THE PERSONAL POWER PROGRAM Penguin

Men love shortcuts. If there's a way to accomplish a job quicker and more efficiently, they're all for it. That goes for work and working out. Now, new research shows that as little as 15 minutes of resistance training is just as effective in spiking a man's metabolism—his fat-burning furnace—as a workout lasting more than twice as long. All it takes is 15 minutes to achieve lifelong results—and men are more likely to stick to an exercise plan if it's chopped down to those 15 minutes. The Men's Health Big Book of 15-Minute Workouts contains fast-paced circuit training and interval workouts that boost calorie burn, build muscle, and fry belly fat in half the time of regular workouts. Readers can choose from at-home, body-weight-only workouts and total-body barbell programs to exercises that target major muscle groups—the chest, arms, legs, and back—and sport-specific workouts. Other highlights include: - a special section of 15-minute core workouts to build a rock-hard six-pack - an eating plan with delicious meals that take 15 minutes or less to prepare - workouts for the office or when you're traveling and can't make it to the gym - hundreds of tips from America's best trainers, nutritionists, and exercise scientists

Tracy Anderson's 30-Day Method Victory Belt Publishing

Great athletes make difficult moves look effortless with a combination of skill, strength, and balance. Traditional conditioning builds a fitness base, but modern sports training takes into account athletic movement patterns. *Athletic Body in Balance* is the first guide of its kind to show you how to train for smooth, fluid movement and prevent muscle imbalances, mobility restrictions, stability problems, and injuries. Physical therapist and sports conditioning expert Gray Cook has proven the

effectiveness of his approach through the performances of athletes in the NFL, NBA, NHL, WNBA, and Reebok® University's sports training system. Cook's methods will help you identify functional weaknesses; correct imbalances; explore your potential; and refine sport-specific movement skills such as jumping, kicking, cutting, and turning. You will see where conditioning is breaking down and how to get your body back on track. Whereas other books concentrate on maximizing your strengths, *Athletic Body in Balance* focuses on exposing and overcoming your weaknesses to form a foundation for long-term training gains. Learn how to maintain what you gain and build on your improvements. Make this comprehensive assessment tool your training guide. Prepare and repair your body for ultimate athletic performance with *Athletic Body in Balance*.

From an elite Special Operations physical trainer, an ingeniously simple, rapid-results, do-anywhere program for getting into amazing shape For men and women of all athletic abilities! As the demand for Special Operations military forces has grown over the last decade, elite trainer Mark Lauren has been at the front lines of preparing nearly one thousand soldiers, getting them lean and strong in record time. Now, for regular Joes and Janes, he shares the secret to his amazingly effective regimen—simple exercises that require nothing more than the resistance of your own bodyweight to help you reach the pinnacle of fitness and look better than ever before. Armed with Mark Lauren's motivation techniques, expert training, and nutrition advice, you'll see rapid results by working out just thirty minutes a day, four times a week—whether in your living room, yard, garage, hotel room, or office. Lauren's exercises build more metabolism-enhancing muscle than weightlifting, burn more fat than aerobics, and are safer than both, since bodyweight exercises develop balance and stability and therefore help prevent injuries. Choose your workout level—Basic, 1st Class, Master Class, and Chief Class—and get started, following the clear instructions for 125 exercises that work every muscle from your neck to your ankles. Forget about gym memberships, free weights, and infomercial contraptions. They are all poor substitutes for the world's most advanced fitness machine, the one thing you are never without: your own body.

[The New Rules of Lifting for Women](#) Human Kinetics

In The New Rules of Lifting for Women, authors Lou Schuler, Cassandra Forsythe and Alwyn Cosgrove present a comprehensive strength, conditioning and nutrition plan destined to revolutionize the way women work out. All the latest studies prove that strength training, not aerobics, provides the key to losing fat and building a fit, strong body. This book refutes the misconception that women will "bulk up" if they lift heavy weights. Nonsense! It's tough enough for men to pack on muscle, and they have much more of the hormone necessary to build muscle: natural testosterone. Muscles need to be strengthened to achieve a lean, healthy look. Properly conditioned muscles increase metabolism and promote weight loss -- it's that simple. The program demands that women put down the "Barbie" weights, step away from the treadmill and begin a strength and conditioning regime for the natural athlete in every woman. The New Rules of Lifting for Women will change the way women see fitness, nutrition and their own bodies.
