And the Trees Crept In W. W. Norton & Company

Finalist for the 2023 Pulitzer Prize in General Nonfiction and the 2023 PEN/E.O. Wilson Literary Science Writing Award Winner of the Acoustical Society of America's 2023 Science Communication Award "[A] glorious guide to the miracle of life's sound." —The New York Times Book Review A lyrical exploration of the diverse sounds of our planet, the creative processes that produced these marvels, and the perils that sonic diversity now faces We live on a planet alive with song, music, and speech. David Haskell explores how these wonders came to be. In rain forests shimmering with insect sound and swamps pulsing with frog calls we learn about evolution's creative powers. From birds in the Rocky Mountains and on the streets of Paris, we discover how animals learn their songs and adapt to new environments. Below the waves, we hear our kinship to beings as different as snapping shrimp, toadfish, and whales. In the startlingly divergent sonic vibes of the animals of different continents, we experience the legacies of plate tectonics, the deep history of animal groups and their movements around the world, and the quirks of aesthetic evolution. Starting with the origins of animal song and traversing the whole arc of Earth history, Haskell illuminates and celebrates the emergence of the varied sounds of our world. In mammoth ivory flutes from Paleolithic caves, violins in modern concert halls, and electronic music in earbuds, we learn that human music and

language belong within this story of ecology and evolution. Yet we are also destroyers, now silencing or smothering many of the sounds of the living Earth. Haskell takes us to threatened forests, noise-filled oceans, and loud city streets, and shows that sonic crises are not mere losses of sensory ornament. Sound is a generative force, and so the erasure of sonic diversity makes the world less creative, just, and beautiful. The appreciation of the beauty and brokenness of sound is therefore an important guide in today's convulsions and crises of change and inequity. *Sounds Wild and Broken* is an invitation to listen, wonder, belong, and act.

When Silla and Nori arrive at their aunt's home, it's immediately clear that the "blood manor" is cursed. The creaking of the house and the stillness of the woods surrounding them would be enough of a sign, but there are secrets too--the questions that Silla can't ignore: Who is the beautiful boy that's appeared from the woods? Who is the man that her little sister sees, but no one else? And why does it seem that, ever since they arrived, the trees have been creeping closer? Filled with just as many twists and turns as *The Dead House*, and with achingly beautiful, chilling language that delivers haunting scenes, *AND THE TREES CREPT IN* is the perfect follow-up novel for master horror writer Dawn Kurtagich.

The Giving Tree Greystone Books Ltd

NEW YORK TIMES BEST SELLER • From the world's leading forest ecologist who forever changed how people view trees and their connections to one another and to other living things in the forest—a moving, deeply personal journey of discovery Suzanne Simard is a pioneer on the frontier of plant

communication and intelligence; her TED talks have been viewed by more than 10 million people worldwide. In this, her first book, now available in paperback, Simard brings us into her world, the intimate world of the trees, in which she brilliantly illuminates the fascinating and vital truths—that trees are not simply the source of timber or pulp, but are a complicated, interdependent circle of life; that forests are social, cooperative creatures connected through underground networks by which trees communicate their vitality and vulnerabilities with communal lives not that different from our own. Simard writes—in inspiring, illuminating, and accessible ways—how trees, living side by side for hundreds of years, have evolved, how they learn and adapt their behaviors, recognize neighbors, compete and cooperate with one another with sophistication, characteristics ascribed to human intelligence, traits that are the essence of civil societies—and at the center of it all, the Mother Trees: the mysterious, powerful forces that connect and sustain the others that surround them. And Simard writes of her own life, born and raised into a logging world in the rainforests of British Columbia, of her days as a child spent cataloging the trees from the forest and how she came to love and respect them. And as she writes of her scientific quest, she writes of her own journey, making us understand how deeply human scientific inquiry exists beyond data and technology, that it is about understanding who we are and our place in the world.

The Magic & Mystery of Trees takes children on a fascinating journey of exploration, showing them just how special these mighty organisms are. Discover how they communicate and warn each other of predators, how they nurture their networks, record the past, and anticipate the future to ensure their survival. Learn amazing tree facts, meet extraordinary trees from around the world and learn about the habitats they create. Find out what trees do for us and how to make your community a greener place by planting your very own tree!

