The Penguin Guide to Jazz Recordings is firmly established as the world's leading guide to recorded jazz, a mine of fascinating information and a source of insightful - often wittily trenchant - criticism. This is something rather different: Brian Morton (who taught American history at UEA) has picked out the 1000 best recordings that all jazz fans should have and shows how they tell the history of the music and with it the history of the twentieth century. He has completely revised his and Richard Cook's entries and reassessed each artist's entry for this book. The result is an endlessly browsable companion that will prove required reading for aficionados and jazz novices alike. 'It's the kind of book that you'll yank off the shelf to look up a quick fact and still be reading two hours later' Fortune 'Part jazz history, part jazz Karma Sutra with Cook and Morton as the knowledgeable, urbane, wise and witty guides ... This is one of the great books of recorded jazz; the other guides don't come close' Irish Times *Thinking for Orchestra* Penguin UK

(Berklee Guide). Essential for anyone interested in the business, process and procedures of writing music for film or television, this book teaches the Berklee approach to the art, covering topics such as: preparing and recording a score, contracts and fees, publishing, royalties, copyrights and much more. Features interviews with 21 top film-scoring professionals, including Michael Kamen, Alf Clausen, Alan Silvestri, Marc Shaiman, Mark Snow, Harry Gregson-Williams and Elmer Bernstein. Now updated with info on today's latest technology, and invaluable insights into finding work in the industry.

More than fifty years ago, John Coltrane drew the twelve musical notes in a circle and connected them by straight lines, forming a five-pointed star. Inspired by Einstein, Coltrane put physics and geometry at the core of his music. Physicist and jazz musician Stephon Alexander follows suit, using jazz to answer physics' most vexing questions about the past and future of the universe. Following the great minds that first drew the links between music and physics-a list including Pythagoras, Kepler, Newton, Einstein, and Rakim-The Jazz of Physics reveals that the ancient poetic idea of the Music of the Spheres," taken seriously, clarifies confounding issues in physics. The Jazz of Physics will fascinate and inspire anyone interested in the mysteries of our universe, music, and life itself.

Winner of the 2007 National Book Critics Circle Award for Criticism A New York Times Book Review Top Ten Book of the Year Time magazine Top Ten Nonfiction Book of 2007 Newsweek Favorite Books of 2007 A Washington Post Book World Best Book of 2007 In this sweeping and dramatic narrative,

Alex Ross, music critic for *The New Yorker*, weaves together the histories of the twentieth century and its music, from Vienna before the First World War to Paris in the twenties; from Hitler's Germany and Stalin's Russia to downtown New York in the sixties and seventies up to the present. Taking readers into the labyrinth of modern style, Ross draws revelatory connections between the century's most influential composers and the wider culture. *The Rest Is Noise* is an astonishing history of the twentieth century as told through its music.

Broken Music Musicians in Their Own Words

A notorious, influential and radical critique of the avant-garde music of Stockhausen and Cage, by maverick composer Cornelius Cardew Originally published in 1974, *Stockhausen Serves Imperialism* is a collection of essays by the English avant-garde composer Cornelius Cardew that provides a Marxist and class critique of two of the more revered composers of the postwar era: Karlheinz Stockhausen and John Cage. A former assistant to Stockhausen and an early champion of Cage, Cardew provides a cutting rebuke of the composers, their work and their ideological positions (Cage's staged anarchism and Stockhausen's theatrical mysticism, in particular). Cardew considers the role of these composers and their works within the development of the 20th-century avant-garde, which he saw as reinforcing an imperialist order rather than spotlighting the struggles of the working class or spurring revolution against bourgeois oppression. Cardew's early works do not escape his own scrutiny, with the book containing critiques and repudiations of his canonical works from the 1960s and early 1970s: *Treatise* and *The Great Learning*. After abandoning the avant-garde, Cardew devoted his work to the people's struggle, creating music in service of his radical politics. This music mostly took the form of class-conscious arrangements of folk songs and melodic piano works with such titles as "Revolution is the Main Trend" and "Smash the Social Contract." Cardew maintained a critical cultural stance throughout his life, later going on to denounce David Bowie and punk rock as fascist. He was killed by a hit-and-run driver in 1981--a death that some speculate could have been an assassination by the English government's MI5. Supplementing Cardew's writings are two essays by his Scratch Orchestra collaborators Rod Eley and John Tilbury.

The Art of Jazz explores how the expressionism and spontaneity of jazz spilled onto its album art, posters, and promotional photography, and even inspired standalone works of fine art. Everyone knows jazz is on the cutting edge of music, but how much do you know about its influence in the visual arts? With album covers that took inspiration from the avant-garde, jazz's primarily African American musicians and their producers sought to challenge and inspire listeners both musically and visually. Arranged chronologically, each chapter covers a key period in jazz history, from the earliest days of the twentieth century to today's postmodern jazz. Chapters begin with substantive introductions and present the evolution of jazz imagery in all its forms, mirroring the shifting nature of the music itself. With two authoritative features per chapter and over 300 images, *The Art of Jazz* is a significant contribution to the literature of this intrepid art form.

