One summer night, Edward Alcott gives in to temptation and kisses Lady Julia Kenney in a dark garden. However, the passion she stirs within him is best left in the shadows as she weds his twin, the Earl of Greyling. But when tragedy strikes, to honor the vow he makes to his dying brother, Edward must pretend to be Greyling until the countess delivers her babe. After her husband returns from a two-month sojourn, Julia finds him changed. Bolder, more daring, and more wicked—even if he does limit their encounters to kisses. With each passing day, she falls more deeply in love. For Edward the embers of desire sparked on that long-ago night are quickly rekindled. He yearns to be her husband in truth. But if she discovers his ruse, she will despise him—and English law prevents him from marrying his brother's widow. Yet he must dare to risk everything and reveal his secrets if he is to truly take all.

**NEW YORK TIMES BESTSELLER • LEARN THE 5 SECRETS OF SUCCESSFUL COUPLES** Conflict is the top reason couples seek help—but it's also an opportunity for greater intimacy, deeper connection, and lasting love according to this essential guide from the world's leading relationship scientists and authors of *The Seven Principles for Making Marriage Work* and *Eight Dates*. "An indispensable resource that couples will use over and over again."—Lori Gottlieb, *New York Times* bestselling author of *Maybe You Should Talk to Someone* How we fight predicts the future of our relationships. Most of us blunder into conflict without knowing what we are really fighting about and then quickly become overwhelmed by physiological responses we can't control and emotions we don't anticipate. The truth is the happiest and most successful couples fight—all the time. Conflict is human, and necessary. Through decades of research, Drs. John and Julie Gottman, founders of the world-famous Love Lab, have identified the five common mistakes we make when we are at odds. In *Fight Right*, we learn the five secrets that help us to get back on track and harness conflict to build stronger, healthier relationships. With kindness, clarity, and a deep understanding of the struggles couples are going through, the Gottmans show us that we each have a unique conflict culture, borne of how we were raised and how we experienced past relationships, and they take us through all the possible combinations, from Avoiders, to Validators, to Volatiles, and how they can best work together. *Fight Right* is an essential resource that will help couples escape the win-or-lose mentality in favor of a collaborative approach: calming down, staying connected, and really understanding, so that our fights can bring us closer.

Today, a company's capability to conceive and design quality prototypes and bring a variety of superior products to market quicker than its competitors is increasingly the focal point of competition, contend leading product development experts Steven Wheelwright and Kim Clark. Drawing on six years of in-depth, systematic, worldwide research, they present proven principles for developing the critical capabilities for speed, efficiency, and quality that have worked again and again in scores of successful Japanese, American, and European fast-cycle firms. The authors argue that to survive, let alone succeed, today's companies must construct a new "platform" -- with new methodologies -- on which they can compete. Using their model for development strategies, Wheelwright and Clark show that firms can create a solid architecture for the integration of marketing, manufacturing, and design functions for problem solving and fast action -- particularly during the critical design-build-test cycles of prototype creation. They demonstrate further how successful firms such as Honda in automobiles, Compaq in personal computers, Applied Materials in semi-conductors, Sony in audio equipment, The Limited in apparel, and Hill-Rom in hospital beds have employed recent methodologies to bring new products to market at break-neck speed. Such innovations include design for manufacturability, quality function deployment, computer-aided design, and computer-aided engineering. Finally, Wheelwright and Clark emphasize the importance of learning in the organization. Companies that consistently "design it right the first time" and follow a path of continuous improvement in product and process development have a formidable edge in the crucial race to market.

"We have fun and we enjoy each other's company, so why shouldn't we just move in together?"—Lauren, from Cohabitation Nation Living together is a typical romantic rite of passage in the United States today. In fact, census data shows a 37 percent increase in couples who choose to commit to and live with one another, forgoing marriage. And yet we know very little about this new "normal" in romantic life. When do people decide to move in together, why do they do so, and what happens to them over time? Drawing on in-depth interviews, Sharon Sassler and Amanda Jayne Miller provide an inside view of how cohabiting relationships play out before and after couples move in together, using couples' stories to explore the he said/she said of romantic dynamics. Delving into hot-button issues, such as housework, birth control, finances, and expectations for the future, Sassler and Miller deliver surprising insights about the impact of class and education on how relationships unfold. Showcasing the words, thoughts, and conflicts of the couples themselves, Cohabitation Nation offers a riveting and sometimes counterintuitive look at the way we live now. *Cohabitation Nation* Oxford University Press

Mentalizing - the ability to understand oneself and others by inferring mental states that lie behind overt behaviour - develops within the context of attachment relationships. It is crucial to self-regulation and constructive, intimate relationships, both of which are impaired in personality disorders because of sensitivity to losing mentalizing at times of anxiety and attachment stress. Loss of mentalizing leads to interpersonal and social problems, emotional variability, impulsivity, self-destructive behaviours, and violence. This practical guide on mentalization-based treatment (MBT) of personality disorders outlines the mentalizing model of borderline and antisocial personality disorders and how it translates into clinical treatment. The book, divided into four parts - the mentalizing framework, basic mentalizing practice, mentalizing and groups, and mentalizing systems - covers the aims and structure of treatment, outlines how patients are introduced to the mentalizing model so that their personality disorder makes sense to them, explains why certain interventions are recommended and others are discouraged, and systematically describes the process of treatment in both group and individual therapy to support more stable mentalizing. People with personality disorders commonly have comorbid mental health problems, such as depression and eating disorders, which complicate clinical treatment. Therefore, the book advises the clinician on how to manage comorbidity in treatment. In addition, mentalizing problems in families and social systems, for example, schools and mental health services are also covered. A families and carers training and support guide is provided as families and others are often neglected during the treatment of people with personality disorder. The book is a valuable guide for all mental health workers on how to effectively treat personality disorders.
