The European
discovery of the
Americas in 1492 was
one of the most
important events of the
Renaissance, and with
it Christopher
Columbus changed the
course of world history.
Now, five hundred
years later, this 2-
volume reference work
will chart new courses
in the study and
understanding of
Columbus and the Age
of Discovery. Much
more than an account
of the man and his
voyages, The
Christopher Columbus
Encyclopedia is a

complete A-Z look at
the world during this
momentous era. In two
volumes, The
Christopher Columbus
Encyclopedia contains
more than 350 signed
original articles ranging
from 250 to more than
10,000 words, written
by nearly 150
contributors from
around the world. The
work includes cross-
references,
bibliographies for each
article, and a
comprehensive index.
The work is fully
illustrated, with
hundreds of maps,
drawings and
photographs.

Volume 10 examines
how the innovative
impulses that came
from Italy were

creatively merged with indigenous traditions and how many national variants of Futurism emerged from this fusion. Ten essays investigate various aspects of Italian Futurism and its links to Austria, Georgia, France, Hungary and Portugal and in fields such as Typography, Olfaction, Photography. Section 2 examines seven examples of caricatures and satires of Futurism in the contemporary press, followed by Section 3, reporting on the Archiv der Avantgarden (AdA) in Dresden. Section 4 communicates bibliographic details of 120 book publications on Futurism in the period 2017-2020, including exhibition catalogues, conference proceedings and editions.

Pessoa's Geometry of the Abyss Springer
"Fernando Pessoa wrote prolifically in many genres until his untimely death in 1935, and he has long been widely recognized as Portugal's most influential twentieth century writer. The publication of the Book of Disquiet in 1982, however, caused a seismic change in the appreciation of his work and its place in Modernism. In that great and vast collection of fragments, Pessoa firmly established his place among the canon of European modernists and radically

questioned many of Modernity's assumptions. Alain Badiou, for example, has argued that philosophers are not yet able to assimilate Pessoa's thinking. Paulo de Medeiros's new study, one of the first to be dedicated to the Book of Disquiet, takes up that challenge, exploring the text's connections with photography, film, politics and textuality itself, and developing comparisons with D. H. Lawrence, Walter Benjamin, and Franz Kafka. Paulo de Medeiros is Professor of Modern and Contemporary World Literatures in the Department of English and Comparative Literary Studies at the University of Warwick."