The Universe and the Teacup Houghton Mifflin Harcourt

Wie gut kennen wir die, die wir am meisten lieben? Vom ersten Moment an hatte Richard Warlo seinen Ziehvater Pawel Król geliebt, diesen wie durch eine versteckte Seitentür in sein Leben eingetretenen Beschützer. Fasziniert von dessen Stärke und Verwegenheit genoss er es, wenn in der Hanauer Ankergrasse die Polen zu Besuch kamen und geredet, gesungen und getrunken wurde. 25 Jahre nach Pawels Tod stößt Richard auf alte Fotos, die Pawel als jungen Mann in SS-Uniform zeigen. Sein polnischer Ziehvater ein Nazi? Wer war der Mann, der ihn wie einen Sohn erzog, mit ihm auf der Suche nach seltenen Schmetterlingen durch ganz Europa reiste und ihn die Poesie des Wagnisses lehrte? Richard macht sich auf den Weg nach Polen – in die Vergangenheit seines Vaters. In Sosnowitz, Pawels Geburtsort, trifft er auf dessen leibliche Kinder: auf Marcin, der zeitlebens darunter gelitten hat, als Kleinkind vom Vater verlassen worden zu sein, und auf Lucyna, die zu klein war, als Pawel verschwand, um Erinnerungen an ihn zu haben. Beide mussten lernen, ohne Vater auszukommen. Nur Oliwia, Pawels im Sterben liegende Ehefrau, kennt die wahren Hintergründe seiner Flucht. Wird sie sie auf der Schwelle des Todes preisgeben? Sowohl Richard als auch Marcin und Lucyna müssen begreifen, dass Wahrheiten, die das Leben verändern, sich häufig nicht dramatisch, sondern in großer Stille offenbaren. Und dass die Frage »Was wäre gewesen, wenn« sich als Falle erweist, wenn der Fragesteller darüber sein Leben aus den Augen verliert. Peter Hennings Figuren sind auf der Suche nach Gewissheiten – und der eigenen, neu zu definierenden Identität. Seine fesselnde Chronik des verpassten Glücks führt vor, wie Leerstellen, Geheimnisse und blinde Flecken in unseren Lebens- und Familiengeschichten uns tiefer prägen als alles, was wir fassen, erzählen und erinnern können.

Der Ostler, das unbekannte Wesen New York : Schirmer

Beautiful, romantic and spirited, Pannonica, known as Nica, named after her father's favorite moth, was born in 1913 to extraordinary, eccentric privilege and a storied history. The Rothschild family had, in only five generations, risen from the ghetto in Frankfurt to stately homes in England. As a child, Nica took her daily walks, dressed in white, with her two sisters and governess around the parkland of the vast house at Tring, Hertfordshire, among kangaroos, giant tortoises, emus and zebras, all part of the exotic menagerie collected by her uncle Walter. As a debutante, she was taught to fly by a saxophonist and introduced to jazz by her brother Victor; she married Baron Jules de Koenigswarter, settled in a château in France and had five children. When World War II broke out, Nica and her five children narrowly escaped back to England, but soon after, she set out to find her husband who was fighting with the Free French Army in Africa, where she helped the war effort by being a decoder, a driver and organizing supplies and equipment. In the early 1950s Nica heard "'Round Midnight" by the jazz pianist and composer Thelonious Monk and, as if under a powerful spell, abandoned her marriage and moved to New York to find him. She devoted herself to helping Monk and other musicians: she bailed them out of jail, paid their bills, took them to the hospital, even drove them to their gigs, and her convertible Bentley could always be seen parked outside downtown clubs or up in Harlem. Charlie Parker would notoriously die in her apartment in the Stanhope Hotel. But it was Monk who was the love of her life and whom she cared for until his death in 1982. Hannah Rothschild has drawn on archival material and her own interviews in this quest to find out who her great-aunt really was and how she fit into a family that, although passionate about music and entomology, was reactionary in always favoring men over women. Part musical odyssey, part love story, *The Baroness* is a fascinating portrait of a modern figure ahead of her time who dared to live as she wanted, finally, at the very center of New York's jazz scene.

The clarinet has a long and rich history as a solo, orchestral, and chamber musical instrument. In this broad-ranging account Eric Hoepfich, a performer, teacher, and expert on historical clarinets, explores its development, repertoire, and performance history. Looking at the antecedents of the clarinet, as well as such related instruments as the chalumeau, basset horn, alto clarinet, and bass clarinet, Hoepfich explains the use and development of the instrument in the Baroque age. The period from the late 1700s to Beethoven's early years is shown to have fostered ever wider distribution and use of the instrument, and a repertoire of increasing richness. The first half of the nineteenth century, a golden age for the clarinet, brought innovation in construction and great virtuosity in performance, while the following century and a half produced a surge in new works from many composers. The author also devotes a chapter to the role of the clarinet in bands, folk music, and jazz.

The Jazz of Physics

In this "captivating" (Sky + Telescope) book, a top cosmologist argues that physics must embrace the excluded and listen to the unheard When asked by legendary theoretical physicist Christopher Isham why he had attended graduate school, cosmologist Stephon Alexander answered: "To become a better physicist." As a young student, he could hardly have anticipated Isham's response: "Then stop reading those physics books." Instead, Isham said, Alexander should start listening to his dreams. This is only the first of the many lessons in *Fear of a Black Universe*. As Alexander explains, greatness in physics requires transgression, a willingness to reject conventional expectations. He shows why progress happens when some physicists come to think outside the mainstream, and why, as in great jazz, great physics requires a willingness to make things up as one goes along.

Compelling and necessary, *Fear of a Black Universe* offers us remarkable insight into the art of physics and empowers us all to think big.
