"A witty, engaging narrative style...[Robb's] approach is particularly engrossing." —New York Times Book Review  
A narrative of exploration—full of strange landscapes and even stranger inhabitants—that explains the enduring fascination of France. While Gustave Eiffel was changing the skyline of Paris, large parts of France were still terra incognita. Even in the age of railways and newspapers, France was a land of ancient tribal divisions, prehistoric communication networks, and pre-Christian beliefs. French itself was a minority language. Graham Robb describes that unknown world in

arresting narrative detail. He recounts the epic journeys of mapmakers, scientists, soldiers, administrators, and intrepid tourists, of itinerant workers, pilgrims, and herdsmen with their millions of migratory domestic animals. We learn how France was explored, charted, and colonized, and how the imperial influence of Paris was gradually extended throughout a kingdom of isolated towns and villages. The Discovery of France explains how the modern nation came to be and how poorly understood that nation still is today. Above all, it shows how much of France—past and present—remains to be discovered. A New York Times Notable Book, Publishers Weekly Best Book, Slate Best Book, and Booklist Editor's Choice.

The tension between women's workplace opportunity and family obligation is not exclusively a phenomenon of the 1980s, as George Alter makes abundantly clear in this study. His close investigation of women's lives in a nineteenth-century European industrial city advances our knowledge in several areas of social history, historical demography, and life course studies. It is the first monograph to apply event history analysis to the study of family history. In doing so, it moves beyond the static categories of traditional household studies to a dynamic view of the influence of the family on the life course decisions of individuals. In contrast to most previous historical studies of the family, this work focuses on the dynamic aspects of life course transitions (employment, marriage, household formation, childbearing) rather than the structure of households. In doing so, attention is shifted from the household as a decision-making unit to

the role of family obligations and resources in the decisions of individuals. Thus, the family is viewed "from the inside out" through its effects on individual actors. Alter's work adds new insights to our understanding of the impact of industrialization on family structure and functioning, about women's work and labor force attachment, and about the ways in which a life course perspective can help to resolve controversies in the approach to family and household dynamics. His rich interpretations not only help to reconstruct the past, but place some current social issues into historical perspective--illegitimacy, nuclear family patterns, and women's dual family/work roles, among others.

Embraces an all-encompassing interdisciplinary methodology to uncover the symbiosis of saintly and civic ideals in music, rituals, and hagiographic writing celebrating the origins and identity of a major clerical center. Medieval Liège was the seat of a vast diocese in northwestern Europe and a city of an exceptional number of churches, clergymen, and church musicians. Recognized as a priestly paradise, the city accommodated as

many Masses each day as Rome. In this volume, musicologist Catherine Saucier examines the music of religious worship in Liège and reveals within the liturgy and ritual a civic function by which local clerics promoted the holy status of their city. Analyzing hagiographic and historical writings, religious art, and sung ceremonies relevant to the city's genesis, destruction, and eventual rebirth, Saucier uncovers richly varied ways in which Liégeois clergymen fused music with text, image, and ritual to celebrate the city's sacred episcopal origins and saintly persona. A Paradise of Priests forges new interdisciplinary connections between musicology, the liturgical arts, the cult of saints, church history, and urban studies, and is an essential resource for scholars and students interested in the history of the Low Countries, hagiography and its reception, and ecclesiastical institutions. Catherine Saucier is assistant professor of music history at Arizona State University.
