 The secret to planning a deeply personal and meaningful wedding has nothing to do with budget. It's about creating a celebration that reflects a couple's core values. Translating those values is the work of *Modern Wedding*, an information-filled guide with hundreds of creative ideas and beautiful, inspiring photographs for readers to look at and say, "This feels like

us." The book unpacks every element of a wedding—stationery, attire, seating plans, flowers and tablescapes, food and drink, gifts—with examples that will appeal to couples who care about how things are made but are not overly influenced by trends. The emphasis is on natural surroundings, seasonal flowers and food, modern dresses, minimalist ceremony structures, and naked cakes. Photographs of real weddings—"case studies" like a destination fete in Tuscany, a house party in Brooklyn, and a New Agey revel in Kauai—show how all the pieces can come together into a unique and expressive whole. Extensive practical information and resources give readers access to all the help they need for their own unique celebration.

At Dwell, we're staging a minor revolution. We think that it's possible to live in a house or apartment by a bold modern architect, to own furniture and products that are exceptionally well designed, and still be a regular human being. We think that good design is an integral part of real life. And that real life has been conspicuous by its absence in most design and architecture magazines.

A global survey of Pop art that reassesses its roots, impact, and legacy This groundbreaking book surveys the concurrent engagements with the spirit of Pop throughout the world, from the frequently studied activity in the United States, England, and France to less well-known developments in Central and Eastern Europe, Latin America, Asia, Africa, and the Middle East. One of the first publications to examine Pop art with this global scope, The World Goes Pop explores the wide-ranging movements that developed on different continents, such as Nouveau Réalisme, Neo Dada, New Figuration, and Spiritual Pop. This unique

presentation offers the opportunity to compare how Pop art around the world differed due to geography, local traditions, and different cultures' social and political underpinnings. Fascinating essays touch upon key themes that factored into various Pop movements, including feminism, political representation, sexual politics, and seriality. A bold design and 200 striking illustrations showcase pieces by more than 60 artists, many of whose works have never been exhibited outside their home nations. The book also features a combined interview with a number of the living artists featured within, giving important insight into the thoughts and processes of Pop's international practitioners.

Drawing Futures brings together international designers and artists for speculations in contemporary drawing for art and architecture. Despite numerous developments in technological manufacture and computational design that provide new grounds for designers, the act of drawing still plays a central role as a vehicle for speculation. There is a rich and long history of drawing tied to innovations in technology as well as to revolutions in our philosophical understanding of the world. In reflection of a society now underpinned by computational networks and interfaces allowing hitherto unprecedented views of the world, the changing status of the drawing and its representation as a political act demands a platform for reflection and innovation. Drawing Futures will present a compendium of projects, writings and interviews that critically reassess the act of drawing and where its future may lie. Drawing Futures focuses on the discussion of how the field of drawing may expand synchronously alongside technological and computational developments. The book coincides with an international conference of the same name, taking place at The Bartlett School of Architecture, UCL, in November 2016. Bringing together practitioners from many creative fields, the book discusses how drawing is changing in relation to new technologies for the production and dissemination of ideas.

With rich photography, expert voice, and taste-making style, Martha Stewart Weddings—a brand-new volume, the first in nearly two decades—is at once a guide to and inspiration for planning a wedding. Since the debut of Martha Stewart Weddings in 1995, it has been the premier resource for couples looking to plan and personalize their big day. To coincide with the brand's 20th anniversary, the magazine's team of experts has compiled a comprehensive guide to their distinctive way of creating a customized celebration. It's packed with the original ideas, real-wedding photographs, and tried-and-true advice for which the brand has become known. From the engagement to the day itself, every detail is covered. Readers will learn what goes into making a "Martha" wedding, which includes dreaming up a cohesive theme and color palette, as well as finding a dress and suit, registering for gifts, enjoying showers and bachelor(ette) parties, hiring vendors, choosing the flowers and cake, and orchestrating a sweet send-off for the evening. With 300 full-color photographs, Martha Stewart Weddings will be the most gorgeous and practical wedding book on the market and a keepsake for every bride.

"A groundbreaking history of digital design from the nineteenth century to today Digital design has emerged as perhaps the most dynamic force in society, occupying a fluid, experimental space where product design intersects with art, film, business, engineering, theater, music, and artificial intelligence. Stephen Eskilson traces the history of digital design from its precursors in the nineteenth century to its technological and cultural ascendancy today, providing a multifaceted account of a digital revolution that touches all aspects of our lives. We live in a time when silicon processors, miniaturization, and CAD-enhanced 3D design have transformed the tangible world of cars and coffee makers as well as the screen world on our phones, computers, and game systems. Eskilson provides invaluable historical perspective to help readers better understand how digital design has become such a vibrant feature of the contemporary landscape. Along the way, he paints compelling portraits of key innovators behind this

transformation, from foundational figures such as Marshall McLuhan, Nam June Paik, and April Greiman to those mapping new frontiers, such as Sepandar Kamvar, Jeanne Gang, Karim Rashid, Neri Oxman, and Jony Ive. Bringing together an unprecedented array of sources on digital design, this comprehensive and richly illustrated book reveals how many of the digital practices we think of as the cutting-edge actually originated in the analog age and how the history of digital design is as much about our changing relationship to forms as the forms themselves"--

"One of the most versatile artists of the modern era, Isamu Noguchi explored many areas of art and design. Both Isamu Noguchi: Master Sculptor and the exhibition of the same name, which this book accompanies, focus on his sculpture as the nexus of his creativity. From the late 1920s through the mid-1980s, Noguchi changed direction frequently and delighted in exploring diametrically opposed ideas and styles. In her essay, Valerie J. Fletcher examines Noguchi's use of many different materials and explores the reasons underlying his diverse practice. Situating his sculptures within their historical and art-historical contexts, Dr. Fletcher seeks to dispel the previous limited interpretation of Isamu Noguchi as a Japanese American artist, instead redefining him as one of the first truly global artists of the modern era. Noguchi worked in modes inspired by many cultural sources - he became familiar with utopian ideals while working in Paris, studied traditional calligraphic drawing in Beijing, and learned to model clay sculptures in Kyoto. During World War II, the rise of anti-Japanese sentiment precipitated a period of seclusion and introspection. He adopted some of the principles of Surrealism and created the remarkable Lunars, which have rarely been seen, followed by his delicate, interlocking compositions in slabs of slate and marble. After the war Noguchi again traveled around the world, finding inspiration in monuments of all kinds, ranging from Stonehenge in England to Hindu architecture in India. From the 1960s onward, Noguchi maintained studios in the United States and in Japan, while also working on garden environments and urban monuments in many cities. In his late sculptural works he achieved subtle and sophisticated syntheses of nature with artifice, the

organic with the geometric, intuition with intellect. His sculptures express his passionate conviction that art can enrich ordinary lives and transcend national, religious, and ethnic barriers." --
