Taylor's 50 Best Perennials for Shade Timber Press

In this exquisitely lush volume, lifestyle legend Carolyne Roehm celebrates her gardens as outdoor living rooms, revealing how she chooses the plants, flowers, and layouts; how she entertains guests with gorgeous table settings and breathtaking arrangements; and how she savors the hours among the blooms. As Carolyne Roehm says, "It's as simple as this: a garden is like love...a place you venture into with hope, energy, excitement, enchantment, and the greatest of expectations." For Roehm, the garden has always been more than a canvas for beauty. A place where her devoted efforts bear glorious results, the garden is not only a reflection of what has inspired Roehm, but also a font of inspiration from which she draws—for her astonishingly lovely arrangements, her gracious dinner parties, and her new passion for interpreting her flowers in vibrant watercolor paintings. Each of the gardens at her historic Connecticut home, Weatherstone,

has been lovingly crafted to serve as an outdoor living room, where the hours may be passed at work, alone, or enjoyed with company. In the Parterre Gardens bordering the south side of the home, Roehm created a fantasy of snow in spring with white tulips and Sargentina crabapple trees. All of the varieties in her Rose Garden were selected for their pulchritude and divine scent, as well as for their ability to bloom twice to satisfy her insatiable thirst for roses. And when the stream through her property offered only an unsatisfying trickle, Roehm replaced it with a river of hostas, primula, bleeding hearts, and Rodgersia that sweeps through her Shade Garden. As Roehm accompanies us on the first-ever tour of these marvels, she shares witty and candid stories of the unexpected triumphs and the sometimes-crushing defeats. And always, there is her desire to return to the garden—to tend, to mend, or to plant anew. A garden is like love, Roehm claims, and indeed, this lavishly illustrated volume is a testament to an enduring, complex, unquestionably personal, and deeply passionate amour.

Most gardens have shady spots, but some gardens have a real shade ‘problem’. Whether it is caused by large or overhanging trees, tall buildings, or just being on the ‘wrong side of the street’, finding the best plants for a shady area can be challenging, particularly if the rest of your garden basks in sunshine all year round. Shade plants are not necessarily tropical, although many tropical plants thrive in shade. Some delicate leafy plants will scorch and burn in hot sun, some plants like shady conditions but not damp soil, while others grow happily in damp, boggy ground that receives minimum sunlight. Gardening in the Shade examines the different types of shade and the effect it has on plant growth. It presents solutions to common problems such as feeding, watering and mulching shade plants, and how to deal with exacerbating factors such as wind, frost and soil type. Popular shade plants, like clivias, bromeliads, fuchsias and ferns are given special features, and a directory of species lists plants under headings like ground covers, tropical-looking perennials, and succulents.

Shade Rodale

A masterpiece, full of charm and humor." --Dr. Rebecca W. Dolan, Director, Friesner Herbarium, Butler University Whether it's urban, suburban, or rural, nearly every property has some shade, if only on the north side of the house. Countless more are "blessed" with giant trees planted decades ago that screen out the sunlight. Under such conditions, you may think that it's impossible to have an interesting garden without a lot of work. Not so if you are willing to learn about the plethora of easygoing horticultural gems that don't require full sun. Most gardeners think only of impatiens and hostas for their shady areas, but shade gardening can be far more interesting, and even exciting--and you need not work too hard at it if you incorporate some lesser-known but easy-to-grow plants into your landscape. Judiciously mixing the common plants with the more unusual ones can help the busy, tired, or lazy gardener create a special and unique retreat. Carolyn Harstad, author of the best-selling *Go Native!*, organizes this book around the principle that an interesting shade garden is well balanced and has a variety of plantings. Early chapters focus on designing the low-maintenance garden. Further chapters discuss small trees, shrubs, dwarf conifers, vines, ground covers, ferns, grasses, perennials, woodland wildflowers, spring bulbs, and annuals (yes, there are annuals that enjoy shade!). She discusses hundreds of shade-tolerant plants hardy in Zones 4-8, suggests how they may be used and combined, and recommends methods to reduce garden maintenance--a universal concern in this fast-paced world. With its informative text, accurate drawings, and colorful photographs, this book is a "must have" for gardeners across much of North America.
