Currently the notion of "sustainability" is used in an inflationary manner. Therefore the authors start with a definition which is stable to serve as an anchor for further research as well as for discussions among scientists, managers and politicians, ideally across different disciplines. The character of this book is purely conceptual. The argumentation is based on comparison of new and demanding requisites with existing models (process and network architectures in the field of logistics). Formerly neglected impacts on the environment will be included. Main features of a new approach will be developed which are capable to avoid these impacts and to align logistics with the requirements of sustainability. In order to make logistics sustainable large parts will have to be reinvented. The focus needs to be on decoupling transportation activities from economic growth rates.

Consumption Corridors: Living a Good Life within Sustainable Limits explores how to enhance peoples' chances to live a good life in a world of ecological and social limits. Rejecting familiar recitations of problems of ecological decline and planetary boundaries, this compact book instead offers

a spirited explication of what everyone desires: a good life. Fundamental concepts of the good life are explained and explored, as are forces that threaten the good life for all. The remedy, says the book's seven international authors, lies with the concept of consumption corridors, enabled by mechanisms of citizen engagement and deliberative democracy. Across five concise chapters, readers are invited into conversation about how wellbeing can be enriched by social change that joins "needs satisfaction" with consumerist restraint, social justice, and environmental sustainability. In this endeavour, lower limits of consumption that ensure minimal needs satisfaction for all are important, and enjoy ample precedent. But upper limits to consumption, argue the authors, are equally essential, and attainable, especially in those domains where limits enhance rather than undermine essential freedoms. This book will be of great interest to students and scholars in the social sciences and humanities, and environmental and sustainability studies, as well as to community activists and the general public.

Falco Jaekel develops a reference architecture for cloud logistics systems. The reference architecture shows how to apply the principles and concepts of cloud computing (e.g. virtualization, service-orientation) to logistics system design and thus how to deliver certain physical logistics capabilities such as transport and storage with the essential cloud characteristics (e.g. on-demand, rapid elasticity, pay-per-use). Within certain scenarios, this innovative mode of delivery can reconcile logistics efficiency with effectiveness and thus may enable firms to achieve competitive advantage in dynamic environments.

The emergence of the state in Europe is a topic that has engaged historians since the establishment of the discipline of history. Yet the primary focus of has nearly always been to take a top-down approach, whereby the formation and consolidation of public institutions is viewed as the outcome of activities by princes and other social elites. Yet, as the essays in this collection show, such an approach does not provide a complete picture. By investigating the importance of local and individual initiatives that contributed to state building from the late middle ages through to the nineteenth century, this volume shows how popular pressure could influence those in power to develop new institutional structures. By not privileging the role of warfare and of elite coercion for state building, it is possible to question the traditional top-down model and explore the degree to which central agencies might have been more important for state representation than for state practice. The studies included in this collection treat many parts of Europe and deal with different phases in the period between the late middle ages and the nineteenth century. Beginning with a critical review of state historiography, the introduction then sets out the concept of 'empowering interactions' which is then explored in the subsequent case studies and a number of historiographical, methodological and theoretical essays. Taken as a whole this collection provides a fascinating platform to reconsider the relationships between top-down and bottom-up processes in the history of the European state.

Sustainable Entrepreneurship stands for a business driven concept of sustainability which focusses on increasing both social as well as business value - so called Shared Value. This book shows why and how this unique concept has the potential to become the most recognised strategic management approach in our times. It aims to point out the opportunities that arise from putting sustainable entrepreneurship into practice. At the same time, this book is a wake-up call for all those companies and decision makers who underestimated Sustainable Entrepreneurship before or who are simply not aware of its greater dimension. Well structured chapters from different academic and business perspectives clearly outline how Sustainable Entrepreneurship contributes to solving the world's most challenging problems, such as Climate Change, Finance Crisis and Political Uncertainty, as well as to ensuring business success. The book provides a framework of orientation where the journey might go: What can a successful concept of SE look like? What are the key drivers for its realisation? What is the role of business in shaping the future of our society? The book also presents best practices and provides unique learnings as well as business insights from the international Sustainable Entrepreneurship Award (www.se-award.org). The Sustainable Entrepreneurship Award (short SEA) is an award for companies today who are thinking about tomorrow by making sustainable business practices an integral part of their corporate culture. Companies that receive the SEA are being recognised for the vision they have shown in combining economic and sustainable responsibility.

Presented from the perspectives of a former FBI profiler and a forensic violence-risk expert, *Profiling Violent Crime: A Behavioral and Forensic Approach* educates readers about the nature of criminal profiling including how it works, the techniques it draws on, the types of offenders it applies to, and the psychological make-ups of those offenders. Drawing from technique, as well as from theory and the latest clinical research, *Profiling Violent Crime* delves into precisely what it means to profile. Students learn what it's like to be on the ground as an FBI profiler, dispelling myths and detailing the actual process. Subsequent chapters detail crime scene analysis; determination of the type of offender that may be at work; the fascinating interplay between mental illness and criminality; and breakdowns of the various types of criminal offenders including stalkers, murderers, rapists, mass murderers, and serial killers. The book also offers multiple real-life case examples to shed light further into the criminal mind. Rooted in the authors' personal experience in law enforcement and forensic psychology *Profiling Violent Crime* is an excellent text for courses in criminal justice, psychological profiling, and forensic psychology. It provides readers with real, intimate insight into criminal profiling, addressing its strengths and drawbacks, as well as offering a glimpse of where this crucial field has yet to go.

