A Guide to the Katydid's of Australia
National Geographic Books
In a detective story set against the
backdrop of Hemingway's Cuba, the
discovery of the skeletal remains of the
victim of a forty-year-old murder on the
Havana estate of Ernest Hemingway,
draws ex-cop Mario Conte back into the
game to investigate a crime with roots in

Hemingway's Cuba four decades earlier.

Although rarely distinguished from the
detective story, the crime novel offers
readers a quite different experience. In
the detective novel, a sympathetic
detective figure uses reason and
intuition to solve the puzzle, restore
order, and reassure readers that "right"
will always prevail. In the crime novel, by

contrast, the "hero" is either the killer, the victim, a guilty bystander, or someone falsely accused, and the crime may never be satisfactorily solved. These and other fundamental differences are set out by Tony Hilfer in *The Crime Novel*, the first book that completely defines and explores this popular genre. Hilfer offers convincing evidence that the crime novel should be regarded as a genre distinct from the detective novel, whose conventions it subverts to develop conventions of its own. Hilfer provides in-depth analyses of novels by Georges Simenon, Margaret Millar, Patricia Highsmith, and Jim Thompson. He also treats such British novelists as Patrick Hamilton, Shelley Smith, and Marie Belloc Lowndes, as well as the American novelists Cornell Woolrich,

John Franklin Bardin, James M. Cain, and Fredric Brown. In addition, he defines the distinctions between the American crime novel and the British, showing how their differences correspond to differences in American and British detective fiction. This well-written study will appeal to a general audience, as well as teachers and students of detective and mystery fiction. For anyone interested in the genre, it offers valuable suggestions of "what to read next."

Haltung und Nachzucht von Gespenst-

und Stabschrecken sowie Wandelnden Blättern, die zusammengefasst die Insektenordnung der Phasmatodea bilden und als Phasmiden bezeichnet werden, gewinnen in der Terraristik immer mehr Anhänger. Besonders die Australische Riesengespenstschrecke (*Extatosoma tiaratum*) erfreut sich dank ihres skurrilen Äußeren schon seit längerer Zeit wachsender Beliebtheit und ist unter allen Gespenstschrecken die populärste und am häufigsten im Terrarium gepflegte Art. In der Reihe "Art für Art" bietet sich nun die Möglichkeit, diese interessante und schön anzusehende Gespenstschrecke genauer zu beschreiben und eingehender auf ihre Haltungs- und Nachzuchtbedingungen hinzuweisen, als es in der allgemeinen Phasmidenliteratur

bislang gegeben war, in der die jeweiligen Arten zumeist nur steckbriefartig abgehandelt sind. So vielseitig und unterschiedlich, wie Aussehen und Lebensweise der verschiedenen Phasmidenarten sind, so unterschiedlich sind aber auch die Haltungsbedingungen. Art für Art stellen Ihnen die Bücher dieser Reihe die beliebtesten Terrarientiere vor. Jeder Band bietet Ihnen detaillierte, praxisnahe Pflegeanleitungen und Sie finden alle Informationen, die Sie brauchen, um Ihre Tiere erfolgreich zu vermehren. Alle wichtigen Fragen von der erforderlichen Beckengröße über die Terrarieneinrichtung, die technische Ausstattung, die artgerechte Ernährung bis zur Vorbeugung von Krankheiten werden mit zahlreichen Tricks und

Kniffen beantwortet. Erfahrene, langjährige Züchter verraten, wie Sie die Tiere zur Fortpflanzung bewegen und die Jungtiere gesund aufziehen können. Das alles durchgängig farbig, großzügig bebildert und attraktiv gestaltet nur über Ihr Terrarientier - Art für Art.

'Exquisite...should be read by every gardener in the country' Observer The Garden Jungle is a wonderful introduction to the hundreds of small creatures with whom we live cheek-by-jowl and of the myriad ways that we can

encourage them to thrive. The Garden Jungle is about the wildlife that lives right under our noses, in our gardens and parks, between the gaps in the pavement, and in the soil beneath our feet. Dave Goulson gives us an insight into the fascinating and sometimes weird lives of these creatures, taking us burrowing into the compost heap, digging under the lawn and diving into the garden pond. He explains how our lives and ultimately the fate of humankind are inextricably intertwined with that of earwigs, bees, lacewings and hoverflies, unappreciated heroes of the natural world. A poignant read for anyone who has a garden or cares about our planet.

'Eternal Orang-utan', which would end
up by writing all the known books in the

Considered one of the great artists of the 20th century, Joan Miro has bequeathed us a definitive body of work whose influence has continued to grow over the years. Miro did not paint dreams but instead, through his works, provided the spectator with certain elements so that he would be the one that dreamed. He never worked under the influence of hypnosis, drugs or alcohol. Nevertheless,

his artistic personality and the way he represented on canvas what inspiration dictated to him led André Breton to exclaim: Miro is the most surrealist of us all!! A creative force in the plastic field who felt an equal passion for the word, for the most daring poetic plays, a lover of objects and the bare truth of materials, Miro always revealed himself as an oneiric artist, a seeker after the constellations that inspired some of his finest works. Jacques Dupin the main authority in Miro work details all those items in his amazing essay: *The Birth of Signs*. 72 illustrations
