How has the regulation of business shifted from national to global institutions? What are the mechanisms of globalization? Who are the key actors? What of democratic sovereignty? In which cases has globalization been successfully resisted? These questions are confronted across an amazing sweep of the critical areas of business regulation--from contract, intellectual property and corporations law, to trade, telecommunications, labor standards, drugs, food, transport and environment. This book examines the role played by global institutions such as the World Trade Organization, World Health Organization, the OECD, IMF, Moodys and the World Bank, as well as various NGOs and significant individuals. Incorporating both history and analysis, Global Business Regulation will become the standard reference for readers in business, law, politics, and international relations.

This authoritative new handbook offers a comprehensive and cutting-edge overview of the state of the medical humanities globally, showing how clinically oriented medical humanities, the critical study of medicine as a global historical and cultural phenomenon, and medicine as a force for cultural change can inform each other. Composed of eight parts, the Routledge Handbook of the Medical Humanities looks at the medical humanities

as: a network and system therapeutic provocation forms of resistance a way of reconceptualising the medical curriculum concerned with performance and narrative mediated by artists as diagnosticians of culture through public engagement. This book describes how the medical humanities can be used in and out of clinical settings, acting as a point of resistance, redistributing medicine's capital amongst its stakeholders, embracing the complexity of medical instances, shaping medical education, promoting interdisciplinary understandings and recognising an identity for the medical humanities as a network effect. This book is an essential read for all students, scholars and practitioners with an interest in the medical humanities.

Routledge Handbook of the Medical Humanities Cambridge University Press

Corruption is a threat to democracy and economic development in many societies. It arises in the ways people pursue, use and exchange wealth and power, and in the strength or weakness of the state, political and social institutions that sustain and restrain those processes. Differences in these factors, Michael Johnston argues, give rise to four major syndromes of corruption: Influence Markets, Elite Cartels, Oligarchs and Clans, and Official Moguls. In this 2005 book, Johnston uses statistical measures to identify societies in each group, and case studies to show that the expected syndromes do arise. Countries studied include the United States, Japan and Germany (Influence Markets); Italy, Korea and Botswana (Elite Cartels); Russia, the Philippines and Mexico (Oligarchs and Clans); and China, Kenya, and Indonesia (Official Moguls). A concluding chapter explores reform, emphasising the ways familiar measures should be applied - or withheld, lest they do harm - with an emphasis upon the value of 'deep democratisation'.

Electric Machinery Fundamentals John Wiley & Sons

Oil to Cash explores one option to help countries with new oil revenue avoid the so-called resource curse: just give the money directly to citizens. A universal, transparent, and regular cash transfer would not only provide a concrete benefit to regular people, but would also create powerful incentives for citizens to hold their government accountable. Oil to Cash details how and where this idea could work and how policymakers can learn from the experiences with cash transfers in places like Mexico, Mongolia, and Alaska.

Return to a Sexy Island Springer

Now available for the first time—more than 50 years after it was written—is the memoir of Michael Dillon/Lobzang Jivaka (1915–62), the British doctor and Buddhist monastic novice chiefly known to scholars of sex, gender, and sexuality for his pioneering transition from female to male between 1939 and 1949, and for his groundbreaking 1946 book *Self: A Study in Ethics and Endocrinology*. Here at last is Dillon/Jivaka's extraordinary life story told in his own words. Out of the Ordinary captures Dillon/Jivaka's various journeys—to Oxford, into medicine, across the world by ship—within the major narratives of his gender and religious journeys. Moving chronologically, Dillon/Jivaka begins with his childhood in Folkestone, England, where he was raised by his spinster aunts, and tells of his days at Oxford immersed in theology, classics, and rowing. He recounts his hormonal transition while working as an auto mechanic and fire watcher during World War II and his surgical transition under Sir Harold Gillies while Dillon himself attended medical school. He details his worldwide travel as a ship's surgeon in the British Merchant Navy with extensive commentary on his interactions with colonial and postcolonial subjects, followed by his "outing" by the British press while he was serving aboard *The City of Bath*. Out of the Ordinary is not only a salient record of an early sex transition but also a unique account of religious conversion in the mid-twentieth century. Dillon/Jivaka chronicles his gradual shift from Anglican Christianity to the esoteric spiritual systems of George Gurdjieff and Peter Ouspensky to Theravada and finally Mahayana Buddhism. He concludes his memoir with the contested circumstances of his Buddhist monastic ordination in India and Tibet. Ultimately, while Dillon/Jivaka died before becoming a monk, his novice ordination was significant: It made him the first white European man to be ordained in the Tibetan Buddhist tradition. Out of the Ordinary is a landmark publication that sets free a distinct voice from the history of the transgender movement.