Educational Research and Innovation Educational Opportunity for All Overcoming Inequality throughout the Life Course Stewart, Tabori, & Chang According to current debates, 'individualization' has frequently been proposed as the conceptual counterpart to 'globalization'. It has often seemed that nothing would be left once these processes have fully unfolded, other than individual human atoms dispersed on a globe without any political, economic or cultural structures. Regardless of whether this description is based on any good and valid observation, nobody drew the conclusion that suddenly emerges as evident after reading Rüdiger Safranski's lucid and timely exploration of the issue: globalization, if it occurs, means a radical change in the human condition. It brings human being in direct confrontation with the world in its totality. Almost unnoticed in broader debate, the scenario of globalization entails a return - in new a radical guise - of the time-honoured question of the ways of being-in-the-world of human beings. In this compelling new book, the philosopher Rüdiger Safranski grapples with the pressing problems of the global age: 'Big Brother' states, terrorism, international security and the seeming impossibility of 'world' peace. He suggests that the era of globalization should not be thought of as that epoch in world history in which all human beings will see themselves in the same, indistinct situation. There will always be, Safranski argues, some need for understanding one's own situation by drawing boundaries and conceptualizing 'otherness' and individuality.

This edited volume uses a 'constructivist/reflexive' approach to address critical infrastructure protection (CIP), a central political practice associated with national security. The politics of CIP, and the construction of the threat they are meant to counter, effectively establish a powerful discursive connection between that the traditional and normal conditions for day-to-day politics and the exceptional dynamics of national security. Combining political theory and empirical case studies, this volume addresses key issues related to protection and the governance of insecurity in the contemporary world. The contributors track the transformation and evolution of critical infrastructures (and closely related issues of homeland security) into a security problem, and analyze how practices associated with CIP constitute, and are an expression of, changing notions of security and insecurity. The book explores aspects of 'securitisation' as well as at practices, audiences, and contexts that enable and constrain the production of the specific form of governmentality that CIP exemplifies. It also explores the rationalities at play, the effects of these security practices, and the implications for our understanding of security and politics today.

Shot, stabbed, and beaten, Miyazaki Manabu somehow emerged intact from his first fifty years to put his astonishing life story down on paper. Born the son of a yakuza boss in 1945, he grew up in a household of gang members and social misfits before his conversion to Marxism launched him into the violent world of 1960s student radicalism. After dropping out of university and spending a brief sojourn in South America, he became a reporter on a fast-rising weekly magazine. Called back home to Kyoto to take over the family demolition business, he was plunged into a maelstrom of

bankruptcy and debt, forcing him to raise funds however he could. Along the way, he became the chief suspect in one of Japan's most sensational criminal cases----still unsolved----before getting caught up in the crazy years of Japan's bubble economy, when land speculators tipped their favorite bar hostesses millions of yen and Dom Perignon flowed like water. More than just one man's incredible story, unflinchingly told, Toppamono is a sophisticated analysis of Japan's postwar half-century that will astound and enlighten. Devastatingly critical of banks and bureaucrats, questioning of Japan's understanding of democracy, and cogent on the role played by the yakuza in Japanese society, this underground best-seller, first published in 1996, will keep you enthralled until the very last page. toppamono n: a person with a devil-may-care attitude, who pushes ahead regardless. *Wer ist wer?* Boydell Press

BEING, in the manner that has been related, compelled to leave Segou, I was conducted the same evening to a village about seven miles to the eastward, with some of the inhabitants of which my guide was acquainted, and by whom we were well received. [7] He was very friendly and communicative, and spoke highly of the hospitality of his countrymen, but withal told me that if Jenné was the place of my destination, which he seemed to have hitherto doubted, I had undertaken an enterprise of greater danger than probably I was apprised of; for, although the town of Jenné was nominally a part of the king of Bambarra's dominions, it was in fact, he said, a city of the Moors-the leading part of the inhabitants being bushreens, and even the governor himself, though appointed by Mansong, of the same sect. Thus was I in danger of falling a second time into the hands of men who would consider it not only justifiable, but meritorious, to destroy me, and this reflection was aggravated by the circumstance that the danger increased as I advanced in my journey, for I learned that the places beyond Jenné were under the Moorish influence in a still greater degree than Jenné itself, and Timbuctoo, the great object of my search, altogether in possession of that savage and merciless people, who allow no Christian to live there. But I had now advanced too far to think of returning to the westward on such vague and uncertain information, and determined to proceed; and being accompanied by the guide, I departed from the village on the morning of the 24th. About eight o'clock we passed a large town called Kabba, situated in the midst of a beautiful and highly cultivated country, bearing a greater resemblance to the centre of England than to what I

should have supposed had been the middle of Africa. The people were everywhere employed in collecting the fruit of shea trees, from which they prepare the vegetable butter mentioned in former parts of this work. These trees grow in great abundance all over this part of Bambarra. They are not planted by the natives, but are found growing naturally in the woods; and in clearing woodland for cultivation every tree is cut down but the shea. The tree itself very much resembles the American oak, and the fruit-from the kernel of which, being first dried in the sun, the butter is prepared by boiling the kernel in water-has somewhat the appearance of a Spanish olive. The kernel is enveloped in a sweet pulp, under a thin green rind; and the butter produced from it, besides the advantage of its keeping the whole year without salt, is whiter, firmer, and, to my palate, of a richer flavour, than the best butter I ever tasted made from cow's milk. The growth and preparation of this commodity seem to be among the first objects of African industry in this and the neighbouring states, and it constitutes a main article of their inland commerce. We passed, in the course of the day, a great many villages inhabited chiefly by fishermen, and in the evening about five o'clock arrived at Sansanding, a very large town, containing, as I was told, from eight to ten thousand inhabitants. This place is much resorted to by the Moors, who bring salt from Berroo, and beads and coral from the Mediterranean, to exchange here for gold dust and cotton cloth. This cloth they sell to great advantage in Berroo, and other Moorish countries, where, on account of the want of rain, no cotton is cultivated.
