Recently, social science
has had numerous
episodes of influential
research that was found
invalid when placed under
rigorous scrutiny. The
growing sense that many

published results are
potentially erroneous has
made those conducting
social science research
more determined to
ensure the underlying
research is sound.
Transparent and
Reproducible Social
Science Research is the
first book to summarize
and synthesize new
approaches to combat
false positives and non-

reproducible findings in
social science research,
document the underlying
problems in research
practices, and teach a
new generation of
students and scholars
how to overcome them.
Understanding that social
science research has real
consequences for
individuals when used by
professionals in public
policy, health, law

enforcement, and other fields, the book crystallizes new insights, practices, and methods that help ensure greater research transparency, openness, and reproducibility. Readers are guided through well-known problems and are encouraged to work through new solutions and practices to improve the openness of their research. Created with both experienced and novice researchers in mind, *Transparent and Reproducible Social Science Research* serves

as an indispensable resource for the production of high quality social science research. *Islam in Indonesia* HarperCollins

The History of Futurism: The Precursors, Protagonists, and Legacies addresses the history and legacy of what is generally seen as the founding avante-garde movement of the twentieth century. Geert Buelens, Harald Hendrix, and Monica Jansen have brought together scholarship from an international team of specialists to explore the Futurism movement as a

multidisciplinary movement mixing aesthetics, politics, and science with a particular focus on the literature of the movement.

After interviewing fifty of the world's greatest financial minds and penning the #1 New York Times bestseller *Money: Master the Game*, Tony Robbins returns with a step-by-step playbook, taking you on a journey to transform your financial

life and accelerate your path to financial freedom. No matter your salary, your stage of life, or when you started, this book will provide the tools to help you achieve your financial goals more rapidly than you ever thought possible. Robbins, who has coached more than fifty million people from 100 countries, is the world's #1 life and business strategist. In this book, he teams up with Peter Mallouk, the only man in history to be ranked the #1 financial advisor in the US for three

consecutive years by Barron's. Together they reveal how to become unshakeable--someone who can not only maintain true peace of mind in a world of immense uncertainty, economic volatility, and unprecedented change, but who can profit from the fear that immobilizes so many. In these pages, through plain English and inspiring stories, you'll discover... -How to put together a simple, actionable plan that can deliver true financial freedom. -Strategies from

the world's top investors on how to protect yourself and your family and maximize profit from the inevitable crashes and corrections to come. -How a few simple steps can add a decade or more of additional retirement income by discovering what your 401(k) provider doesn't want you to know. -The core four principles that most of the world's greatest financial minds utilize so that you can maximize upside and minimize downside. -The fastest way to put money back in your pocket:

uncover the hidden fees and half truths of Wall Street--how the biggest firms keep you overpaying for underperformance. - Master the mindset of true wealth and experience the fulfillment you deserve today. [A Reference Grammar of French](#) Springer Science & Business Media This edited collection provides unprecedented insight into the emerging field of multilingual education in Sub-Saharan Africa (SSA). Multilingual education is claimed to

have many benefits, amongst which are that it can improve both content and language learning, especially for learners who may have low ability in the medium of instruction and are consequently struggling to learn. The book represents a range of Sub-Saharan school contexts and describes how multilingual strategies have been developed and implemented within them to support the learning of content and language. It looks at multilingual

learning from several points of view, including 'translanguaging', or the use of multiple languages – and especially African languages – for learning and language-supportive pedagogy, or the implementation of a distinct pedagogy to support learners working through the medium of a second language. The book puts forward strategies for creating materials, classroom environments and teacher education programmes which support the use of all of a student's

languages to improve language and content learning. The contexts which the book describes are challenging, including low school resourcing, poverty and low literacy in the home, and school policy which militates against the use of African languages in school. The volume also draws on multilingual education approaches which have been successfully carried out in higher resource countries and lend themselves to being adapted for use in SSA. It shows how multilingual

learning can bring about transformation in education and provides inspiration for how these strategies might spread and be further developed to improve learning in schools in SSA and beyond. Howler monkeys (genus *Alouatta*) comprise twelve species of leaf-eating New World monkeys that range from southern Mexico

