For all its recent popularity among poets and critics, prose poetry continues to raise more questions than it answers. How have prose poems been identified as such, and why have similar works been excluded from the genre? What happens when we read a work as a prose poem? How have prose genres such as the novel affected prose poetry and modern poetry in general? In *Invisible Fences* Steven Monte places prose poetry in historical and theoretical perspective by comparing its development in the French and American literary traditions. In spite of its apparent formal

freedom, prose poetry is constrained by specific historical circumstances and is constantly engaged in border disputes with neighboring prose and poetic genres. Monte illuminates these constraints through an examination of works that have influenced the development of the prose poem as well as through a discussion of genre theory and detailed readings of poems ranging from Charles Baudelaire's "La Solitude" to John Ashbery's "The System." Monte explores the ways in which literary-historical narratives affect interpretation: why, for example, prose poetry tends to be seen as a revolutionary genre and how this perspective influences readings of individual works. The American poets he discusses include Ralph Waldo Emerson, William Carlos Williams, T. S. Eliot, Gertrude Stein, and Ashbery; the French poets range from Baudelaire,

Arthur Rimbaud, and Stephane Mallarmé to Max Jacob. In exploring prose poetry as a genre, *Invisible Fences* offers new perspectives not only on modern poetry, but also on genre itself, challenging current theories of genre with a test case that asks for yet eludes definition.

Between 1750 and his death in 1781, the Marquis de Marigny?brother of Madame de Pompadour, courtier to Louis XV, and one of eighteenth-century

France's important patrons of art and architecture? amassed a collection that was broad in scope, progressive in taste, and exceptional in quality and provenance. This book offers a transcription of the exhaustive inventory of Marigny's estate together with an essay in which Alden R. Gordon not only sketches Marigny's life and times but also re-creates the interiors and grounds where the paintings, statues, books, household goods, and other property listed in the inventory were displayed and used. Also included are plans of Marigny's last four residences; lists of heirs, paintings, and auction sales; transcriptions of shipping manifests and sales catalogs; indexes; and a glossary.

Mondadori Education This book features an extraordinary album of ornament designs by the French architect Gilles-Marie Oppenord (1672-1742). For the first time, this publication reproduces in their initial state the embellishments Oppenord drew over the first French edition of Cesare Ripa's *Iconologia*. In lieu of a haphazard succession of sketches, it reveals Oppenord's fascinating interplay between text, engraved and drawn images, one

patterned on the art of conversation and the linguistic games cultivated in elite Parisian circles.

L'Histoire de France, Depuis le XIIIe Siècle Jusqu'à la Fin du XVIIIe L'AGE D'HOMME Among the more interesting incunabula preserved in the Salle de la Réserve of the Bibliothèque National in Paris are the apparently unique copies of two editions, very similar in content, of a work entitled Les Adevineaux amoureux. In much more comprehensive form Les Adevineaux amoureux is preserved in a manuscript belonging to the Musée Conde at Chantilly. All three texts, in medieval French, appear to date from the 1470s. The present work, Amorous Games, is a critical edition of Les Adevineaux amoureux. Amorous Games is a miscellany whose principal unifying force is the compiler's aim to provide a manual of conversation and entertainment for polite society. Included are series of questions and answers belonging to the well-established medieval tradition of the "Demandes amoureuses"; a very large number of riddles, mainly folk riddles; and "venditions en amours," little poems that apparently came into being as part of a social game. Students of

medieval French literature, particularly those with a penchant for some of the minor genres, will find new material in the Amorous Games. Folklorists will discover what is probably the largest collection of riddles bequeathed to us by medieval France and also much that is of value to specialists in the proverb and folk tale. For this critical edition of *Les Adevineaux amoureux* Professor Hassell has selected the Chantilly manuscript, because it is the most complete and also because it had not yet been published. The Appendix contains the text of the more complete of the two incunabula and the significant variants appearing in the other fifteenth-century printed edition. The manuscript text has been collated with that of the incunabula, and copious notes and an index to the riddles have been supplied. In his introduction Professor Hassell discusses in detail the major classes and subclasses of the riddle, drawing on the work of Petsch, Taylor, Abrahams, and other scholars of the genre.

Containing the edited research papers resulting from an ambitious, cross-disciplinary research project, this volume examines the spatiality of virtual inhabited 3D worlds - virtual reality and cyberspace. (Three other volumes look at Interaction, Staging and Methodology.) It is about the communication spaces emerging at the Internet and supported by special 3D interfaces. It is also about the virtual spaces created by virtual reality hardware (CAVEs, panoramic screens, head mounted display systems etc.) and software. *Virtual Space: Spatiality in Virtual Inhabited 3D Worlds* is interdisciplinary. It deals with philosophical, psychological, communicational, technological and aesthetic aspects of space. While philosophy raises the question concerning the ontology of space - what is space - psychology deals with our perception of space. Communication theory looks at the way in which space supports communication (i.e. that space is a medium for communication), and finally aesthetic analyses exemplify the use of virtual space in virtual

cities, in museums and in art.
