Wiley CPA Exam Review 2011, Auditing and Attestation CRC Press

This book offers a lively, engaging and potentially transformative introduction to the ideas, insights and practical know-how that a modern university teacher requires. Bringing together contributors with extensive practical teaching experience as well as pedagogical expertise, it uses accessible language and real cases to explore everyday teaching challenges and provide strategies and techniques for stimulating deep and satisfying learning. This book is for anyone with the ambition to teach well at degree level.

This edited collection comprehensively explores Economy 5.0, focusing on critical aspects such as organizational development, intellectual capital, soft agent dynamics, and agility. Through in-depth analysis, real-world case studies, and forward-looking perspectives, the book provides readers with practical insights into the challenges and opportunities that define contemporary organizations and skills that can be applied in different cultural and organizational contexts. The overarching goal is to empower individuals to thrive in the dynamic economic landscape of Economy 5.0 by promoting sustainable practices, fostering future-proof skill sets, encouraging ethical leadership, and

inspiring innovative solutions. It addresses issues and trends that are universally relevant in today's globalized world, offering a multidisciplinary perspective that will make it valuable to researchers, academics, practitioners, and students in the fields of organizational development, management, innovation, sustainability, and ethical leadership.

Classroom Assessment and Educational Measurement explores the ways in which the theory and practice of both educational measurement and the assessment of student learning in classroom settings mutually inform one another. Chapters by assessment and measurement experts consider the nature of classroom assessment information, from student achievement to affective and socio-emotional attributes; how teachers interpret and work with assessment results; and emerging issues in assessment such as digital technologies and diversity/inclusion. This book uniquely considers the limitations of applying large-scale educational measurement theory to classroom assessment and the adaptations necessary to make this transfer useful. Researchers, graduate students, industry professionals, and policymakers will come away with an essential understanding of how the classroom assessment context is essential to broadening contemporary educational measurement perspectives. The Power of Colleagues What happens when primary care clinicians meet together on set aside time in their practice settings to talk about their own patients?Complimenting quality metrics or performance measures through discussing the actual stories of individual patients and their clinician-patient relationships In these settings, how can clinicians pool their collective experience and apply that to ‘the evidence’ for an individual patient?Especially for patients who do not fit the standard protocols and have vague and worrisome symptoms, poor response to treatment, unpredictable disease courses, and/or compromised abilities for shared decision making What follows when discussion about individual patients reveals system-wide service gaps and coordination limitations?Particularly for patients with complex clinical problems that fall outside performance monitors and quality screens How can collaborative engagement of case-based uncertainties with one’s colleagues help combat the loneliness and helplessness that PCPs can experience, no matter what model or setting in which they practice?And where they are expected to practice coordinated, evidence-based, EMR-directed care These questions inspired Lucia Sommers and John Launer and their international contributors to explore the power of colleagues in “Clinical Uncertainty in Primary Care: The Challenge of Collaborative Engagement” and offer antidotes to sub-optimal care that can result when clinicians go it alone. From the Foreword: “Lucia Sommers and John Launer, with the accompanying input of their

contributing authors, have done a deeply insightful and close-to-exhaustive job of defining clinical uncertainty. They identify its origins, components and subtypes; demonstrate the ways in which and the extent to which it is intrinsic to medicine...and they present a cogent case for its special relationship to primary care practice...‘Clinical Uncertainty in Primary Care’ not only presents a model of collegial collaboration and support, it also implicitly legitimates it.” Renee Fox, Annenberg Professor Emerita of the Social Sciences, University of Pennsylvania.

Medical informatics is a field which continues to evolve with developments and improvements in foundational methods, applications, and technology, constantly offering opportunities for supporting the customization of healthcare to individual patients. This book presents the proceedings of the 16th World Congress of Medical and Health Informatics (MedInfo2017), held in Hangzhou, China, in August 2017, which also marked the 50th anniversary of the International Medical Informatics Association (IMIA). The central theme of MedInfo2017 was "Precision Healthcare through Informatics", and the scientific program was divided into five tracks: connected and digital health; human data science; human, organizational, and social aspects; knowledge management and quality; and safety and patient outcomes. The 249 accepted papers and 168 posters included here span the breadth and depth of sub-disciplines in biomedical and health informatics, such as clinical informatics; nursing informatics; consumer health informatics; public health informatics; human factors in healthcare; bioinformatics; translational informatics;

quality and safety; research at the intersection of biomedical and health informatics; and precision medicine. The book will be of interest to all those who wish to keep pace with advances in the science, education, and practice of biomedical and health informatics worldwide.

Redesigning Special Education Teacher Preparation describes both challenges and possible solutions to redesigning and restructuring high-incidence teacher preparation programs so graduates will meet the Highly Qualified Teacher requirements and be prepared to teach students with high-incidence disabilities. This powerful new text discusses many possible reforms, including field-based teacher preparation, a focus on evidence-based core practices and teacher moves, collaboration with K-12 school-based partners as teacher educators, interdisciplinary collaboration across university faculty, and a grounding in current expectations for high-stakes accountability and program evaluation.