The Humane Gardener Greystone Books Ltd

In this eloquent plea for compassion and respect for all species, journalist and gardener Nancy Lawson describes why and how to welcome wildlife to our backyards. Through engaging anecdotes and inspired advice, profiles of home gardeners throughout the country, and interviews with scientists and horticulturalists, Lawson applies the broader lessons of ecology to our own outdoor spaces. Detailed chapters address planting for wildlife by choosing native species; providing habitats that shelter baby animals, as well as birds, bees, and butterflies; creating safe zones in the garden; cohabiting with creatures often regarded as pests; letting nature be your garden designer; and encouraging natural processes and evolution in the garden. The Humane Gardener fills a unique niche in describing simple principles for both attracting wildlife and peacefully resolving conflicts with all the creatures that share our world.

Celebrate Earth Day with Dr. Seuss and the Lorax in this classic picture book about protecting the environment! I am the Lorax. I speak for the trees. Dr. Seuss's beloved story teaches kids to speak up and stand up for those who can't. With a recycling-friendly "Go Green" message, The Lorax allows young readers to experience the beauty of the Truffula Trees and the danger of taking our earth for granted, all in a story that is timely, playful and hopeful. The book's final pages teach us that just one small seed, or one small child, can make a difference. This book is the perfect gift for Earth Day and for any child—or child at heart—who is interested in recycling, advocacy and the environment, or just loves nature and playing outside. Unless someone like you cares a whole awful lot, nothing is going to get better. It's not.

Thoreau and the Language of Trees Knopf

Winner of the Pulitzer Prize in Fiction Winner of the William Dean Howells Medal Shortlisted for the Man Booker Prize Over One Year on the New York Times Bestseller List A New York Times Notable Book and a Washington Post, Time, Oprah Magazine, Newsweek, Chicago Tribune, and Kirkus Reviews Best Book of the Year "The best novel ever written about trees, and really just one of the best novels, period." —Ann Patchett The Overstory, winner of the 2019 Pulitzer Prize in Fiction, is a sweeping, impassioned work of activism and resistance that is also a stunning evocation of—and paean to—the natural world. From the roots to the crown and back to the seeds, Richard Powers's twelfth novel unfolds in concentric rings of interlocking fables that range from antebellum New York to the late twentieth-century Timber Wars of the Pacific Northwest and beyond. There is a world alongside ours—vast, slow, interconnected, resourceful, magnificently inventive, and almost invisible to us. This is the story of a handful of people who learn how to see that world and who are drawn up into its unfolding catastrophe.

Rip Van Winkle, and The Legend of Sleepy Hollow Greystone Books

Finalist for the Pulitzer Prize and the PEN/E.O. Wilson Literary Science Writing Award "Injects much-needed vibrancy into the stuffy world of nature writing." —Outside, "The Outdoor Books That Shaped the Last Decade" The biologist and author of Sounds Wild and Broken combines elegant writing with scientific expertise to reveal the secret world hidden in a single square meter of old-growth forest In this wholly original book, biologist David Haskell uses a one-square-meter patch of old-growth Tennessee forest as a window onto the entire natural world. Visiting it almost daily for one year to trace nature's path through the seasons, he brings the forest and its inhabitants to vivid life. Each of this book's short chapters begins with a simple observation: a salamander scuttling across the leaf litter; the first blossom of spring wildflowers. From these, Haskell spins a brilliant web of biology and ecology, explaining the science that binds together the tiniest microbes and the largest mammals and describing the ecosystems that have cycled for thousands- sometimes millions-of years. Each visit to the forest presents a nature story in miniature as Haskell elegantly teases out the intricate relationships that order the creatures and plants that call it home. Written with remarkable grace and empathy, The Forest Unseen is a grand tour of nature in all its profundity. Haskell is a perfect guide into the world that exists beneath our feet and beyond our backyards.

