CASSIDY NASH

The Americana Song Reader Morgan James Publishing
 In this breath-taking debut novel, two worlds—and timelines—collide when ten-year-old Kara discovers mysterious footprints in the snow that lead her to another place entirely, perfect for fans of *When You Reach Me* and *Echo*. When mysterious footprints appear in the Stockholm snow, ten-year-old Kara attempts to discover where they've come from and who they belong to. They lead Kara to Rebecca, a thirteen-year-old Jewish girl, and her younger brother Samuel. Before long Kara realizes Rebecca and Samuel are refugees from another time—World War II—who are trying to find their way home. Kara discovers that her friends are trapped in a time loop, and they must make it to the British plane that lands near their hideout in order to make it out alive. With unexpected help, Kara travels into the time split to help save her friends. Matthew Fox's lyrical prose—both haunting and uplifting—invites readers into an otherworldly setting grounded in history.

A Natural History of Insects in 100 Limericks Hal Leonard Corporation

NEW YORK TIMES BESTSELLER NATIONAL BESTSELLER In this urgent, singularly authoritative book, Bill Gates sets out a wide-ranging, practical--and accessible--plan for how the world can get to zero greenhouse gas emissions in time to avoid an irreversible climate catastrophe. Bill Gates has spent a decade investigating the causes and effects of climate change. With the help and guidance of experts in the fields of physics, chemistry, biology, engineering, political science and finance, he has focused on exactly what must be done in order to stop the planet's slide toward certain environmental disaster. In this book, he not only gathers together all the information we need to fully grasp how important it is that we work toward net-zero emissions of greenhouse gases but also details exactly what we need to do to achieve this profoundly important goal. He gives us a clear-eyed description of the challenges we face. He describes the areas in which technology is already helping to reduce emissions; where and how the current technology can be made to function more effectively; where breakthrough technologies are needed, and who is working on these essential innovations. Finally, he lays out

a concrete plan for achieving the goal of zero emissions-- suggesting not only policies that governments should adopt, but what we as individuals can do to keep our government, our employers and ourselves accountable in this crucial enterprise. As Bill Gates makes clear, achieving zero emissions will not be simple or easy to do, but by following the guidelines he sets out here, it is a goal firmly within our reach.

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work."—Booklist (starred review)

"The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*

Welcome to Mind Over Ship, the Endeavour Award-winning sequel to David Marusek's stunning debut novel, *Counting Heads*, which Publishers Weekly called "ferociously smart, simultaneously horrific and funny." The year is 2135, and the international program to seed the galaxy with human colonies has stalled as greedy, immoral powerbrokers park their starships in Earth's orbit and begin to convert them into space condos. Ellen Starke's head, rescued from the fiery crash that killed her mother, struggles to regrow a new body in time to restore her dead mother's financial empire. And Pre-Singularity AIs conspire to join the human race just as human clones, such as Mary Skarland and her sisters, want nothing more than to leave it. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

Insects are often overlooked because they are small or ignored because they are deemed trivial, and many are dismissed as nuisance pests. But their numbers and diversity are mind-numbing, and under even a modest hand lens they are beautiful or bizarre. Insects dominate the centre ground of all terrestrial and most aquatic ecosystems. They inform us of the conservation value of ancient woodland and chalk downland. They help monitor the purity or pollution levels of ponds, streams and rivers. And they can demonstrate the effects of climate change, acting as warning lights to alert us to the damage that humans are doing to the world. Recent insectageddon headlines are starting to make people sit up and take more notice. What better way to promote an interest in these fascinating creatures than by poetizing them? This cornucopia of discordant nonsense, with some quite frankly dubious rhyming clashes, is offered up so that entomological outreach will at least benefit from their shock value.

Position Pieces for Cello is designed to give students a logical and fun way to learn their way around the fingerboard. Each hand position is introduced with exercises called "Target Practice," "Geography Quiz," and "Names and Numbers." Following these exercises are tuneful cello duets which have been specifically composed to require students to play in that hand position. In this way, students gain a thorough knowledge of how to find the hand positions and, once there, which notes are possible to play. Using these pieces (with names like "I Was a Teenage Monster," "The Irish Tenor," and "I've Got the Blues, Baby"), position study on the

cello has never been so much fun!

What happens when a former Zen Buddhist monk and his feminist wife experience an apparition of the Virgin Mary? "This book could not have come at a more auspicious time, and the message is mystical perfection, not to mention a courageous one. I adore this book."—Caroline Myss, author of *Anatomy of the Spirit* Before a vision of a mysterious "Lady" invited Clark Strand and Perdita Finn to pray the rosary, they were not only uninterested in becoming Catholic but finished with institutional religion altogether. Their main spiritual concerns were the fate of the planet and the future of their children and grandchildren in an age of ecological collapse. But this Lady barely even referred to the Church and its proscriptions. Instead, she spoke of the miraculous power of the rosary to transform lives and heal the planet, and revealed the secrets she had hidden within the rosary's prayers and mysteries—secrets of a past age when forests were the only cathedrals and people wove rose garlands for a Mother whose loving presence was as close as the ground beneath their feet. She told Strand and Finn: The rosary is My body, and My body is the body of the world. Your body is one with that body. What cause could there be for fear? Weaving together their own remarkable story of how they came to the rosary, their discoveries about the eco-feminist wisdom at the heart of this ancient devotion, and the life-changing revelations of the Lady herself, the authors reveal an ancestral path—available to everyone, religious or not—that returns us to the powerful healing rhythms of the natural world.

From the author of *The Magician's Daughter* comes *The Scholar and the Last Faerie Door*, a mythic, magical tale full of secret scholarship, faerie curses, and the deadliest spells of all—the ones that friends cast on each other. All they needed to break the world was a door, and someone to open it. Camford, 1920. Gilded and glittering, England's secret magical academy is no place for Clover, a commoner with neither connections nor magical blood. She tells herself she has fought her way there only to find a cure for her brother Matthew, one of the few survivors of a faerie attack on the battlefields of WWI which left the doors to faerie country sealed, the study of its magic banned, and its victims cursed. But when Clover catches the eye of golden boy Alden Lennox-Fontaine and his friends, doors that were previously closed to her are flung wide open, and she soon finds herself enmeshed in the seductive world of the country's magical aristocrats. The summer she spends in Alden's orbit leaves a fateful mark: months of joyous friendship and mutual study come crashing down when experiments go awry, and old secrets are unearthed. Years later, when the faerie seals break, Clover knows it's because of what they did. And she knows that she must seek the help of people she once called friends—and now doesn't quite know what to call—if there's any hope of saving the world as they know it.

The wary politician submits to the subtle pressures from the President's scientific advisor. He will listen to the far-out plans of a decorated weather controller during the Vietnam war. Dr. Lively's condition for bringing an end to the drought in the Western States is to have an unprecedented Federal License to make rain. The primary purpose of the permit to stop the drought is to shield his secret plans to control the devastation of an object from outer space when it collides with the earth. For the first time in 65 million years the earth is at imminent risk of total annihilation. Can a timely plan be developed to contain the devastating effects of the asteroid after it collides with the earth? Considering his chances for reelection unless he begins an effort to relieve the drought, the senator weighs his options. After heated discussions he agrees that the renowned scientists who predicted this event for more than seven centuries must be taken

seriously. It remains to be seen if the expert and his team of eminent scientists can deliver on the challenges they have accepted.
