In the past two decades, changes in the Mexican government's policies toward the 30 million Mexican migrants living in the US highlight the importance of the Mexican diaspora in both countries given its size, its economic power and its growing political participation across borders. This work examines how the Mexican government's assessment of the possibilities and consequences of implementing certain emigration policies from 1848 to 2010 has been tied to changes in the bilateral relationship, which remains a key factor in Mexico's current development of strategies and policies in relation to migrants in the United States. Understanding this dynamic gives an insight into the stated and unstated objectives of

Mexico's recent activism in defending migrants' rights and engaging the diaspora, the continuing linkage between Mexican migration policies and shifts in the US-Mexico relationship, and the limits and possibilities for expanding shared mechanisms for the management of migration within the NAFTA framework.

This is the first of five ambitious volumes theorizing the structure of governance above and below the central state. This book is written for those interested in the character, causes, and consequences of governance within the state and for social scientists who take measurement seriously. The book sets out a measure of regional authority for 81 countries in North America, Europe, Latin America, Asia, and the Pacific from 1950 to 2010. Subnational authority is exercised by individual regions, and this measure is the first that takes individual regions as the unit of analysis. On the premise

that transparency is a fundamental virtue in measurement, the authors chart a new path in laying out their theoretical, conceptual, and scoring decisions before the reader. The book also provides summaries of regional governance in 81 countries for scholars and students alike.

Transformations in Governance is a major new academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, environmental and urban studies concerned with the dispersion of authority from central states up to supranational institutions, down to subnational governments, and side-ways to public-private networks. It brings together work that significantly advances our understanding of the organization, causes, and consequences of multilevel and complex governance. The series is selective, containing annually a small number of books of exceptionally high quality by leading and emerging scholars. The series targets mainly

single-authored or co-authored work, but it is pluralistic in terms of disciplinary specialization, research design, method, and geographical scope. Case studies as well as comparative studies, historical as well as contemporary studies, and studies with a national, regional, or international focus are all central to its aims.

Authors use qualitative, quantitative, formal modeling, or mixed methods. A trade mark of the books is that they combine scholarly rigour with readable prose and an attractive production style. The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina, Chapel Hill, and the VU Amsterdam, and Walter Mattli of the University of Oxford.

Dance of the Tiger MDPI Social inclusion is on the agenda of governments, policymakers, and nonstate actors around the world. Underpinning this concern is the realization that despite progress on poverty reduction, some people continue to feel left out. This report aims to unpack the concept of social inclusion and understand better how policies can be designed

to further inclusion. First, the report offers a definition of social inclusion as the "process of improving the terms for individuals and groups to take part in society." It unpacks different domains of society that excluded groups and individuals are at particular risk of being left out of -- markets, services, and spaces. Second, the report discusses the most important global megatrends such as migration, climate change, and aging of societies, which will impact challenges and opportunities for inclusion. Finally, it argues that despite these challenges, change towards inclusion is possible and offers examples of inclusionary policies.

In the Third Edition of the bestselling book, *The Truth About Managing People*, bestselling author Stephen Robbins shares even more proven principles for handling virtually every management challenge. Robbins delivers 61 real solutions for the make-or-break problems faced by every manager. Readers will learn how to overcome the true obstacles to teamwork;

why too much communication can be as dangerous as too little; how to improve your hiring and employee evaluations; how to heal "layoff survivor sickness"; how to manage a diverse culture; and ways to lead effectively in a digital world. New truths include: how to nurture friendly employees, forget about age stereotypes, first impressions count, be a good citizen, techniques for managing a diverse age group, and ethical leadership among others. *Modern Competitive Analysis* Prentice Hall "Formerly known as the International Citation Manual"--p. xv. *Narcoland* Oxford University Press Among the most sumptuous buildings of antiquity were royal palaces. As in the Old World, kings and nobles of ancient Mexico and Peru had luxurious administrative quarters in cities, and exquisite pleasure palaces in the countryside. This volume explores the great houses of the ancient New World, from palaces of the Aztecs and Incas, looted by the Spanish conquistadors, to those lost high in the Andes and deep in the jungle. This volume, the first scholarly

compendium of elite residences of the high cultures of the New World, presents definitive descriptions and interpretations by leading scholars in the field. Authoritative yet accessible, this extensively illustrated book will serve as an important resource for anthropologists, archaeologists, and historians of art, architecture, and related disciplines. The Life of Alonso de Contreras Springer Make the right decisions with Horngren/Sundem/Stratton! Horngren/Sundem/Stratton's best-selling texts emphasize decision-making throughout each chapter. Decision-making is introduced in the early text chapters and also appears in many of the text features: "Making Managerial Decisions" boxes, critical thinking exercises, and more. As always, students develop a solid understanding of costs and cost behavior and the use of cost information for planning and control decisions, not just inventory valuation. Two text versions enable faculty to select a text that only covers management accounting

concepts (Chs. 1-14) or one that includes three chapters of financial accounting review (Chs. 1-17). This "investigative magnum opus" offers a jaw-dropping history of Mexican drug cartels as it transports readers to the frontlines of the 'war on drugs' in Latin America (Los Angeles Times). "A riveting story . . . [from] an incredibly brave journalist." —NPR The "war on drugs" has so far cost more than 60,000 lives. Hernández explains

in riveting detail how Mexico became a base for the mega-cartels of Latin America and one of the most violent places on the planet. At every turn, Hernández names not just the narcos, but also the politicians, functionaries, judges, and entrepreneurs who have collaborated with them. In doing so, she reveals the mind-boggling depth of corruption in Mexico's government and business elite. Hernández became a journalist after her father was kidnapped and killed and the police refused to investigate without a bribe. She gained national prominence in 2001 with her exposure of excess and misconduct at the presidential palace, and previous books have focused on criminality at the summit of power, under presidents Vicente Fox and Felipe Calderón. The product of 5 years' investigative reporting—and the subject of intense national controversy—Narcoland is a publishing and political sensation in Mexico. Knowledge Assets World Bank Publications

It is now widely recognized that the effective management of knowledge assets is a key requirement for securing competitive advantage in the emerging information economy. Yet the physical and institutional differences between tangible assets and knowledge assets remain poorly understood. In the case of knowledge, the ownership and control of assets are becoming ever more separate, a phenomenon that is actually exacerbated by

the phenomenon of learning. If we are to meet the challenges of the information economy, then we need a new approach to property rights based on a deeper theoretical understanding of knowledge assets. Max Boisot writes clearly and in accessible language providing some of the key building blocks which are needed for a theory of knowledge assets. He develops a powerful conceptual framework, the Information-Space or I-Space, for exploring the way knowledge flows within and between organizations. This framework will enable managers and students to explore and understand how knowledge and information assets differ from physical assets, and how to deal with them at a strategic level within their organizations.

[Principles of Managerial Finance](#) Verso Books

Entrepreneurship and intrapreneurship have become a vehicle that offers solutions for social, environmental, and economic problems. Even though the level of entrepreneurial activity and its diversity have been motivated through public policies, social support has also played an important role in encouraging people to think of entrepreneurship as a desirable career choice. This book brings together analyses of those elements required for entrepreneurial and intrapreneurial intention and action, which ultimately become important leverages of development. Chapters highlight the importance of rural, urban, university, organizational, and family environments for a bunch of intentions and

behaviors such as green, sport, social, corporate, innovative, traditional, and gender entrepreneurship. This entrepreneurial diversity is translated into higher development through the empowerment of women, environmental consciousness, and efficient production.

Policymakers, scholars, and practitioners can find different examples and cases useful for decision-making, learning, and practice in this book.