As The Giving Tree turns fifty, this timeless classic is available for the first time ever in ebook format. This digital edition allows young readers and lifelong fans to continue the legacy and love of a classic that will now reach an even wider audience. "Once there was a tree...and she loved a little boy." So begins a story of unforgettable perception, beautifully written and illustrated by the gifted and versatile Shel Silverstein. This moving parable for all ages offers a touching interpretation of the gift of giving and a serene acceptance of another's capacity to love in return. Every day the boy would come to the tree to eat her apples, swing from her branches, or slide down her trunk...and the tree was happy. But as the boy grew older he began to want more from the tree, and the tree gave and gave and gave. This is a tender story, touched with sadness, aglow with consolation. Shel Silverstein's incomparable career as a bestselling children's book author and illustrator began with Lafcadio, the Lion Who Shot Back. He is also the creator of picture books including A Giraffe and a Half, Who Wants a Cheap Rhinoceros?, The Missing Piece, The Missing Piece Meets the Big O, and the perennial favorite The Giving Tree, and of classic poetry collections such as Where the Sidewalk Ends, A Light in the Attic, Falling Up, Every Thing On It, Don't Bump the Glump!, and Runny Babbit. And don't miss the other Shel Silverstein ebooks, Where the Sidewalk Ends and A Light in the Attic!

The Things They Carried Dorling Kindersley Ltd

Sunday Times Bestseller' A paradigm-smashing chronicle of joyous entanglement' Charles Foster Waterstones Non-Fiction Book of the Month

(September) Are trees social beings? How do trees live? Do they feel pain or have awareness of their surroundings?

Finding the Mother Tree University of Georgia Press

This book marks a powerful return to the forest, where trees have heartbeats and roots are like brains that extend underground, where the colour green calms us and the forest sharpens our senses. In The Heartbeat of Trees, renowned forester Peter Wohlleben draws on new scientific discoveries to show how humans are deeply connected to the natural world. In an era of cell-phone addiction, climate change and urban life, many of us fear that we've lost our connection to nature. But Wohlleben is convinced that the age-old ties linking humans to the forest remain alive and intact. Drawing on science and cutting-edge research, The Heartbeat of Trees reveals the profound interactions humans can have with nature, exploring the language of

the forest, the consciousness of plants and the eroding boundary between flora and fauna. A perfect book to take with you into the woods, *The Heartbeat of Trees* will help you see, feel, smell, hear and even taste the forest. Peter Wohlleben, renowned for his ability to write about trees in an engaging way, reveals a wondrous cosmos where humans are a part of nature, and where conservation and environmental activism is not just about saving trees—it's about saving ourselves, too.

Can You Hear the Trees Talking? HarperCollins UK

Trees were central to Henry David Thoreau's creativity as a writer, his work as a naturalist, his thought, and his inner life. His portraits of them were so perfect, it was as if he could see the sap flowing beneath their bark. When Thoreau wrote that the poet loves the pine tree as his own shadow in the air, he was speaking about himself. In short, he spoke their language. In this original book, Richard Higgins explores Thoreau's deep connections to trees: his keen perception of them, the joy they gave him, the poetry he saw in them, his philosophical view of them, and how they fed his soul. His lively essays show that trees were a thread connecting all parts of Thoreau's being—heart, mind, and spirit. Included are one hundred excerpts from Thoreau's writings about trees, paired with over sixty of the author's photographs. Thoreau's words are as vivid now as they were in 1890, when an

English naturalist wrote that he was unusually able to "to preserve the flashing forest colors in unfading light." Thoreau and the Language of Trees shows that Thoreau, with uncanny foresight, believed trees were essential to the preservation of the world.

A house shrouded in time. A line of women with a heritage of loss. As a young bride, Susannah Page was rumored to be a Civil War spy for the North, a traitor to her Virginian roots. Her great-granddaughter Adelaide, the current matriarch of Holly Oak, doesn't believe that Susannah's ghost haunts the antebellum mansion looking for a pardon, but rather the house itself bears a grudge toward its tragic past. When Marielle Bishop marries into the family and is transplanted from the arid west to her husband's home, it isn't long before she is led to believe that the house she just settled into brings misfortune to the women who live there. With Adelaide's richly peppered superstitions and deep family roots at stake, Marielle must sort out the truth about Susannah Page and Holly Oak— and make peace with the sacrifices she has made for love.
