Since the 18th century,
people from Europe,
Africa, India and China
have made Mauritius their
home. The result is a
charming mix of cultural
and religious traditions,
against the backdrop of a
tropical paradise. The
dramatic landscapes of
Mauritius feature high
mountain peaks, white

beaches and untouched rainforest, as well as rich fauna and flora. This is a welcoming country, where the people live in harmony with their natural surroundings. This selection of postcards from André de Kervern's collection is a timeless record of Mauritius. Each chapter focuses on a different region including the north, south, centre and the capital Port Louis, as well as on the island's people. Classic scenes of sugar cane plantations, railways, parades, horse races and verdant

landscapes were all widely circulated fragments of cinéma-vérité. Complete with detailed captions and essays by Yvan Martial, these postcards offer glimpses of life in Mauritius from the 19th and 20th centuries. Preservative Treatment of Fence Posts and Farm Timbers Routledge This two-volume set, LNCS 12565 and 12566, constitutes the refereed proceedings of the 6th International Conference on Machine Learning, Optimization, and Data

Science, LOD 2020, held in Siena, Italy, in July 2020. The total of 116 full papers presented in this two-volume post-conference proceedings set was carefully reviewed and selected from 209 submissions. These research articles were written by leading scientists in the fields of machine learning, artificial intelligence, reinforcement learning, computational optimization, and data science presenting a substantial array of ideas, technologies, algorithms,

methods, and applications.

Animal fibres from South American camelids and other fibre or wool bearing species provide important products for use by the human population. The contemporary context includes the competition with petrocarbon-based artificial fibres and concern about excessive persistence of these in the natural environment. Animal fibres present highly valuable characteristics for sustainable production and processing as they

are both natural and renewable. On the other hand, their use is recognised to depend on availability of appropriate quality and quantity, the production of which is underpinned by a range of sciences and processes which support development to meet market requirements. This collection of papers combines international experience from South and North America, China and Europe. The focus lies on domestic South American camelids (alpacas, llamas) and also

includes research on sheep and goats. It considers latest advances in sustainable development under climate change, breeding and genetics, reproduction and pathology, nutrition, meat and fibre production and fibre metrology. Publication of this book is supported by the Animal Fibre Working Group of the European Federation of Animal Science (EAAP). 'Advances in Fibre Production Science in South American Camelids and other Fibre Animals'

addresses issues of importance to scientists and animal breeders, textile processors and manufacturers, specialised governmental policy makers and students studying veterinary, animal and applied biological sciences. *L' Art d'accommoder la vieillesse* Göttingen University Press Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Scollay Square in Boston was a favored entertainment district that disappeared in the 1960s. Read of the characters and landmarks that made this are a huge draw. Scollay Square is a pictorial history of the infamous Boston entertainment district that was wiped away by urban renewal in the 1960s. Now Government Center,

this twenty-two-acre area was once an entertainment hub where entrepreneurs, scientists, politicians, performers, and even con artists worked side by side. Inside are dozens of never-before-published photographs of the Old Howard and Ann Corio, the Crawford House and Sally Keith, Joe and Nemo, and the Casino Theater, along with the many characters and landmarks that made this area a favorite of high-school truants, businessmen, and sailors on leave.

Billboard Springer Nature
 Au fil d'un texte vif et alerte qui nous emmène sur des chemins inattendus, Geneviève Delaisi de Parseval nous offre un regard décalé sur l'énigme qu'est la vieillesse. Que veut dire vieillir ? Sans nier la réalité du vieillissement, ce texte invite à considérer cette période de la vie de façon différente et positive. Le chemin de la vie n'est ni régulier ni prévisible. Ce temps de la vieillesse trop souvent réduit au déclin n'offre-t-il pas justement

un nouveau défi pour l'esprit ? Ne permet-il pas de faire une nouvelle lecture de son existence, de son histoire familiale, voire de vivre une seconde vie ? Exercice auquel la psychanalyste se prête elle-même. Et si vieillir, c'était aussi grandir ? Une approche de la vieillesse stimulante et pleine d'espoir. Geneviève Delaisi de Parseval est psychanalyste, anthropologue, spécialiste des questions de famille. Elle est l'auteure de *L'Art d'accommoder les bébés*, *Enfant de personne*, *La*

Part de la mère, *Le Roman familial d'Isadora D.*, *Voyage au pays des infertiles*. 9 mois dans la vie d'une psy.
