Published in 1789, this three-volume

botanical catalogue of plants in cultivation
at Kew sheds light on the history of
horticulture.

*The Wild Flora of Kew Gardens: A
cumulative checklist from 1759 details all
plants that have ever been recorded
growing in a wild state within the Gardens
or its periphery (including the towpath,
Kew Green and Old Deer Park), and all
natives cultivated in formal beds or other
plantings, either currently or in the past,*

for which there is reliable documentation,
dating back to the first record of 1759.
Nearly 2,000 taxa are included, with
citation of literature records and
herbarium specimens and accompanying
colour photographs. The book notes the
past and present distribution of wild
species within the Gardens, and
demonstrates the extent to which the wild
flora of the Kew estate has changed over
its 250 years.