through northern Argentina. This genus is the most widespread of any New World primate taxa, and can be found to inhabit a range of forest types from undisturbed rainforest to severely anthropogenically impacted forest fragments. Although there have been many studies on individual species of howler monkeys, this book is the first comprehensive volume to place information on howler behavior and biology within a theoretical framework of

ecological and social adaptability. This is the second of two volumes devoted to the genus *Alouatta*. This volume: · Examines behavioral and physiological mechanisms that enable howler monkeys to exploit highly disturbed and fragmented habitats · Presents models of howler monkey diet, social organization, and mating systems that can also inform researchers studying Old World colobines, apes, and other tropical mammals These goals are achieved in a collection of chapters

written by a distinguished group of scientists on the feeding ecology, behavior, mating strategies, and management and conservation of howlers. This book also contains chapters on the howler microbiome, the concept of behavioral variability, sexual selection, and the role of primates in forest regeneration.

A comprehensive history of fraud in America, from the early nineteenth century to the subprime

mortgage crisis In America, fraud has always been a key feature of business, and the national worship of entrepreneurial freedom complicates the task of distinguishing salesmanship from deceit. In this sweeping narrative, Edward Balleisen traces the history of fraud in America—and the evolving efforts to combat it—from the age of P. T. Barnum through the eras of Charles Ponzi and Bernie Madoff. This unprecedented account describes the slow, piecemeal construction of

modern institutions to protect consumers and investors—from the Gilded Age through the New Deal and the Great Society. It concludes with the more recent era of deregulation, which has brought with it a spate of costly frauds, including corporate accounting scandals and the mortgage-marketing debacle. By tracing how Americans have struggled to foster a vibrant economy without encouraging a corrosive level of cheating, *Fraud* reminds us that American

capitalism rests on an uneasy foundation of social trust.

This book gathers a representative sample of the relevant knowledge

related to the ecology, behavior, and conservation of birds in urban Latin America. Latin America is one of the most biodiverse regions of the world, yet it is still understudied. Although it concentrates most of its population in rapidly growing cities under considerable economic, social, and environmental disparity, the study of the effects that urbanization has on biodiversity in Latin America is still insufficient. Among the best-studied wildlife groups, birds have been

widely used as bioindicators in urban areas. Going from general to specific information regarding avian communities, populations, behavior, threats, and conservation issues, this book describes the state-of-the-art of avian urban ecology in the region. Such knowledge will hopefully promote the regional consolidation of the field and encourage future mechanistic studies that untangle the recorded patterns in order to have the required information to bridge the

gap between evidence-based knowledge and practice in urban systems. Thus, the information included in this document will allow scientists, students, and even decision takers to relate with the current knowledge and gaps related to the topic, providing perspective for future studies and actions.

Numerous pathogens affect animal health and wellbeing and production efficiency. These

pathogens also have a considerable impact on social economics, food safety and security, and human health. Infectious diseases that originate from both domesticated animals and wildlife represent one of the greatest threats to human health. Recent studies show that domesticated species harbor approximately 84 times more zoonotic viruses than wild species. Eight of the top 10 mammalian species with the highest number of zoonotic viruses are domestic,

such as pigs, cattle, and horses. Many animal parasites are also zoonotic, constituting an additional burden on human health. Furthermore, the rapid emergence and spread of drug-resistant pathogen strains pose new threats to animal and human health. Climate changes will undoubtedly alter the interactions between animals and between animals and humans, which will have a huge impact on the transmission rate of existing pathogens and

the emergence of new pathogens or the reemergence of old pathogens. In this special collection, interactions of all major pathogen types, including viruses, bacteria, mites and flies, protozoans, and helminths, and their hosts, such as wild and companion animals and livestock species, are discussed. Further, anthelmintic activities of natural products are evaluated. The relevance and utility of cutting-edge tools, such as immunology, genomics

and genetics, microbiome studies and metabolomics, and molecular epidemiology, in dissecting host-pathogen interactions are also discussed. This special collection provides a broad knowledge base that encourages dialogue across a wide distribution of the research community in veterinary microbiology and parasitology.

