This practical and research-based introduction to current and effective English grammar instruction gives pre-service and in-service teachers and teacher educators a strong foundation for teaching second language grammar and helps them develop their professional knowledge and skills. Written in a highly readable style for an international audience, it provides a thorough and rounded overview of the principles, strategies, techniques, and applications currently dominant in teaching L2 grammar in a range of instructional settings around the world. Chapter authors are world-class authorities in grammar and grammar teaching and learning. All chapters are based on theoretical frameworks and/or research foundations with a strong emphasis on practical applications and implications for classroom teaching, and highlight teaching methods, key concepts, and terminology associated with grammar instruction. Illuminating the options and choices in grammar teaching from a contemporary perspective, *Teaching English Grammar to Speakers of Other Languages* is ideal as key text for students in undergraduate and graduate MA-TESOL programs and as a resource for

practicing ESL/EFL teachers, teacher educators, and teaching faculty.

Every business day, courts throughout the United States render decisions that together affect many thousands of people. Some affect only the parties to a particular legal action, but others adjudicate rights, benefits, and legal principles that have an impact on all Americans. This book surveys that system. Much of the discussion explains

how U.S. courts are organized and how they work. This introduction seeks to familiarize readers with the basic structure and vocabulary of American law, and afford a sense of how the U.S. legal system has evolved to meet the needs of a growing nation and its ever more complex economic and social realities.

These Proceedings represent the work of contributors to the 14th European Conference on e-Learning, ECEL 2015, hosted this year by the University of Hertfordshire, Hatfield, UK on 29-30 October 2015. The Conference and Programme Co-Chairs are Professor Amanda Jefferies and Dr Marija Cubric, both from the University of Hertfordshire. The conference will be opened with a keynote address by Professor Patrick McAndrew, Director, Institute of Educational Technology, Open University, UK with a talk on "Innovating for learning: designing for the future of education." On the second day the keynote will be delivered by Professor John Traxler, University of Wolverhampton, UK on the subject of "Mobile Learning - No Longer Just e-Learning with Mobiles." ECEL provides a valuable platform for individuals to present their research findings, display their work in progress and discuss conceptual advances in many different branches of e-Learning. At the same time, it provides an important opportunity for members of the EL community to come together with peers, share knowledge and exchange ideas. With an initial submission of 169 abstracts, after the double blind, peer review process there are 86 academic papers, 16 Phd Papers, 5 Work in Progress papers and 1 non academic

papers in these Conference Proceedings. These papers reflect the truly global nature of research in the area with contributions from Algeria, Australia, Austria, Belgium, Botswana, Canada, Chile, Cov-entry, Czech Republic, Denmark, Egypt, England, Estonia, France, Germany, Ireland, Japan, Kazakhstan, New Zealand, Nigeria, Norway, Oman, Portugal, Republic of Kazakhstan, Romania, Saudi Arabia, Scotland, Singapore, South Africa, Sweden, the Czech Republic, Turkey, Uganda, UK, United Arab Emirates, UK and USA, Zimbabwe. A selection of papers - those agreed by a panel of reviewers and the editor will be published in a special conference edition of the EJEL (Electronic Journal of e-Learning [www.ejel.org](http://www.ejel.org) ).

Although polls of Hispanic youth show a strong propensity to serve in the military, Hispanics are nonetheless underrepresented among military recruits. The authors discuss the major characteristics that disproportionately disqualify Hispanic youth and explore actions that could be taken to increase Hispanic enlistments.

Introducing English Grammar introduces  
 readers to the methodology and  
 terminology needed to analyse English  
 sentences. The approach taken is in line  
 with current research in grammar, a  
 particular advantage for students who  
 may go on to study syntax in more  
 depth. All the examples and exercises  
 use real language taken from both  
 standard and non-standard geographical  
 areas and dialects, and include excerpts  
 from Australian and British newspaper  
 articles. Students are encouraged to  
 think about the terminology as a tool kit  
 for studying language and to test what  
 can and cannot be described using these  
 tools. This new edition has been fully  
 updated and features: an expanded  
 introduction; new texts and exercises  
 that include data from social media;  
 revised material on 'Grammar at work'  
 and 'English worldwide'; more  
 suggestions for further reading at the  
 end of the book; a brand new companion  
 website with extensive further reading  
 and answers to the exercises, which can  
 be found at  
[www.routledge.com/cw/borjars](http://www.routledge.com/cw/borjars). Written  
 for readers with no previous experience

of grammatical analysis, Introducing  
 English Grammar is suited to anyone  
 beginning a study of linguistics, English  
 language or speech pathology, as well as  
 to students whose interests are primarily  
 literary but who need a better  
 understanding of the structure of  
 English.

Language is perhaps the most common  
 issue that surfaces in debates over  
 school reform, and plays a vital role in  
 virtually everything we are involved. This  
 edited volume explores linguistic  
 apartheid, or the disappearance of  
 certain languages through cultural  
 genocide by dominant European  
 colonizers and American  
 neoconservative groups. These groups  
 have historically imposed hegemonic  
 languages, such as English and French,  
 on colonized people at the expense of  
 the native languages of the latter. The  
 book traces this form of apartheid from  
 the colonial era to the English-only  
 movement in the United States, and  
 proposes alternative ways to counter  
 linguistic apartheid that minority groups  
 and students have faced in schools and  
 society at large. Contributors to this  
 volume provide a historical overview of  
 the way many languages labeled as  
 inferior, minority, or simply savage have  
 been attacked and pushed to the  
 margins, discriminating against and  
 attempting to silence the voice of those  
 who spoke and continue to speak these  
 languages. Further, they demonstrate  
 the way and the extent to which such  
 actions have affected the cultural life,  
 learning process, identity, and the  
 subjective and material conditions of  
 linguistically and historically  
 marginalized groups, including students.

*Research in Education* Rand Corporation  
For the first time, this book explores the role of foreign languages in military alliances, in occupation and in peace building, through detailed case studies from Ireland, Britain, France, Finland, Slovenia, Korea, Bosnia and Cyprus, ranging from the eighteenth century until today. It adopts a multidisciplinary perspective, bringing together academic researchers and practitioners – from the military, and from the museum and interpreting worlds. The book raises key issues about communication, identity and representation in war, and argues that the complex linguistic dimensions of conflict and peace operations are of major relevance to military planners, civilian agencies, museums and the media.

*Readings in African American Language: Aspects, Features, and Perspectives, Volume 2* brings together scholars who research various theoretical approaches of the origin, characteristics, and development of African American Vernacular English (AAVE). The advantages of AAVE, codeswitching, dialect interference in writing, theories, and politics in AAVE, text analysis, and critical pedagogy all are discussed in this volume. Each article provides a different perspective attesting to the vitality and relevance of African American language as an academic, social, and cultural/linguistic entry in the field of language studies.

This is the first hands-on methods guide for second-language (L2) reading research. The authors expertly and critically situate L2 reading and literacy

as a multivariate, interactive process and define terms, concepts, and research tools in connection with theory and a rich body of past empirical work, with lessons to learn and pitfalls to avoid. They concretely detail how to design empirical studies, collect data, and analyze findings in this important area. Authored by world experts on first-language (L1) and L2 reading, this book provides a comprehensive, critical, theory-driven review of methods in L2 reading research, offering a step-by-step guide from research design to study execution and data analysis. With useful pedagogical features and a unique database of L2 reading studies from around the world over three decades, this will be an invaluable resource to students and researchers of second-language acquisition, applied linguistics, education, and related areas.
