At last a guide to fish as well as  
invertebrates with profusely illustrated  
keys and the most recent terminology! It

is not only practical but authoritative as well. A Practical Guide to the Marine Animals of Northeastern North America features Leland Pollock's innovative, user-friendly keys that circumvent many of the difficulties of traditional identification systems. Pollock's keys offer choices among distinctive attributes of the specimen. Results are

compared to all variations found in the region's fauna, using a neatly displayed tabular form accompanied by many line drawings.

Instagram sensation Clark Little shares his most remarkable photographs from inside the breaking wave, with a foreword by world surfing champion Kelly Slater. "One of the world's most amazing water photographers . . . Now we get to experience up-close these moments of bliss."—Jack Johnson,

musician and environmentalist Surfer and photographer Clark Little creates deceptively peaceful pictures of waves by placing himself under the deadly lip as it is about to hit the sand. "Clark's view" is a rare and dangerous perspective of waves from the inside out. Thanks to his uncanny ability to get the perfect shot--and live to share it--Little has garnered a devout audience, been the subject of award-winning documentaries, and become one of the world's most recognizable wave photographers. Clark Little: The Art of Waves compiles over 150 of his images, including crystalline breaking waves, the diverse marine life of Hawaii, and mind-blowing aerial photography. This collection features his most beloved pictures, as well as work that has never

been published in book form, with Little's stories and insights throughout.

Journalist Jamie Brisick contributes essays on how Clark gets the shot, how waves are created, swimming with sharks, and more. With a foreword by eleven-time world surfing champion Kelly Slater and an afterword by the author on his photographic practice and technique, *Clark Little: The Art of Waves* offers a rare view of the wave for us to enjoy from the safety of land.

Richly-illustrated consideration of the meaning of the carvings of non-human beings, from centaurs to eagles, found in ecclesiastical settings. Representations of monsters and the monstrous are common in medieval art and architecture, from the grotesques in the

borders of illuminated manuscripts to the symbol of the "green man", widespread in churches and cathedrals. These mysterious depictions are frequently interpreted as embodying or mitigating the fears symptomatic of a "dark age". This book, however, considers an alternative scenario: in what ways did monsters in twelfth-century sculpture help audiences envision, perhaps even achieve, various ambitions? Using examples of Romanesque sculpture from across Europe, with a focus on France and northern Portugal, the author suggests that medieval representations of monsters could service ideals, whether intellectual, political, religious, and social, even as they could simultaneously articulate fears; he

argues that their material presence energizes works of art in paradoxical, even contradictory ways. In this way, Romanesque monsters resist containment within modern interpretive categories and offer testimony to the density and nuance of the medieval imagination. KIRK AMBROSE is Associate Professor & Chair, Department of Art and Art History, University of Colorado Boulder.

A one-of-a-kind blend of art, nature, and conservation, The Underwater Museum re-creates an awe-inspiring dive into the dazzling under-ocean sculpture parks of artist Jason deCaires Taylor. Taylor casts his life-size statues from a special kind of cement that facilitates reef growth, and

sinks them to the ocean floor. There, over time, the artworks attract corals, algae, and fish, and evolve into beautiful and surreal installations that are also living reefs. This volume brings readers face to face with these wonders and explains the science behind their creation. Ocean enthusiasts, divers, art lovers, and anyone entranced by the natural world will be instantly engrossed by this pearl of a book.

Today's electricity industry - large power stations feeding a nationwide grid - will soon be a thing of the past. This book explains why and what will replace it - decentralized and distributed electrical resources which can be up to 10 times as economically valuable. The authors - all leading experts in the field - explain

very clearly and thoroughly all the benefits, so the engineers will understand the economic advantages and the investors will understand the engineering efficiencies. Here's what industry experts are saying about Small is Profitable... 'A tour-de-force and a goldmine of good ideas. It is going to have a stunning impact on thinking about electricity.' Walter C. Patterson, Senior Research Fellow, Royal Institute of International Affairs, London. 'An amazing undertaking - incredibly ambitious yet magnificently researched and executed.' Dr. Shimon Awerbuch, Senior Advisor, International Energy Agency, Paris. 'Outstanding...You have thought of some [benefits] I never considered...A great resource for the innovation in energy services that will

have to take place for us to have a sustainable future.' Dr. Carl Weinberg, Weinberg Associates, former Research Director, PG&E. 'This is a brilliant synthesis and overview with a lot of original analytics and insights and a very important overall theme. I think it is going to have a big impact.' Greg Kats, Principal, Capital E LLC, former Finance Director for Efficiency and Renewable Energy, U.S. Department of Energy. 'E. F. Schumacher would be proud of this rigorous extension of his thesis in Small is Beautiful. It shows how making systems the right size can make them work better and cost less. Here are critical lessons for the new century: technologies tailored to the needs of people, not the reverse, can improve the economy and the environment.' Dr.