"Hollywood Drive: What it Takes to Break in, Hang in & Make it in the Entertainment Industry is the essential guide to starting and succeeding at a career in film and TV. Written by a Hollywood insider, Eve Honthaner's invaluable advice will give those attempting to enter and become successful in the entertainment industry the edge they need to stand out among the intense competition." "Hollywood Drive goes beyond what it takes to get you foot in the door by offering you the tools, attitude, philosophy and road map you'll need to give yourself a good fighting chance at success - whether you're looking for you very first job or for a strategy to move your career to the next level. This book will allow you to proceed with your eyes wide open, knowing exactly what to expect."

The Text Mining Handbook Routledge

A commanding survey of the world economy from 1950 to the present, from the author of the acclaimed *The Boom and the Bubble*.

Oil to Cash McGraw Hill Professional

First published in 1984, this book examines corporate crime in the pharmaceutical industry. Based on extensive research, including interviews with 131 senior executives of pharmaceutical companies in the United States, the United Kingdom, Australia, Mexico and Guatemala, the book is a major study of white-collar crime. Written in the 1980s, it covers topics such as international bribery and corruption, fraud in the testing of drugs and criminal negligence in the unsafe manufacturing of drugs. The author considers the implications of his findings for a range of strategies to control corporate crime, nationally and internationally.

Sixty Second Lottery Formulas! Gail Howards Lottery Winning Systems turns a game of luck into a game of skill. It takes less than a minute to apply any one of the 12 easy-to-use 60-second formulas in this book. Choose more than six lotto numbers and place them in the corresponding lettered boxes and your numbers are magically (mathematically) combined into the correct combinations to give a specific win guarantee. As with all of Gail Howard's wheeling systems, there is no easier way to combine your lotto numbers. So simple a child can do it. Fast and easy to use as A-B-C!

Included is a secret weapon that won six jackpots worth a combined total of \$20 million dollars...also a scientific system that won a \$9.48 million dollar California Lotto jackpot. These systems can be used for any pick-6 lotto game in the world. --Smart Luck Publishers

Corporate Crime in the Pharmaceutical Industry (Routledge Revivals) Pearson Higher Ed

Health Informatics (HI) focuses on the application of Information Technology (IT) to the field of medicine to improve individual and population healthcare delivery, education and research. This extensively updated fifth edition reflects the current knowledge in Health Informatics and provides learning objectives, key points, case studies and references.

Manual on Environmental Management for Mosquito Control Createspace Independent Pub

Singapore got sexy and the country's best-selling author got jealous. After five years chasing echidnas and platypuses in Australia, Neil Humphreys returns to Singapore to see if the rumours are true. Like an old girlfriend getting a lusty makeover, the island transformed while Humphreys was away. Singapore is not just a sexier island, it's a different world. So Humphreys embarked upon a nationwide tour to test that theory. He went in search of new Singapore, visiting only locations that either did not exist five years ago or had been extensively rebuilt, renovated or revamped in his absence. From the cloud-topped heights of Marina Bay Sands and Pinnacle@Duxton to making ill-advised bomb jokes at the subterranean tunnels of Labrador Park, Humphreys walks, cycles, kayaks and swims across a rapidly evolving country, meeting Guinness-swigging aunts in Resorts World Sentosa, eccentric toy museum owners in Bugis, political activists in Aljunied and a security guard at Marina Barrage ready to 'tekan' anyone who

crosses his path. In new Singapore, Humphreys discovers a country still grappling between the economic rewards of progress at Biopolis and Fusionopolis and the historical cost at Bukit Brown Cemetery.

The Illustrated London News Cambridge University Press

Languages are not only tools of communication, they also reflect a view of the world. Languages are vehicles of value systems and cultural expressions and are an essential component of the living heritage of humanity. Yet, many of them are in danger of disappearing. UNESCO's Atlas of the World's Languages in Danger tries to raise awareness on language endangerment. This third edition has been completely revised and expanded to include new series of maps and new points of view.

