Digital Media and the Preservation of Indigenous Languages in Africa: Toward a Digitalized and Sustainable Society presents cutting-edge epistemological debates, academic case studies, and empirical research from African scholars on the intersection of digital media technologies, artificial intelligence, and the preservation of Indigenous languages in the continent. This edited collection provides a methodology for African researchers, practitioners, and marginalized communities to integrate digital technologies into their lives to foster innovation, advance the documentation and preservation of underrepresented languages, and promote African-centered epistemologies.

Contributors to this edited volume argue that African societies should acknowledge and embrace digital media platforms. Despite these platforms' potential as sites of epistemic colonialism, they are essential for promoting ways of life that reflect the diversity and importance of Indigenous cultures. For Indigenous languages and local epistemologies to flourish in this rapidly evolving technological era, African communities must employ a variety of contemporary practices and strategies to document, protect, and preserve ways of being that have formerly been relegated to the periphery.

This is the most comprehensive survey ever published of auxiliary verb constructions, as in 'he could have been going to drink it' and 'she does eat cheese'. Drawing on a database of over 800 languages Dr Anderson examines their morphosyntactic forms and semantic roles. He investigates and explains the historical changes leading to the cross-linguistic diversity of inflectional patterns, and he presents his results within a new typological framework. The book's impressive range includes data on variation within and across languages and language families. In addition to examining languages in Africa, Europe, and Asia the author presents analyses of languages in Australasia and the Pacific and in North, South, and Meso-America. In doing so he reveals much that is new about the language families of the world and makes an important contribution to the understanding of their nature and evolution. His book will interest scholars and researchers in language typology, historical and comparative linguistics, syntax, and morphology.

In *Ethnography from the Mission Field: The Hoffmann Collection of Cultural Knowledge* Joubert et al. offer a translated and annotated edition of the 24 ethnographic articles by missionary Carl Hoffmann and his local interlocutors published between the years 1913 and 1958. The edition is introduced by a historic contextualisation using a cultural historical approach to analyse the contexts in which Hoffmann's ethnographic texts were produced. Making use of historical material and Hoffmann's own words from personal diaries and letters, the authors convincingly draw the attention to the discursive context in which the texts annotated in this book had been compiled. In a concluding chapter the book traces the captivating developments of the orthography of Northern Sotho through Hoffmann's texts over almost half a century. Brill has made the documentary film "A Journey into the Life of a Mission-Ethnographer" which is interlinked with this book available online via its online channels. To access it please click here. The digital database of the "Hoffmann Collection of Cultural Knowledge" (HC-CK) can be accessed by clicking here. It is an amalgamation of digital scans, images and video footage relating to missionary Carl Hoffmann's work and life on various mission stations, made available by the Humboldt Universität zu Berlin.

From School to Higher Education? Walter de Gruyter

Dr. Suzuki questioned why all vocalists vocalize every day to improve their voices, but instrumentalists do not do so every day with their instruments. He believes that on any instrument, one needs to practice to make a more beautiful tone. First he talks about playing a beautiful resonant tone with the bow while plucking the string with a finger. When a pizzicato is played, the resonance goes on for a long time. Students should listen to that resonance and play the same kind of clear beautiful sound. He talks about how to make a difference in the tone by using a different bow speed, how to practice to find the resonance point, how to change the weight of the arm on the bow to produce a different kind of tone, and how to change tone color. This book includes all of Dr. Suzuki's basic ideas about tone. *Sepedi (Northern Sotho) Proverbs* Alfred Music

From the beginning Fine Lines from the Box traces a journey of the mind and an ongoing exercise of reading and writing by one of South Africa's most incisive commentators. Taken with Njabulo Ndebele's earlier *Rediscovery of the Ordinary*, this collection challenges, entreats, cajoles and prods one into understanding a range of issues - the loss of innocence in achieving a 'new South Africa', the President and the AIDS question, higher education and the liberal tradition, the place of English in modern South Africa, that African icon Brenda Fassie, the vagaries of journalism, and the time in the life of a country when the oppressed must free the oppressor. Covering a span of eighteen years from 1987 to 2006 these pieces cut to the nation's quick. They provide a sane view of our recent past and explain much about what often seems to a baffling present.

For forty years, in a variety of books and articles, Gerhard Lenski has become the most influential proponent of ecological and evolutionary explanations of human

societies, their development and transformations, from the Stone Age to the present. In his newest book, Lenski offers a succinct but comprehensive statement of the full body of his theory followed by demonstration of how it can be used to generate new and valuable insights when applied to a set of highly diverse issues. These include debates concerning the origin of ancient Israel and its distinctive culture, the rise of the West in the modern era, the highly varied trajectories of development of Third World nations in recent decades, and the failure of Marxist efforts to transform society in the Soviet Union and elsewhere. In the concluding chapter, Lenski discusses a number of other issues and areas where ecological-evolutionary theory may be fruitfully applied in the future.
