the culture at large, explaining how our cult-like obsession with leadership gives narcissists an edge and results in leadership failure everywhere we look—and how resisting the imperative to rise at all costs can leave many with an inferiority complex. His takedown of the "leadership industrial complex," an unholy alliance of gurus, coaches, business school professors, and TED-talkers, from Harvard on down, pokes a very sharp elbow into an industry seemingly united in a modern form of alchemy to create leadership gold—a waste of time, money, and effort, since leadership cannot be taught through books or coaching and cannot be bought. Rather, Dr Aboujaoude vividly illustrates, leaders emerge from a unique combination of personal, psychological, and situational factors that may not be easily controlled. To a large degree, great leaders are born, or happen, with the help of innate temperament, talent, opportunity, circumstances, and timing. Frank and unflinching, this refreshing take on a classic subject, with its focus on the art of knowing yourself, provides new insight into whether your psychology is aligned with the requirements of effective and happy leadership. The effect is to empower readers to understand themselves and step up if they have what it takes to lead—or find equally rewarding, often superior, ways to achieve fulfillment and leave their mark if they don't.

*Zimbabwe's International Relations* Oswaal Books

The text and images in this book are in grayscale. A hardback color version is available. Search for ISBN 9781680922929. Principles of Accounting is designed to meet the scope and sequence requirements of a two-semester accounting course that covers the fundamentals of financial and managerial accounting. This book is specifically designed to appeal to both accounting and non-accounting majors, exposing students to the core concepts of accounting in familiar ways to build a strong foundation that can be applied across business fields. Each chapter opens with a relatable real-life scenario for today's college student. Thoughtfully designed examples are presented throughout each chapter, allowing students to build on emerging accounting knowledge. Concepts are further reinforced through applicable connections to more detailed business processes. Students are immersed in the "why" as well as the "how" aspects of accounting in order to reinforce concepts and promote comprehension over rote memorization.

*CPC and Various Case Reports in Neurology* World Bank Publications

Third party conception is a growing phenomenon and provokes a burgeoning range of ethical, legal and social questions. What are the rights of donors, recipients and donor conceived children? How are these reproductive technologies regulated? How is kinship understood within these new family forms? Written by specialists from three different continents, *Transnationalising Reproduction* examines a broad range of issues concerning kinship and identity, citizenship and regulation, and global markets of reproductive labour; including gamete donation and gestational surrogacy. Indeed, this book seeks to highlight how reproductive technologies not only makes possible new forms of kinship and family formations, but also how these give rise to new, ethical, political and legal dilemmas about parenthood as well as new modes of discrimination and a re-distribution of medical risks. It also thoroughly investigates the ways in which a commodification of reproductive tissue and labour affects the practices, representations and gendered self-understandings of gamete donors, fertility patients and intended parents in different parts of the world. With a broad geographical scope, *Transnationalising Reproduction* offers new empirical and theoretical perspectives on third-party conception and demonstrates the need for more transnational approaches to third-party reproduction. This volume will appeal to postgraduate students and postdoctoral researchers interested in fields such as Gender Studies, Health Care Sciences, Reproductive Technology and Medical Sociology.

This book brings together fifteen contributions from presenters at the 25th IUPAC International Conference on Chemistry Education 2018, held in Sydney. Written by a highly diverse group of chemistry educators working within different national and institutional contexts with the common goal of improving student learning, the book presents research in multiple facets of the cutting edge of chemistry education, offering insights into the application of learning theories in chemistry combined with practical experience in implementing teaching strategies. The chapters are arranged according to the themes novel pedagogies, dynamic teaching environments, new approaches in assessment and professional skills - each of which is of substantial current interest to the science education communities. Providing an overview of contemporary practice, this book helps improve student learning outcomes. Many of the teaching strategies presented are transferable to other disciplines and are of great interest to the global community of tertiary chemistry educators as well as readers in the areas of secondary STEM education and other disciplines.

*Financial Accounting* Springer

Only virtuous humans are supposed to move in time to meet their happy destiny or karma. The tale of Jamal in *Slumdog Millionaire* is such a case of serendipitous mobility towards riches and love - a 'journey' in which good heroes and urban communities respecting solidarity are successfully modernised. Unsurprisingly, the film became tangled in many controversies around India's destiny in the world: the film inserted Mumbai into various financial, political and artistic scenes, increased tourism in its filmed slums, and brought about charity projects in which celebrities and tourist businesses were involved. *Slumdog Millionaire* served as a global example of a 'developing country's' uneven but unique modernisation. This book examines such mobilities of ideas, art, tourism and activism together. In doing so, it reveals the significance of Mumbai as a post-colonial city in discussions of modernity - a form of mobile adaptation to new world realities. Tzanelli examines the various agents involved in controversies through multiple virtual and real journeys to India's colonial history and present social complexity, with a view to actualise a post-colonial future, a 'destiny' as the country's serendipitous destination. Addressed to interdisciplinary audiences, the book will be a useful text for students and scholars of globalisation, mobility, tourism, media and social movement theory.
