This book provides  
physician executives and  
medical group managers  
with a 'next generation'  
reference on the

managed care contracting process. This handbook will educate health care providers about managed care contracting: how the contracting process works, what a standard practice contract looks like and why certain provisions are included, what questions to ask and how to evaluate a capitation rate. Provides pertinent information from professionals in the field.

Get the tools to meet the

challenge of building or renovating a library! The challenge of renovating or constructing a library requires organizational skill, resourcefulness, creativity, and willingness to compromise. Planning, Renovating, Expanding, and Constructing Library Facilities in Hospitals, Academic Medical Centers, and Health Organizations presents thirteen insightful case studies revealing how many libraries have been built or renovated using innovations designed to

meet a specific organization's needs. Each study plainly highlights objectives, methods, results, and conclusions, and reviews the design of the completed library. Ideas and approaches are presented clearly, showing the designing, refurbishing, and refurbishing of existing library space; the merging of library collections and services; and the construction of multimillion dollar library buildings—with each study explaining proven

strategies which can be used or adapted to fit the reader's own circumstances. Planning, Renovating, Expanding, and Constructing Library Facilities in Hospitals, Academic Medical Centers, and Health Organizations explains the steps in the planning process, including needs analysis, goal setting, and public relations, as well as the practical considerations of packing and unpacking. The contributors are noted library authorities intimately involved in

every facet of the construction procedure and cost accounting, and the book includes helpful photographs, illustrations, tables, and appendices to clarify and help practicing librarians and library students alike fully understand the strategies needed to create a functional library facility that fulfills expectations. Planning, Renovating, Expanding, and Constructing Library Facilities in Hospitals, Academic Medical Centers, and Health Organizations includes

case studies of: a resource library moved into a basement renovations to the Osler Library at McGill University, Montreal, Quebec construction of the Booker Health Services Library at the Jersey Shore University Medical Center a merger of two libraries at Trinitas Hospital, Elizabeth, New Jersey the renovation of a small hospital library designing a new library in a historic naval hospital the Hope Fox Eccles Clinical Library Renovation Project

expansion and renovation of the Welch Medical Library at Johns Hopkins University and much more! Planning, Renovating, Expanding, and Constructing Library Facilities in Hospitals, Academic Medical Centers, and Health Organizations is an insightful resource for educators, students, and librarians of all types.

 High-quality primary care is the foundation of the health care system. It provides continuous, person-centered, relationship-based care that considers the needs and preferences of individuals, families, and

communities. Without access to high-quality primary care, minor health problems can spiral into chronic disease, chronic disease management becomes difficult and uncoordinated, visits to emergency departments increase, preventive care lags, and health care spending soars to unsustainable levels. Unequal access to primary care remains a concern, and the COVID-19 pandemic amplified pervasive economic, mental health,

and social health disparities that ubiquitous, high-quality primary care might have reduced. Primary care is the only health care component where an increased supply is associated with better population health and more equitable outcomes. For this reason, primary care is a common good, which makes the strength and quality of the country's primary care services a public concern. Implementing High-Quality Primary Care: Rebuilding the Foundation

of Health Care puts forth an evidence-based plan with actionable objectives and recommendations for implementing high-quality primary care in the United States. The implementation plan of this report balances national needs for scalable solutions while allowing for adaptations to meet local needs. Modern Healthcare Springer Publishing Company Provides physicians, administrators, and other health professionals with information on managed