Bureaucrats in Business Penguin

This book is an introduction to the basic theory and engineering of advanced electron beam sources known as photoinjectors. Photoinjectors produce relativistic electrons for exciting new devices such as x-ray free electron lasers and the polarized beams for very high energy physics linear colliders. The chapters are written by renowned experts in the field who share their working knowledge of the technologies needed for designing and building photoinjectors.

Atlas of the World's Languages in Danger World Bank Publications

"A road map for investing that I have now been following for 57 years." --From the Foreword by Warren E. Buffett First published in 1934, *Security Analysis* is one of the most influential financial books ever written. Selling more than one million copies through five editions, it has provided generations of investors with the timeless value investing philosophy and techniques of Benjamin Graham and David L. Dodd. As relevant today as when they first appeared nearly 75 years ago, the teachings of Benjamin Graham, "the father of value investing," have withstood the test of time across a wide diversity of market conditions, countries, and asset classes. This new sixth edition, based on the classic 1940 version, is enhanced with 200 additional pages of commentary from some of today's leading Wall Street money managers. These masters of value investing explain why the principles and techniques of Graham and Dodd are still highly relevant even in today's vastly different markets. The contributor list includes: Seth A. Klarman, president of The Baupost Group, L.L.C. and author of *Margin of Safety* James Grant, founder of Grant's Interest Rate Observer, general partner of Nippon Partners Jeffrey M. Laderman, twenty-five year veteran of *BusinessWeek* Roger Lowenstein, author of *Buffett: The Making of an American Capitalist* and *When America Aged and Outside Director*, Sequoia Fund Howard S. Marks, CFA, Chairman and Co-Founder, Oaktree Capital Management L.P. J. Ezra Merkin, Managing Partner, Gabriel Capital Group . Bruce Berkowitz, Founder, Fairholme Capital Management. Glenn H. Greenberg, Co-Founder and Managing Director, Chieftain Capital Management Bruce Greenwald, Robert Heilbrunn Professor of Finance and Asset Management, Columbia Business School David Abrams, Managing Member, Abrams Capital Featuring a foreword by Warren E. Buffett (in which he reveals that he has read the 1940 masterwork "at least four times"), this new edition of *Security Analysis* will reacquaint you with the foundations of value investing—more relevant than ever in the tumultuous 21st century markets.

The Performance Economy Routledge

Electric Machinery Fundamentals continues to be a best-selling machinery text due to its accessible, student-friendly coverage of the important topics in the field. Chapman's clear writing persists in being one of the top features of the book. Although not a book on MATLAB, the use of MATLAB has been enhanced in the fourth edition. Additionally, many new problems have been added and remaining ones modified. *Electric Machinery Fundamentals* is also accompanied by a website that provides solutions for instructors, as well as source code, MATLAB tools, and links to important sites for students.

Publisher description

Shock Waves Fordham Univ Press

Neoliberalism - the doctrine that market exchange is an ethic in itself, capable of acting as a guide for all human action - has become dominant in both thought and practice throughout much of the world since 1970 or so. Its spread has depended upon a reconstitution of state powers such that privatization, finance, and market processes are emphasized. State interventions in the economy are minimized, while the obligations of the state to provide for the welfare of its citizens are diminished. David Harvey, author of 'The New Imperialism' and 'The Condition of Postmodernity', here tells the political-economic story of where neoliberalization came from and how it proliferated on the world stage. While Thatcher and Reagan are often cited as primary authors of this neoliberal turn, Harvey shows how a complex of forces, from Chile to China and from New York City to Mexico City, have also played their part. In addition he explores the continuities and contrasts between neoliberalism of the Clinton sort and the recent turn towards neoconservative imperialism of George W. Bush. Finally, through critical engagement with this history, Harvey constructs a framework not only for analyzing the political and economic dangers that now surround us, but also for assessing the prospects for the more socially just alternatives being advocated by many oppositional movements.

Annual Report - Inland Revenue Department, Republic of Singapore John Wiley & Sons

Recent tools and findings from the cognitive sciences illuminate religious thought and behaviour in ancient Israel and the Bible. Primarily intended for scholars of the Bible and religion, it is also relevant to cognitive scientists, researchers, and graduate students interested in the intersection of cognition and culture.
