 "Base Strength: Program Design Blueprint" condenses over 100 years of strength training wisdom into one simple and concise book. Chapter One starts by building a crucial understanding of the relationship between stress and adaptation. Then, we cover the topic of stagnation, identifying the few big factors that cause progress to stop before breaking down the specific steps to preventing plateaus. "Base Strength" includes clear instructions on scheduling workout splits, clarifies the exact methods of weekly progression (with dozens of examples for squat, bench press and deadlift), gives multiple callbacks and comparisons to other popular programs and concludes with 10 example programs, each one completely fleshed out with main exercises, accessory work and progressions for both Base and Peak phases. There is also an added BONUS chapter on programming for Strongman events that work just as well for GPP and general sports conditioning as they have for my preparation for World's Strongest Man.

"10-Minute Toughness is a solid mental training program. In fact I feel it is the best of its kind. . . . [It's] what the title says: ten minutes a day that connects your talents and abilities to the outcome you're seeking. As a retired NFL player looking forward, I can see as many applications for the toughness Jason Selk's program brought out of me in the business world as there were on the football field." --Jeff Wilkins, Former NFL Pro Bowl Kicker
 "The mental side of the game is extremely important. 10-Minute Toughness helps the players develop the mental toughness needed for success; it really makes a difference." --Walt Jocketty, General Manager of the 2006 World Champion St. Louis Cardinals
 "Jason Selk has spent a tremendous amount of time and energy developing effective mental-training programs and coaches workshops. He is truly committed to helping individuals and teams to perform at their very best, when it really counts." --Peter Vidmar, Olympic Gold Medalist
 Mental training is a must for high performance both on the field and off. But simply hoping for mental toughness isn't going to build any mind muscles. You need a proven routine of daily exercises to get you where you want to go. 10-Minute Toughness is your personal coach for boosting brainpower and achieving a competitive edge in whatever game you play. With quickness and ease, you'll learn how to master your own mind and psych out your opponents using personalized techniques from one of America's most successful sport psychology consultants. Like no other program available, the 10-Minute Toughness (10-MT) routine gets you ready for the competition in just ten minutes a day.

The ball handler who fakes and then drives past a defender for an easy score. A pass rusher who leaves a would-be blocker in his wake on the way to sacking the quarterback. A setter who manages to maneuver both body and ball in the blink of an eye to make the perfect pass for the kill and match-winning point. These are all reasons agility and quickness are such prized physical attributes in modern sport. Efforts to become markedly quicker or more agile, however, aren't always successful. Genetic limitations, technical deficiencies, and inferior training activities are among the major obstacles. *Developing Agility and Quickness* helps athletes blow past those barriers thanks to the top sport conditioning authority in the world, the National Strength and Conditioning Association. NSCA hand-picked its top experts to present the best training advice, drills, and programs for optimizing athletes' linear and lateral movements. Make *Developing Agility and Quickness* a key part of your conditioning program, and get a step ahead of the competition.

In *The New Rules of Lifting for Women*, authors Lou Schuler, Cassandra Forsythe and Alwyn Cosgrove present a comprehensive strength, conditioning and nutrition plan destined to revolutionize the way women work out. All the latest studies

prove that strength training, not aerobics, provides the key to losing fat and building a fit, strong body. This book refutes the misconception that women will "bulk up" if they lift heavy weights. Nonsense! It's tough enough for men to pack on muscle, and they have much more of the hormone necessary to build muscle: natural testosterone. Muscles need to be strengthened to achieve a lean, healthy look. Properly conditioned muscles increase metabolism and promote weight loss -- it's that simple. The program demands that women put down the "Barbie" weights, step away from the treadmill and begin a strength and conditioning regime for the natural athlete in every woman. *The New Rules of Lifting for Women* will change the way women see fitness, nutrition and their own bodies.