Find out how and what to review for the all-new 2015 National Board of Respiratory Care (NBRC) Exam with *The Comprehensive Respiratory Therapist's Exam Review, 6th Edition*. It covers every topic in the NBRC Detailed Content Outline, providing study hints, in-depth content review, and self-assessment questions with

rationales so you retain more information. Sills' latest review also offers students and practicing respiratory therapists realistic experience with the new Therapist Multiple Choice Exam (TM-CE) through a 140-question TM-CE practice test on its accompanying Evolve website. Self-study questions at the end of each chapter include an answer key with rationales to help you analyze your strengths and weaknesses in content learned. UNIQUE! Exam Hint boxes point out subjects that are frequently tested, helping you study, plan your time, and improve your test-taking skills. Rationales for each question provide feedback for correct and incorrect answers so you understand why an answer is correct or incorrect and retain information better. Difficulty level codes (recall, application, analysis) for each question on Evolve help you prepare for questions in the way that is most appropriate (e.g., memorization for recall or synthesis for analysis). Special NBRC coding of topics corresponds to every topic covered in the NBRC Detailed Content Outline (DCO) so you can easily review each of the testable topics. Secure Evolve website lets you experience the actual NBRC testing environment in a computerized format. NEW! Therapist Multiple Choice Exam (TM-CE) practice test aligns with the new 2015 NBRC Written Exam. UPDATED! Revised content reflects the 2015 NBRC Detailed Content Outline and examination matrix so you know exactly what to expect on the exams - and can review each of the areas covered on the matrix. NEW! More analysis-type questions added to the end-of-chapter self-study questions reflect changes in the matrix content outlines. NEW! Greater consistency in formulas, abbreviations, and equations achieved through aligning the text and Evolve site to comprehensive Abbreviation and

Equation Glossaries. EXPANDED! 22 clinical simulations feature shortened sections and align with the new 2015 NBRC Clinical Simulation Exam in both study mode and exam mode, giving you the opportunity to practice this difficult portion of the Registry Exam on Evolve. NEW! Standard Normal Range Guide features reference tables with normal values of various parameters used in respiratory care assessment. EXPANDED! New practice exams on Evolve, including one 140-question TM-CE with automatic scoring to delineate entry and advanced credentialing levels, let you assess your understanding in both study (untimed) and exam (timed) modes.

This leading course text and practitioner reference has been extensively revised with 90% new content, covering a broader range of child and adolescent problems in more concise chapters. Prominent authorities provide a comprehensive framework for evidence-based assessment. Presented are methods and tools for developing effective diagnoses and case formulations, building strong treatment plans, monitoring progress, and documenting outcomes. Chapters are packed with practical guidance, handy tables, and sample instruments. Illustrative case material is included. Prior edition title: *Assessment of Childhood Disorders*, Fourth Edition, edited by Eric J. Mash and Russell A. Barkley. New to This Edition *Many new authors and topics, reflecting over a decade of research and clinical advances. *Updated for DSM-5 and ICD-11. *Chapters on additional disorders: obsessive-compulsive disorder, persistent complex bereavement, and body dysmorphic disorder. *Chapters on transdiagnostic

concerns: sleep problems, risky behaviors, and life stressors.

*Four chapters on the "whys" and "hows" of using assessment in each phase of treatment. *Disorder-specific "starter kits"--lists of essential checklists, rating scales, interviews, and progress measures, including links to exemplary free measures online. The application of emerging technology in educational settings has proven to significantly enhance students' experiences. These tools provide better learning opportunities and engagement between students and instructors. Integration of Cloud Technologies in Digitally Networked Classrooms and Learning Communities is a pivotal reference source for the latest scholarly research on the implementation of cloud pedagogies and innovations in classroom environments. Highlighting concepts related to learning engagement, curriculum design, and theoretical perspectives, this book is ideally designed for researchers, practitioners, professionals, and students interested in the use of cloud technology in digital classrooms.

Training and Assessment - Theory and Practice John Wiley & Sons

Background: Simulation enhances experiential learning through creating experience to form the basis of learning, and it has been recognized as an effective pedagogy in current health professions education. As an integral element of simulation, debriefing contributes to transforming the created experience to new knowledge. Video-assisted debriefing (VAD) refers to adding

