National Geographic Books  
Tracing developments in toy making and marketing across the evolving landscape of the 20th

century, this encyclopedia is a comprehensive reference guide to America's most popular playthings and the culture to which they belong. From the origins of favorite playthings to their associations with events and activities,

the study of a nation's toys reveals the hopes, goals, values, and priorities of its people. Toys have influenced the science, art, and religion of the United States, and have contributed to the development of business, politics, and

medicine. Toys and American Culture: An Encyclopedia documents America's shifting cultural values as they are embedded within and transmitted by the nation's favorite playthings. Alphabetically arranged entries trace developments in toy making and toy marketing across the evolving landscape of 20th-century America. In addition to discussing the history of America's

most influential toys, the book contains specific entries on the individuals, organizations, companies, and publications that gave shape to America's culture of play from 1900 to 2000. Toys from the two decades that frame the 20th century are also included, as bridges to the fascinating past—and the inspiring future—of American toys. *The Sensory Lifestyle*

*Handbook SICS Editore* Drawing from his extensive clinical experience and many years of teaching, Dr. Hallenbeck has written a guide to palliative care for clinicians. Topics addressed range from an overview of death and dying to specific approaches to symptom management. As an introduction to both the art and science of palliative care, this book reflects the perspectives

of one physician who has dedicated his career to this rapidly evolving field. The book links real stories of illness with practical advice, thereby delineating clinical practice in a way that reflects the daily concerns of clinicians.

of self-control! Anxiety, frustration, anger, and other difficult feelings won't stand a chance against their new-found powers. Self-Control teaches children with emotional and sensory regulation difficulties aged approximately 4-7 how to calm themselves using self-massage, deep pressure, breathing exercises, and activities such as making an imaginary list

and finding their own peaceful place. This illustrated book also features an appendix with photocopiable super power charts, reinforcers, and reminder tools to ensure that parents, teachers, and other professionals can support children in upholding superhero strategies even after the book has been read. Food as Medicine ABC for Me Symptoms affecting the

upper extremities, particularly nocturnal paraesthesias and numbness, should be identified as manifestations of carpal tunnel syndrome. Reduction of physical load factors together with conservative treatment options (night splint) are the primary management strategies in association with mild symptoms and findings. Nonspecific treatment (e.g. unnecessary physiotherapy) should be avoided. If the sensory disturbance is prolonged and ENMG reveals severe nerve entrapment, or if motor weakness develops, surgical management should be considered. With this treasury of backhanded compliments, sarcastic insults, and catty comebacks, Dorfman gives us transformative wisdom that's

sure to change your life—or at least induce a light chuckle. One question plagues us all: How do we survive all the Sturm und Drang of everyday life? The answer is but one word: snark. “She wears her clothes as if they were thrown on by a pitchfork.” —Jonathan Swift “Why don’t you get a haircut? You look like a chrysanthemum.” —P. G. Wodehouse “He’s a mental midget with the IQ of a fence post.”

—Tom Waits  
“They hardly  
make ‘em like  
him  
anymore—but  
just to be on  
the safe side,  
he should be  
castrated  
anyway.”

—Hunter S.

Snark will  
keep the  
wolves at bay  
(or at least out  
on the porch).  
Snark, much  
like a double  
scotch, will

help you deal  
with relatives,  
shopping, and  
rudeness; it is  
an outlet for  
the unleashed  
vitriolic bile  
that’s saved  
itself up over  
the months.

Like a shield,  
it will protect  
you while you  
go about your

your answer!

ABC Mindful

In this novel  
“full of music,  
magnetism,  
and familial  
obligation”  
(Emma  
Straub, author  
of *All Adults  
Here*) a dying  
billionaire  
matriarch  
leaks news of  
her death  
early so she  
can examine  
her legacy—a  
decision that  
horrifies her  
children and  
inadvertently  
exposes  
secrets she  
has spent a  
lifetime  
keeping. Dava  
Shastri, one of  
the world's

wealthiest women, has always lived with her sterling reputation in mind. A brain cancer diagnosis at the age of seventy, however, changes everything, and Dava decides to take her death—like all matters of her life—into her own hands. Summoning her four adult children to her private island, she discloses shocking news: in addition to having a terminal illness, she

has arranged for the news of her death to break early, so she can read her obituaries. As someone who dedicated her life to the arts and the empowerment of women, Dava expects to read articles lauding her philanthropic work. Instead, her "death" reveals two devastating secrets, truths she thought she had buried forever. And now the whole world knows, including her children. In the time she

has left, Dava must come to terms with the decisions that have led to this moment—and make peace with those closest to her before it's too late. Compassionately written and chock-full of humor and heart, this powerful novel examines public versus private legacy, the complexities of love, and the never-ending joys—and frustrations—of family. Includes a Reading Group Guide.