Daniel Kammen, Professor of Energy and Society and of Public Policy, University of California, Berkeley. 'Small is Profitable creates an unconventional but impeccably reasoned foundation to correctly assign the costs and true benefits of distributed energy systems. It has become an indispensable tool for modelling distributed energy systems benefits for us.' Tom Dinwoodie, CEO and Chairman, PowerLight Corporation. 'A Unique and valuable contribution to the distributed energy industry...Small Is Profitable highlights the societal benefits of distributed resources, and will be a helpful guide to policymakers who wish to properly account for these benefits in the marketplace.' Nicholas Lenssen, Senior Director, Primen. 'This book will shift the electric industry from the

hazards of overcentralization toward the new era where distributed generation will rule.' Steven J. Strong, President, Solar Design Associates, Inc. 'Readers will understand why distributed resources are poised to fundamentally alter the electric power system. Its comprehensive review of the benefits of distributed resources [is] an important part of my library.' Dr. Thomas E. Hoff, President, Clean Power Research. 'The most comprehensive treatise on distributed generation.... Great job and congratulations.' Howard Wenger, Principal, Pacific Energy Group '..[D]ensely packed with information and insights...goes a long way to demonstrate that the former paradigm of electric power supply no longer makes sense.' Prof. Richard Hirsh, University of

Vermont, Leading historian of the electric power sector. 'Amory Lovins was already the world's most original and influential thinker on the future of energy services in general and electricity systems in particular. This remarkable book is a very worthy addition to an extraordinary legacy.' Ralph Cavanagh, Energy Co-Director, Natural Resources Defense Council. 'This is a book every utility professional should have on the bookshelf.' Dr Peter S. Fox-Penner, Principal and Chairman of the Board, the Brattle Group, former Principal Deputy Assistant Secretary of Energy.

A unique system for jump-starting  
artistic creativity, encouraging  
experimentation and growth, and  
increasing sales for artists of all levels,  
from novices to professionals. Have you  
landed in a frustrating rut? Are you  
having trouble selling paintings in  
galleries, getting bogged down by  
projects you can't seem to finish or  
abandon, or finding excuses to avoid  
working in the studio? Author Carol  
Marine knows exactly how you feel—she  
herself suffered from painter's block,  
until she discovered "daily painting." The  
idea is simple: do art (usually small)  
often (how often is up to you), and if

you'd like, post and sell it online. Soon  
you'll find that your block dissolves and  
you're painting work you love—and more  
of it than you ever thought possible!

With her encouraging tone and useful  
exercises, Marine teaches you to: -  
Master composition and value -Become  
confident in any medium including oil  
painting, acrylic painting, watercolors,  
and other media -Choose subjects wisely  
-Stay fresh and loose -Photograph, post,

The new definition of the animal is one of the fascinating features of the intellectual life of the early modern period. The sixteenth century saw the invention of the new science of zoology. This went hand in hand with the

(re)discovery of anatomy, physiology and – in the seventeenth century – the invention of the microscope. The discovery of the new world confronted intellectuals with hitherto unknown species, which found their way into courtly menageries, curiosity cabinets and academic collections. Artistic progress in painting and drawing brought about a new precision of animal illustrations. In this volume, specialists from various disciplines (Neo-Latin, French, German, Dutch, History, history of science, art history) explore the fascinating early modern discourses on animals in science, literature and the visual arts. The volume is of interest for all students of the history of science and intellectual life, of literature and art history of the early modern period.

Contributors include Rebecca Parker Brienens, Paulette Choné, Sarah Cohen, Pia Cuneo, Louise Hill Curth, Florike Egmond, Karl A.E. Enenkel, Susanne Hehenberger, Annemarie Jordan-Gschwendt, Erik Jorink, Johan Koppenol, Almudena Perez de Tudela, Vibeke Roggen, Franziska Schnoor, Paul J.
