There was no sharp break between classical and medieval map making. Contributions by thirteen scholars offer

fresh insight that demonstrates continuity and adaptation over the long term. This work reflects current thinking in the history of cartography and opens new directions for the future.

In virtually all the literary traditions of the world there are works of verbal art that depend for part of their effect on the juxtaposition of prose and verse. This volume takes the first step towards a comparative study of prosimetrum', the mixture of prose and verse, with essays by leading linguists and literary scholars of a selection of prosimetrical traditions. The nature of what constitutes verse or prose is one underlying question addressed. An outline of historical developments emerges, especially for Europe and the Near East, with articles on classical, medieval and nineteenth-century literatures. Oriental prosimetrical literatures discussed include that of Vedic India and the old literary cultures of China and Japan; also represented are oral and oral-derived folk literatures of recent centuries in Africa, the West, and Inner Asia. Verse with Prose distinguishes for the first

time some of the most significant uses of mixed forms. Dronke looks at the way prose and verse elements function in satirical works, beginning in the third century B.C. with Menippus. He examines allegorical techniques in the mixed form, giving especially rewarding attention to Boethius' Consolation of Philosophy. His lucid analysis encompasses a feast of medieval sagas and romances, ranging from Iceland to Italy, including vernacular works by Marguerite Porete in France and Mechthild in Germany. A number of the medieval Latin texts presented have remained virtually unknown, but emerge here as narratives with unusual and at times brilliant literary qualities.

It has often been held that scholasticism destroyed the literary theory that was emerging during the twelfth-century

Renaissance, and hence discussion of late medieval literary works has tended to derive its critical vocabulary from modern, not medieval, theory. In *Medieval Theory of Authorship*, now reissued with a new preface by the author, Alastair Minnis asks, "Is it not better to search again for a conceptual equipment which is at once historically valid and theoretically illuminating?" Minnis has found such writings in the glosses and commentaries on the authoritative Latin writers studied in schools and universities between 1100 and 1400. The prologues to these commentaries provide valuable insight into the medieval theory of authorship. Of special significance is scriptural exegesis, for medieval scholars found the Bible the most difficult text to describe appropriately and accurately.

Petrarch's Africa John Wiley & Sons

Situated within contemporary posthumanism, this volume offers theoretical and practical approaches to materiality in Greek tragedy. Established and emerging scholars explore how works of the three major Greek tragedians problematize objects and affect, providing fresh readings of some of the masterpieces of Aeschylus, Sophocles, and Euripides. The so-called new materialisms have complemented the study of objects as signifiers or symbols with an interest in their agency and vitality, their sensuous force and psychosomatic impact-and conversely their resistance and irreducible aloofness. At the same time, emotion has been recast as material "affect," an intense flow of energies between bodies, animate and inanimate. Powerfully

contributing to the current critical debate on materiality, the essays collected here destabilize established interpretations, suggesting alternative approaches and pointing toward a newly robust sense of the physicality of Greek tragedy.

Horace is a central author in Latin literature. His work spans a wide range of genres, from iambus to satire, and odes to literary epistle, and he is just as much at home writing about love and wine as he is about philosophy and literary criticism. He also became a key literary figure in the regime of the Emperor Augustus. In this 2007 volume a superb international cast of contributors present a stimulating and accessible assessment of the poet, his work, its themes and its reception. This provides the orientation and coverage needed by non-specialists and students, but also suggests provoking perspectives from which specialists may benefit. Since the last general book on Horace was published half a century ago, there has been a sea-change in perceptions of his work and in the literary analysis of classical literature in general, and this territory is fully charted in this Companion.

The first epic poem written in Italian is the Teseida delle nozze di Emilia (Theseid of the Nuptials of Emilia) by Giovanni Boccaccio, the well-known author of the Decameron. Conceived and composed during the Florentine author's stay in Naples, it combines masterfully both epic and lyric themes in a genre that may be defined as an epic of love. Besides its intrinsic literary value, the poem reflects the author's youthful emotions and nostalgia for the happiest times of his life. The Medieval Literature of Western Europe Oxford [Eng.] : Clarendon Press Originally published in 1986, this translated version of Giovanni Boccaccio's Il Filostrato is of particular interest as the principal source for Chaucer's great work, the Troilus. This edition includes the original Italian alongside the translation, so that even the English reader with no knowledge of Italian will be able to make out a good deal of the original assisted by a close translation.

PREFACE. THE Author of this very practical treatise on Scotch Loch - Fishing desires clearly that it may be of use to all who had it. He does not pretend to have written anything new, but to have attempted to put what he has to say in as readable a form as possible. Everything in the way of the history and habits of fish has been studiously avoided, and technicalities have been used as sparingly as possible. The writing of this book has afforded him pleasure in his leisure moments, and that pleasure would be much increased if he knew that the perusal of it would create any bond of sympathy between himself and the angling community in general. This section is interleaved with blank sheets for the readers notes. The Author need hardly say that any suggestions addressed to the case of the publishers, will meet with consideration in a future edition. We do not pretend to write or enlarge upon a new subject. Much has been said and written-and well said and written too on the art of fishing but loch-fishing has been rather looked upon as a

second-rate performance, and to dispel this idea is one of the objects for which this present treatise has been written. Far be it from us to say anything against fishing, lawfully practised in any form but many pent up in our large towns will bear us out when we say that, on the whole, a days loch-fishing is the most convenient. One great matter is, that the loch-fisher is dependent on nothing but enough wind to curl the water, -and on a large loch it is very seldom that a dead calm prevails all day, -and can make his arrangements for a day, weeks beforehand whereas the stream-fisher is dependent for a good take on the state of the water and however pleasant and easy it may be for one living near the banks of a good trout stream or river, it is quite another matter to arrange for a days river-fishing, if one is

looking forward to a holiday at a date some weeks ahead. Providence may favour the expectant angler with a good day, and the water in order but experience has taught most of us that the good days are in the minority, and that, as is the case with our rapid running streams, -such as many of our northern streams are, -the water is either too large or too small, unless, as previously remarked, you live near at hand, and can catch it at its best. A common belief in regard to loch-fishing is, that the tyro and the experienced angler have nearly the same chance in fishing, -the one from the stern and the other from the bow of the same boat. Of all the absurd beliefs as to loch-fishing, this is one of the most absurd. Try it. Give the tyro either end of the boat he likes give him a cast of ally flies he may fancy,

or even a cast similar to those which a crack may be using and if he catches one for every three the other has, he may consider himself very lucky. Of course there are lochs where the fish are not abundant, and a beginner may come across as many as an older fisher but we speak of lochs where there are fish to be caught, and where each has a fair chance. Again, it is said that the boatman has as much to do with catching trout in a loch as the angler. Well, we don't deny that. In an untried loch it is necessary to have the guidance of a good boatman but the same argument holds good as to stream-fishing...
