Rhetorical scholarship has found rich source material in the disciplines of advertising, communications research, and consumer behavior. Advertising, considered as a kind of communication, is distinguished by its focus on causing action. Its goal is not simply to communicate ideas, educate, or persuade, but to move a prospect closer to a purchase. The editors of "Go Figure! New Directions in Advertising Rhetoric" have been involved in developing the

scholarship of advertising rhetoric for many years. In this volume they have assembled the most current and authoritative new perspectives on this topic. The chapter authors all present previously unpublished concepts that represent advances beyond what is already known about advertising rhetoric. In the opening and closing chapters editors Ed McQuarrie and Barbara Phillips provide an integrative view of the current state of the art in advertising rhetoric

From the hosts of the Civics 101 podcast—and a New Yorker cartoonist—"an informative and appealing civics lesson for first-time voters and old hands alike" (Publishers Weekly). Do you know what the Secretary of Defense does all day? Are you sure you know the difference between the House and the Senate? Have you been pretending you know what Federalism is for the last twenty years? Don't worry—you're not alone. The American government and its processes can be dizzyingly complex and obscure. Until now! Within this book are the keys to knowing what you're talking about when you argue politics with the uncle you only see at Thanksgiving, and a quick reference to turn to when the nightly news boggles your mind. This approachable and informative

guide gives you the lowdown on everything from the three branches of government to what you can actually do to make your vote count to how our founding documents affect our daily lives. Now is the time to finally understand who does what, how they do it, and the best way to get them to listen to you. "An easily digestible, illustrated guidebook to the agencies and institutions that make up the federal government . . . Just the thing for students of civics—which, these days, should include the entire polity." —Kirkus Reviews

A collection of wordless cartoons by Louis Raemaekers, reflecting particularly on the German atrocities during World War I and the Netherlands' position during the war; each cartoon is accompanied by explanatory text.

Washington's Farewell Address to the People of the United States, 1796 Knopf

This book defines and explains, in straightforward language, metaphorical stories using examples from sources such as conversations, speeches, and editorial cartoons.

Modernity At Large Multilingual Matters

Examines Abraham Lincoln's relationship with the press, arguing that he used such intimidation and manipulation techniques as closing down dissenting newspapers, pampering favoring newspaper men, and physically moving official telegraph lines.

Years of adventure, 1874-1920 Andrews McMeel Publishing

Interpreting Figurative Meaning critically evaluates the recent empirical work from psycholinguistics and neuroscience examining the successes and difficulties associated with interpreting figurative language. There is now a huge, often contradictory literature on how people understand figures of speech. Gibbs and Colston argue that there may not be a single theory or model that adequately explains both the processes and products of figurative meaning experience. Experimental research may ultimately be unable to simply adjudicate between current models in psychology, linguistics and philosophy of how figurative meaning is interpreted. Alternatively, the authors advance a broad theoretical framework, motivated by ideas from 'dynamical systems theory', that describes the multiple, interacting influences which shape people's experiences of figurative meaning in discourse. This book details past research and theory, offers a critical assessment of this work and sets the stage for a new vision of figurative experience in human life.

Ironic, isn't it? For more than a quarter century, Pat Oliphant has skewered the denizens of Congress with his biting sharp editorial cartoons. Now, in an exhibit and this companion volume, Oliphant is honored in the very repository of that illustrious body: The Library of Congress. Oliphant is, after all, the most important political cartoonist of the 20th century. His trademark wit -- shared with the adoring fans who read almost 350 daily and Sunday newspapers that carry his work -- has impaled presidents, dogged members of Congress, and critiqued a whole host of issues. From Vietnam to Bosnia, from Lyndon Johnson to Bill Clinton, Pat Oliphant has applied his considerable talent to the workings of the world. Oliphant's Anthem will catalog the 60 drawings, sculptures, and various art media that will be exhibited as a special tribute to Pat Oliphant's art in March 1998 at the Library of Congress. Interviews with the artist throughout the book will highlight his thoughts, concerns, and considerations as he has created this impressive body of work. Printed on glossy enamel stock, the black and white book will include an eight-page color signature. It is certain to be a collectible edition for Oliphant fans everywhere.

The classic, critical and humorous study of cultural imperialism and children's literature; how the Disney fantasy world reproduces the "American Dream" fantasy world, and the disastrous effect of Disney comics and other "mass" cultural merchandise on the development of the so-called "Third" World. In 1973 this work was banned and burned in Chile, and later the English edition was banned for more than a year by the US government. In comic book format with cartoon examples, introduction by David KUNZLE on the Disney world, a bibliography of left writings on cultural imperialism and the comics, and an appendix by John Shelton LAWRENCE on the book's US censorship and the legal-political issues involved in the right to criticize Disney

Representing Congress M.E. Sharpe

A collection of essays exploring the wide-ranging influence of the Walt Disney Company. It would be difficult to go through life without ever encountering a Disney product. Since the first Mickey Mouse cartoon premiered in 1928, Disney has played a central role in shaping American popular culture, and it has expanded to the global market. The company positioned itself as a titan of family entertainment, and many of its offerings, from films to consumable products, have become embedded in the minds of children and adults, woven into many of our life experiences. Fans of Disney build connections with their favorite characters and franchises, fueled by Disney's

marketing practices. Others have developed a near-cult-like relationship with the brand, equating its products with religious icons and theme park visits with pilgrimages. This edited volume looks beyond the movies and merchandise to peer into the very heart of the Disney phenomenon: how the fan response drives the corporation's massive marketing machine and how the corporate response, in turn, shapes the fan experience.

