The #1 New York Times bestseller and the true story behind the film: A rugby team resorts to the unthinkable after a plane crash in the Andes. Spirits were high when the Fairchild F-227 took off from Mendoza, Argentina, and headed for Santiago, Chile. On board were forty-five people, including an amateur rugby

team from Uruguay and their friends and family. The skies were clear that Friday, October 13, 1972, and at 3:30 p.m., the Fairchild's pilot reported their altitude at 15,000 feet. But one minute later, the Santiago control tower lost all contact with the aircraft. For eight days, Chileans, Uruguayans, and Argentinians searched for it, but snowfall in the Andes had been heavy, and the odds of locating any wreckage were slim. Ten weeks later, a Chilean peasant in a remote valley noticed two haggard men desperately gesticulating to him from across a river. He threw them a pen and

paper, and the note they tossed back read: "I come from a plane that fell in the mountains . . ." Sixteen of the original forty-five passengers on the F-227 survived its horrific crash. In the remote glacial wilderness, they camped in the plane's fuselage, where they faced freezing temperatures, life-threatening injuries, an avalanche, and imminent starvation. As their meager food supplies ran out, and after they heard on a patched-together radio that the search parties had been called off, it seemed like all hope was lost. To save their own lives, these men and women not only had to keep their faith, they had to make an impossible decision: Should they eat the flesh of their dead friends? A remarkable story of endurance and determination, friendship and the human

spirit, *Alive* is the dramatic bestselling account of one of the most harrowing quests for survival in modern times.

With this significant new work, Larry Cuban provides a unique and insightful perspective on the bridging of the long-standing and well-known gap between teachers and administrators. Drawing on the literature of the field as well as personal experience, Cuban recognizes the enduring structural relationship within school organizations inherited by teachers, principals, and superintendents, and calls for a renewal of their sense of common purpose regarding the role of schooling in a democratic society. Cuban analyzes the dominant images (moral and technical),

roles (instructional, managerial, and political), and contexts (classroom, school, and district) within which teachers, principals, and superintendents have worked over the last century. He concludes that when these powerful images and roles are wedded to the structural conditions in which schooling occurs, "managerial behavior" results, thus narrowing the potential for more thoughtful, effective, and appropriate leadership. Cuban then turns to consider this situation with respect to the contemporary movement for school reform, identifying significant concerns both for policymakers and practitioners. This honest, thought-provoking book by a leading scholar, writer, and practitioner in the field represents an invaluable resource—an

insightful introduction for those just entering the field and a fresh, new perspective for those long-familiar with its complexities. Cuban's ethnographic approach to the development of his own career and viewpoint, as well as his highly readable style, make this a work of lasting value.

Dental caries is a multi factorial, bacterial, chronic infection that affects millions of people in the world and has become a public health problem. Also referred to as tooth decay, this disease is one of the most common disorders throughout the world, second only to the common cold. Dental caries is the most common chronic childhood disease in

the United States and is 5 to 7 times more common than asthma. According to the World Oral Health Report in 2003, dental caries affect 60-80% of school children and a vast majority of adults. Dental caries is a chronic bacterial infection of the hard tissue of the tooth that is characterized by alternating phases of demineralization and remineralization. Dental decay can lead to significant pain and dysfunction that can interfere with basic functions such as eating, sleeping, and speaking. If left untreated, dental caries can result in cavities forming and, eventually, tooth loss. Although the prevalence and severity of dental caries has decreased over the years, this disease can be controlled better with proper fluoride exposure. Fluoride dentifrices have been

shown in numerous clinical trials to be effective anticaries agents and have been recognized as a major cause of the remarkable decline in caries prevalence in many developed countries. Dentifrices have been widely adopted around the world as the principle means of delivering topical fluoride and obtaining caries preventive benefits. Although there is documented literature on the use of topical fluorides, the issue needs to be further researched based on the recent documented literature and guidelines regarding use of topical fluorides. Hence, the present review was conducted with the aim to review the available literature on the use and effectiveness of different topical fluorides used in dentistry.

*Social Studies for Secondary Schools*

### Wiley-Blackwell

Now in its 4th edition, this popular text for secondary social studies methods courses integrates discussions of educational goals and the nature of history and social studies with ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme throughout is that what teachers choose to teach and the way they teach reflect their broader understanding of society, history, and the purpose of social studies education. Advocating an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers, and based in practice and experience, it offers systematic support and open, honest advice for new teachers. Each chapter addresses a broad question

about social studies education; sub-chapters begin with narrower questions that direct attention to specific educational issues. Lesson ideas and materials in the book and online are especially designed to help new teachers to address common core learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms. Chapters include highlighted Learning Activities, Teaching Activities, and Classroom Activities designed to provoke discussion and illustrate different approaches to teaching social studies, and conclude with recommendations for further reading and links to on-line essays about related social studies topics. Activities are followed by four categories: "Think it over," "Add your

voice to the discussion," "Try it yourself," and "It's your classroom." All of these are supported with online teaching material. Designed for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice. New in the Fourth Edition Provides a number of new lesson ideas paired with online lesson plans and activity sheets in every chapter Takes a new focus on data-driven, standards-based instruction, especially in relation to the common core curriculum Addresses the interactive nature of learning in updated technology sections

Reflects current trends in history education Includes more of what the author has learned from working teachers Offers a wealth of additional on-line material linked to the text

Repair of Concrete Structures Edward Elgar Publishing  
In this major book Martha Nussbaum,

one of the most innovative and influential philosophical voices of our time, proposes a kind of feminism that is genuinely international, argues for an ethical underpinning to all thought about development planning and public policy, and dramatically moves beyond the abstractions of economists and philosophers to embed thought about justice in the concrete reality of the struggles of poor women. Nussbaum argues that international political and economic thought must be sensitive to gender difference as a problem of justice, and that feminist thought must begin to focus on the problems of women in the third world. Taking as her point of departure the predicament of poor women in India, she shows how philosophy should undergird basic

constitutional principles that should be respected and implemented by all governments, and used as a comparative measure of quality of life across nations.

The 2020 edition of The State of World

Fisheries and Aquaculture has a particular focus on sustainability. This reflects a number of specific considerations. First, 2020 marks the twenty-fifth anniversary of the Code of Conduct for Responsible Fisheries (the Code). Second, several Sustainable Development Goal indicators mature in 2020. Third, FAO hosted the International Symposium on Fisheries Sustainability in late 2019, and fourth, 2020 sees the finalization of specific FAO guidelines on sustainable aquaculture growth, and on social sustainability along value chains. While Part 1 retains the format of previous editions, the structure of the rest of the publication has been revised. Part 2 opens with a special section marking the twenty fifth anniversary of the Code. It also focuses

on issues coming to the fore, in particular, those related to Sustainable Development Goal 14 and its indicators for which FAO is the “custodian” agency. In addition, Part 2 covers various aspects of fisheries and aquaculture sustainability. The topics discussed range widely, from data and information systems to ocean pollution, product legality, user rights and climate change adaptation. Part 3 now forms the final part of the publication, covering projections and emerging issues such as new technologies and aquaculture biosecurity. It concludes by outlining steps towards a new vision for capture fisheries. The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to-date information to a wide audience –

policymakers, managers, scientists, stakeholders and indeed everyone interested in the fisheries and aquaculture sector.