audio-visual capture and review to traditional verbal debriefing (VD). Despite being regarded as 'gold standard' for simulation, evidence reporting educational effects of VAD is mixed and its best practice remains absent. Aims: The aims of this thesis were to develop a framework for VAD, to test and compare its effects on prelicensure nursing students' debriefing experiences, reflective abilities and nursing competencies with VD without video, as well as to explore its potential impact on facilitators' perceptions and practices following high-fidelity simulation. Design and methods: This thesis comprised of four studies with different research designs. Study I was a systematic review which synthesized the characteristics of existing VAD practices in health professions education and evaluated its effectiveness on learners' reactions, learning and behaviors. Study II was a proof-of-concept study which developed of a three-phase framework for VAD and tested its preliminary effects on nursing students' debriefing experiences, reflective abilities, and nursing competencies using a pretest-posttest design. Study III adopted a qualitative method to explore nursing students' experiences and perspectives of a structured VAD using focus groups. Data were analyzed using thematic analysis approach. Study IV employed a mixed-method research design to investigate the impact of a three-phase VAD on nursing students' debriefing experiences, perceived stress, as well as facilitators' perceptions and debriefing practices. Results: Study I showed that existing VAD offered comparable educational effects as VD in terms of learners' experiences, attitudes, and performance, except on knowledge acquisition. Video did not demonstrate its continuous advantage in debriefing, which informed the absence of best

practice. The preliminary results of Study II reported that a three-phase VAD significantly improved students' debriefing experiences ($p < 0.001$), reflective abilities ($p < 0.01$), and nursing competencies ($p < 0.001$). Study III disclosed an emotional roller coaster experienced by nursing students in VAD, from unwillingness and fear of being judged, followed by stress and defensiveness, to sense of appreciation and satisfaction. Most students agreed that VAD provided a good learning experience with few preferred not to receive peer feedback after video review. Study IV demonstrated that VAD improved nursing students' debriefing experiences ($p = 0.01$) and caused comparable stress as VD. Repeated exposure to VAD significantly reduced stress levels. VAD also enhanced facilitators' perceptions and debriefing practices. Conclusions: This project developed a three-phase framework for VAD, and affirmed its educational effects on improving nursing students' debriefing experiences, reflective abilities, and competencies following high fidelity simulation, with comparable stress experienced as in VD. The finding of an emotional roller coaster experienced by nursing students in VAD challenged the snapshot of negative emotions reported in other studies, offering some clarity to the inconsistent evidence regarding learners' experiences of VAD and contributing to its best practice. This thesis also proved that this three-phase VAD held the potential to enhance facilitators' debriefing practices towards student-centered learning. Bakgrund: Att simulera olika vårdssituationer är idag en väl använd pedagogisk metod inom hälsoutbildningarna eftersom erfarenheten av att träna simulering kan förbättra inläringen. Debriefing ingår som en integrerad del i simuleringen och bidrar till att omvandla

erfarenheten till kunskap. Video-assisterad debriefing innebär att simuleringssituationen filmas och filmen används sedan i debriefingen. Trots att det är vanligt att använda video-assisterad debriefing är bevisen för att det är bättre än debriefing utan video oklara. Syfte: Syftet med denna avhandling var att utveckla en strukturerad video-assisterad debriefing att använda i samband med simulering på sjuksköterskeutbildningen. Att sedan testa den på sjuksköterskestudenter för att se om den påverkade deras debriefing erfarenhet, reflektionsförmåga och omvårdnadskompetens jämfört med sjuksköterskestudenter som erhöll debriefing utan video. Syftet var också att utforska handledarnas uppfattning och genomförande av video-assisterad debriefing i samband med simulering. Design och Metod: Avhandlingen består av fyra studier med olika design. Studie 1 var en systematisk litteraturstudie där 23 artiklar innehållande tidigare erfarenheter av videoassisterad debriefing från hälsoutbildningar granskades och syntetiserades. I studie 2 utvecklades en strukturerad video-assisterad debriefing i tre faser som sedan testades på sjuksköterskestudenternas ($n = 63$) debriefing erfarenhet, reflektionsförmåga och omvårdnadskompetens genom en före-efter design. I studie 3 användes en kvalitativ design för att med hjälp av fokusgrupper utforska sjuksköterskestudenternas ($n = 27$) erfarenheter av att använda video-assisterad debriefing. Studie 4 var en mixed-methods studie som undersökte betydelsen av en strukturerad video-assisterad debriefing jämfört med debriefing utan video på sjuksköterskestudenternas ($n = 145$) debriefing erfarenhet och uppfattning av stress i samband med debriefingen. I studie 4 undersöktes även handledarnas ($n = 8$) uppfattningar och

genomförande av video-assisterad debriefing. Resultat: Studie 1 visade att video-assisterad debriefing var jämförbart med debriefing utan video vad det gäller erfarenheter, attityder och genomförande men var inte bättre vad det gäller förvärvande av ny kunskap. Resultaten från studie 2 visade att den strukturerade videoassisterade debriefingen signifikant förbättrade sjuksköterskestudenternas debriefing erfarenhet ($p < 0,001$), reflektionsförmåga ($p < 0,01$) och omvårdnadskompetens ($p < 0,001$). Studie 3 visade att strukturerad video-assisterad debriefing var som en emotionell bergodalbana
