From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear

Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party

Praise for Ask a Manager
"A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you

work."—Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience."—Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor."—Robert Sutton, Stanford professor and author of *The No Asshole Rule* and *The Asshole Survival Guide* "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way."—Erin Lowry, author of *Broke Millennial: Stop Scraping By and Get Your Financial Life Together*

After three decades of massive rural-to-urban migration in China, a burgeoning population of over 35 million second-generation migrants living in its cities poses a challenge to socialist modes of population management and urban governance. In *The Inconvenient Generation*, Minhua Ling offers the first longitudinal study of these migrant youth from middle school to the labor market in the years after the Shanghai municipal government partially opened its public school system to them. Drawing on multi-sited ethnographic data, Ling follows the trajectories of dozens of children coming of age at a time of competing economic and social imperatives, and its everyday ramifications on their sense of identity, educational outcomes, and citizenship claims. Under policies and practices of segmented

inclusion, they are inevitably funneled through the school system toward a life of manual labor. Illuminating the aspirations and strategies of these young men and women, Ling captures their experiences against the backdrop of a reemergent global Shanghai.

Introduction to Psychotherapy Phil Robinson

Most parents do more harm than good when they try to teach their children about money.

They make saving seem like a punishment, and force their children to view reckless spending as their only rational choice. To most kids, a savings account is just a black hole that swallows birthday checks. David Owen, a New Yorker staff writer and the father of two children, has devised a revolutionary new way to teach kids about money. In *The First National Bank of Dad*, he explains how he helped his own son and daughter become eager savers and rational spenders. He started by setting up a bank of his own at home and offering his young children an attractively high rate of return on any amount they chose to save. "If you hang on to some of your wealth instead of spending it immediately," he told them, "in a little while, you'll be able to double or even triple your allowance." A few years later, he started his own stock market and money-market fund for them. Most children already have a pretty good idea of how money works, Owen believes; that's why they are seldom interested in punitive savings schemes mandated by their parents. The first step in making children

financially responsible, he writes, is to take advantage of human nature rather than ignoring it or futilely trying to change it. "My children are often quite irresponsible with my money, and why shouldn't they be?" he writes. "But they are extremely careful with their own." *The First National Bank of Dad* also explains how to give children real experience with all kinds of investments, how to foster their charitable instincts, how to make them more helpful around the house, how to set their allowances, and how to help them acquire a sense of value that goes far beyond money. He also describes at length what he feels is the best investment any parent can make for a child -- an idea that will surprise most readers.
