Minding My Mitochondria HarperTeen In this book Eve Rosenhaft examines the involvement of Communists in political violence during the years of Hitler's rise to power in Germany

(1929-33). Specifically, she aims to account for their participation in 'street-fighting' or 'gang-fighting' with National Socialist storm-troopers. The origins of this conflict are examined at two levels. First Dr Rosenhaft analyses the official policy of the Communist Party towards fascism and Nazism, and the special anti-fascist and self-defence organizations which it

developed. Among the aspects of Communist policy that are explored are the relation between the international confrontation between Communists and Social Democrats as claimants to lead the left, and the implications of this dispute in German politics; the ideological difficulties in the implementation of Communist policy in a period of economic dislocation; and the

organizational problems posed by the fight against fascism. Dr Rosenhaft then explores the attitudes and experience of the Communist rank and file engaged in the struggle against fascism, concentrating on the city of Berlin, where a fierce contest for control of the streets was waged.

advocate and 2019 Kiwibank New Zealander of the Year Mike King is, in his own words, a 'certified nut'. Since 2009, Mike has hosted the hugely popular Nutters Club show, now on NewstalkZB, as well as the TV programme of the same name, and as 'Head Nut' has seen the Club expand into an online community with a vast and loyal following. The Nutters Club deals with all the tough stuff

that many would prefer to keep in the closet — mental health issues like anxiety and depression, drug and alcohol addiction, eating disorders, rape and sexual abuse — as told by real people sharing their life experiences to help others discover coping mechanisms, recovery and hope, in a way that is non-preachy and easy to understand. This book shares eleven

of those stories, along with insights into Mike King's own story and his battle with depression, drugs and alcohol. Candid and compelling, The Nutters Club is as relevant today as when it was first published in 2011. Enjoy!

Diabetes. Its Medical and Cultural History covers the history of scientific inquiry into

this affliction from antiquity to the discovery of insulin (1921) with concurrent consideration of the history of the patient and the cultural historical background. The reprints of medical historical studies discuss general relationships as well as specific details and exceptional research achievements of the past. Included in the bibliography of primary

sources are the most important historical contributions in diabetic research and diabetic therapy with the author's name and information on the place of publication. The bibliography of secondary literature consolidates international studies from the past century to the present on the history of the theory of diabetes and therapeutic approaches. The second  
session  
concerned the  
changing  
nature of  
discovery,

learning and innovation, driven by the changing needs of society, government policy and technology. The third session focused on the complex issues of the cost, price and value of higher education, or, more specifically, who benefits and who pays for research universities. The fourth session concerned the particular nature of the changing nature of research

universities in developed countries and the fifth session is tied to a discussion of experiences of building world-class research universities in developing economies. Book jacket.

Homeland meets Marie Lu's Legend in the explosive sequel to Blackout, which #1 New York Times bestselling author Ally Condie called "a thrilling combination of Wells's trademark twists and terror. Fantastic!" It began with a virus. Then a series of attacks erupted across the nation. Now America is at war—and a handful of teens with impossible powers are its

only defense. In *Dead Zone*, Robison Wells delivers his most nail-bitingly tense read yet—and an electrifying conclusion to a two-book series that's perfect for fans of *The Maze Runner* and *I Am Number Four*.

Germany's economic miracle is a widely-known phenomenon, and the world-leading, innovative

products and services associated with German companies are something that others seek to imitate. In *The 'Made in Germany' Champion Brands*, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a

nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are

amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurs hip and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations,

the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurs hip; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an

interest in Germany from emerging industrial economies will learn something of the secrets of German success. **On the Mountain of the Lord** Tz Press East German science fiction enabled its authors to create a subversive space in another time and place. One of the country's most popular genres, it outlined futures that often went beyond the party's official

version. Many utopian stories provided a corrective vision, intended to preserve and improve upon East German communism. This study is an introduction to East German science fiction. The book begins with a chapter on German science fiction before 1949. It then spans the entire existence of the country (1949-1990) and outlines key topics essential to understanding the genre:

popular literature, socialist realism, censorship, fandom, and international science fiction. An in-depth discussion addresses notions of high and low literature, elements of the fantastic and utopia as critical narrative strategies, ideology and realism in East German literature, gender, and the relation between literature and science. Through a close textual

analysis of three science fiction novels, the author expands East German literary history to include science fiction as a valuable source for developing a multi-faceted understanding of the country's short history. Finally, an epilogue notes new titles and developments since the fall of the Berlin Wall.