While Muslims in

Indonesia have begun to turn towards a strict adherence to Islam, the reality of the socio-religious environment is much more complicated than a simple shift towards fundamentalism. In this volume, contributors explore the multifaceted role of Islam in Indonesia from a variety of different perspectives, drawing on carefully compiled case studies. Topics covered include religious education, the increasing number of Muslim feminists in Indonesia, the

role of Indonesia in the greater Muslim world, social activism and the middle class, and the interaction between Muslim radio and religious identity.

In Canada, one man in seven risks developing prostate cancer. It is the most frequently diagnosed cancer in men and its incidence has increased by 30 percent since 1988. While most commonly diagnosed after age 70, prostate cancer can also occur in men in their forties and fifties. Like other forms of cancer, this disease affects not only the patient but also his family. At the time of diagnosis, there are many questions that need to be answered.

This book provides a simple, concise, practical guide to help patients understand prostate cancer. Now in its third edition, it has, over the years, become an indispensable reference work. It is an outstanding source of information on the prevention and causes of prostate cancer, its early diagnosis and the treatment options available, including their side effects and complications.

Bacteriology and Mycology MDPI

‘Love is harder to explain than hunger, for a piece of fruit does not feel the desire to be eaten’: Denis Diderot’s *Éléments de physiologie* presents a world in flux, turning on the relationship between man, matter and mind. In this late work, Diderot delves playfully into the relationship between bodily sensation, emotion and perception, and asks his readers what it means to be human in the absence of a soul. The *Atheist’s Bible* challenges prevailing scholarly views on Diderot’s *Éléments*,

asserting its contemporary philosophical importance, and prompting its readers to inspect more closely this little-known and little-studied work. In this timely volume, Warman establishes the place of Diderot’s *Éléments* in the trajectory of materialist theories of nature and the mind stretching back to Epicurus and Lucretius, and explores the fascinating reasons behind scholarly neglect of this seminal work. In turn, Warman outlines the hitherto unacknowledged

dissemination and reception of Diderot's *Éléments*, demonstrating how Diderot's *Éléments* was circulated in manuscript-form as early as the 1790s, thus showing how the text came to influence the next generations of materialist thinkers. This book is accompanied by a digital edition of Jacques-André Naigeon's *Mémoires historiques et philosophiques sur la vie et les ouvrages de Denis Diderot* (1823), a work which, Warman argues, represents the first

publication of Diderot's *Éléments*, long before its official publication date of 1875. The *Atheist's Bible* constitutes a major contribution to the field of Diderot studies, and will be of further interest to scholars and students of materialist natural philosophy in the Age of Enlightenment and beyond.

Can adversity lead to enduring positive change

across the lifespan?
Providing a thoughtful and considered exploration of this question, this book presents a critical reassessment of posttraumatic growth, based on correcting prior theoretical and methodological limitations in the current research. Its core argument is that posttraumatic growth should be reconceptualized as positive personality change, and thus should be studied using novel methodological approaches from the field

of personality psychology. Broadly, this argument is put forward in five progressive sections. Beginning by giving a conceptual and interdisciplinary overview of posttraumatic growth as a phenomenon, the volume then reviews the current academic conceptualization of posttraumatic growth and makes a case for a 'reset' in the research. The next section maintains that posttraumatic growth is in

fact a form of positive personality change and should be analyzed using personality science methodology. Using positive personality change as a theoretical foundation for posttraumatic growth, the following two sections look at posttraumatic growth in context. It is explored both in the long term, such as in the development of reflective knowledge and wisdom, and in specific situations

such as with refugees in Sri Lanka and survivors of the Rwandan genocide. Lastly, *Exploring the Psychological Benefits of Hardship: A Critical Reassessment of Posttraumatic Growth* concludes by offering recommendations for scholars and researchers that will improve the quality of research on posttraumatic growth, and will advance this important and worthy field.