"A" Century of Political Cartoons Routledge

Classics in the Modern World explores the features and implications of a 'democratic turn' in modern perceptions of the ancient world. Exploring the relationship between Greek and Roman ways of thinking and modern definitions of democratic practices and approaches, it enables a wider re-evaluation of the role of classics in the modern world.

We live in a visual age. Images and visual artefacts shape international events and our understanding of them. Photographs, film and television influence how we view and approach phenomena as diverse as war, diplomacy, financial crises and election campaigns. Other visual fields, from art and cartoons to maps, monuments and videogames, frame how politics is perceived and enacted. Drones, satellites and surveillance cameras watch us around the clock and deliver images that are then put to political use. Add to this that new technologies now allow for a rapid distribution of still and moving images around the world. Digital media platforms, such as Twitter, YouTube, Facebook and Instagram, play an important role across the political spectrum, from terrorist recruitment drives to social justice campaigns. This book offers the first comprehensive engagement with visual global politics. Written by leading experts in numerous scholarly disciplines and presented in accessible and engaging language, *Visual Global Politics* is a one-stop source for students, scholars and practitioners interested in understanding the crucial and persistent role of images in today's world.

A lavishly illustrated, witty, and original look at the awesome power of the political cartoon throughout history to enrage, provoke, and amuse. As a former editor of *The New York Times Magazine* and the longtime editor of *The Nation*, Victor S. Navasky knows just how transformative—and incendiary—cartoons can be. Here Navasky guides readers through some of the greatest cartoons ever created, including those by George Grosz, David Levine, Herblock, Honoré Daumier, and Ralph Steadman. He recounts how cartoonists and caricaturists have been censored, threatened, incarcerated, and even murdered for their art, and asks what makes this art form, too often dismissed as trivial, so uniquely poised to affect our minds and our hearts. Drawing on his own encounters with would-be censors, interviews with cartoonists, and historical archives from cartoon museums across the globe, Navasky examines the political cartoon as both art and polemic over the centuries. We see afresh images most celebrated for their artistic merit (Picasso's *Guernica*, Goya's "Duendecitos"), images that provoked outrage (the 2008 Barry Blitt *New Yorker* cover, which depicted the Obamas as a Muslim and a Black Power militant fist-bumping in the Oval Office), and those that have dictated public discourse (Herblock's defining portraits of McCarthyism, the Nazi periodical *Der Stürmer's* anti-Semitic caricatures). Navasky ties together these and other superlative genre examples to reveal how political cartoons have been not only capturing the zeitgeist throughout history but shaping it as well—and how the most powerful cartoons retain the ability to shock, gall, and inspire long after their creation. Here Victor S. Navasky brilliantly illuminates the true power of one of our most enduringly vital forms of artistic expression.

Far-right populist politics have arrived in the mainstream. We are now witnessing the shameless normalization of a political discourse built around nationalism, xenophobia, racism, sexism, antisemitism and Islamophobia. But what does this change mean? What caused it? And how does far-right populist discourse work? *The Politics of Fear* traces the trajectory of far-right politics from the margins of the political landscape to its very centre. It explores the social and historical mechanisms at play, and expertly ties these to the "micro-politics" of far-right language and discourse. From speeches to cartoons to social media posts, Ruth Wodak systematically analyzes the texts and images used by these groups, laying bare the strategies, rhetoric and half-truths the far-right employ. The revised second edition of this best-selling book includes: A range of vignettes analyzing specific instances of far-right discourse in detail. Expanded discussion of the "normalization" of far-right discourse. A new chapter exploring the challenges to liberal democracy. An updated glossary of far-right parties and movements. More discussion of the impact of social media on the rise of the far-right. Critical, analytical and impassioned, *The Politics of Fear* is essential reading for anyone looking to understand how far-right and populist politics have moved into the mainstream, and what we can do about it.

This book is the result of a decade long effort in school districts such as New York City, Austin, and San Diego to implement challenging instruction that is designed for classrooms that include English learners and that raises the bar and increases engagement for all learners. Classroom vignettes, transcripts of student interactions, and detailed examples of intellectually engaging middle school and high school lessons provide a concrete picture of the instructional approach developed by coauthor Aida Walqui, founder and director of WestEd's Quality Teaching for English Learners (QTEL) initiative.

"Herblock's History" is an article written by Harry L. Katz that was originally published in the October 2000 issue of "The Library of Congress Information Bulletin." The U.S. Library of Congress, based in Washington, D.C., presents the article online. Katz provides a biographical sketch of the American political cartoonist and journalist Herbert Block (1909-2001), who was known as Herblock. Block worked as a cartoonist for "The Washington Post" for more than 50 years, and his cartoons were syndicated throughout the United States. Katz highlights an exhibition of Block's cartoons, that was on display at the U.S. Library of Congress from October 2000. Images of selected cartoons by Block are available online.