Since empirical research on domestic violence began in the

1970s, it has become clear that without intervention, significant percentages of domestic violence cases escalate into more serious incidents. However, with the exception of cases resulting in homicides, there are no reliable criminal justice statistics that document the rates of serious domestic violence incidents. What, then, are the most effective means--in terms of

safety and cost--of protecting victims? Featuring writings from noted contributors, *Do Arrests and Restraining Orders Work?* grapples with the markedly different results of research and analyses on the effectiveness of arrests and restraining orders. This probing volume examines the proper role of arrest and the degree to which the criminal justice system

can rely on restraining orders to prevent domestic and other kinds of violence. Representing a wide array of research methods, the chapters include a variety of perspectives, including those from police, prosecutors, the judiciary, and probation officers. Timely and provocative, *Do Arrests and Restraining Orders Work?* asks the challenging questions that will help the

criminal justice system move toward effective solutions. This volume is an excellent resource for students as well as researchers and academics in criminology and for a wide array of criminal justice professionals, including police management personnel, attorneys, and policymakers. Blackout Routledge For 40 years, since Deeper Man was first published, it has been

widely recognised as one of the most reliable and cogent presentations of the 'work ideas' associated with Gurdjieff and the 'fourth way'. Bennett devoted himself to making the ideas accessible to as wide a range of people as possible. He was always finding new ways of communicating what he saw as critically important: that people should become

convinced of the reality of higher worlds but not regard them as far away, only of concern for rare, exceptional people. Based on some of the last lectures Bennett gave before his death in 1974, Deeper Man represents only half of what he hoped to include in a book he envisaged ('Dig Deeper, Man!'). Even so, it ranges far and wide and includes a radical, new understanding of what

<p>Gurdjieff meant by the 'centres' in man. The book we have here, hopefully, expresses something of the great generosity of spirit which was a feature of this extraordinary man.</p> <p><u>The Nutters Club</u></p> <p>University of Minnesota Human Rights Center</p> <p>Acclaimed for her 1928 novel <i>A Lantern in Her Hand</i>, Bess Streeter Aldrich became one of the most widely read</p>	<p>interpreters of the prairie pioneer experience. In 1935, she published her masterpiece, <i>Spring Came on Forever</i>, a novel of two Nebraska pioneer families from settlement to the 1930s. Elsewhere an artist of the romance, here Aldrich turns romance on its head. The heroine is Amalia Holmsdorfer, one of a band of German immigrants who settle on the prairie. From her late teens to her mid-eighties</p>	<p>she confronts and defeats the forces of nature and society that discourage or ruin others. Her life might be a modest triumph but for one detail: she married the wrong man. Quickly paced and precisely drawn, this novel is Aldrich's greatest tribute to the complexity, humor, endurance, and intelligence of the people who settled the prairie.  A magisterial history of the artists and writers who left Weimar when the Nazis came to power In 1933 thousands of intellectuals, artists, writers, militants and other opponents of the Nazi regime fled Germany. They were, in the words of Heinrich Mann, "the best of Germany," refusing to remain

citizens in this new state that legalized terror and brutality. Exiled across the world, they continued the fight against Nazism in prose, poetry, painting, architecture, film and theater. Topic Book 8, Human Rights Education Series, 2015 In TOWARDS A JUST SOCIETY twenty-five educators from around the world respond to the question: How and why did you commit yourself to human rights education? Their highly personal narratives recount the diverse ideological perspectives and life experiences that have shaped their work in this growing field." Encyclopedia of Domestic

Violence Indiana University Press One of the most important texts of modern times, Herbert Marcuse's analysis and image of a one-dimensional man in a one-dimensional society has shaped many young radicals' way of seeing and experiencing life. Published in 1964, it fast became an ideological bible for the emergent New Left. As Douglas Kellner notes

in his introduction, Marcuse's greatest work was a 'damning indictment of contemporary Western societies, capitalist and communist.' Yet it also expressed the hopes of a radical philosopher that human freedom and happiness could be greatly expanded beyond the regimented thought and behaviour prevalent in established society. For those who held the

reigns of power Marcuse's call to arms threatened	civilization to its very core. For many others	however, it represented a freedom hitherto unimaginable.
