From esteemed author-illustrator Elly MacKay

comes a magical fantasy tale about the importance of working as a team and being a good friend. Mip and Pip are two fairies who live in a beautiful forest near a waterfall. One day, Mip has a brilliant idea to build a tree house and decides to make it into a contest: whoever can build the tallest tree house the fastest wins! Pip, who is much more thoughtful and a planner, reads about architecture and

sketches out blueprints while Mip, the speedster, is already halfway done constructing her house. But when a powerful gust of wind threatens Mip's tree house and Pip's safety, the two friends must learn to appreciate each other's talents to save the day-and to build the tallest tree house in the forest.

Enter the world of fairy-tale towers, whimsical stairways, crow's nests,

zip lines, and suspended rope bridges. Take pleasure in the details of hand-split oak shingles, thatched roofs, and cedar tongue-and-groove interiors. Made of sustainably sourced materials, Blue Forest's magical sanctuaries fit snugly between trees and branches--often incorporating them into the building itself--and sit lightly on the land. From a child's tree house inside a secret garden to party venues for teenagers and adults, this book details 28 imaginative tree

houses, some of them accompanied by site plans and drawings. Whether the dwellings on each page are simple or designed to house a spa or home theatre, this beautiful book will inspire readers to reconsider their own garden's possibilities for relaxation and play.

TreeHouses: Living a Dream Pavilion Children's Lisa Stickley's third children's book is all about the first year in the life of a baby, as told by his big sister. From first arriving home to sitting up

and crawling, and with sound effects to accompany the actions, this book is a voyage of discovery, full of fun, wonder and beautiful observation.

Bestselling Van Life author Foster Huntington shares his experiences - as well as others - living by his own rules in this aspirational book filled with awe-inspiring photographs of unique

homes in unexpected places. After spending three years on the road living in a camper van, Foster Huntington continued his unconventional lifestyle by building a two-story treehouse. Foster, like many others, are finding freedom, tranquility, and adventure in living off the grid in unconventional homes. Perfect for fans of Van Life and Cabin Porn and those who yearn for a simpler existence, *Off Grid Life* showcases unique dwellings from all around the world.

Organized into sections like tree houses, tiny houses, shipping containers, yurts, boathouses, barns, vans, and more, the 250 aspirational photographs feature enviable settings like stunning beaches, dramatic mountains and picturesque forests. Also included are images of fully designed interiors with kitchens and sleeping quarters as well as interviews with solo dwellers, couples, and families who are living lives off the beaten path. *The Treehouse Book*

Rowman & Littlefield
It seems that almost everyone likes treehouses. Smiles of recognition turn into grins of enthusiasm as more people discover them and dream about making their own private retreats or family play spaces. And it's nice to remind ourselves that treehouses are built into the oldest and most forgiving, living things on earth. Also, history records treehouses as being built as deliberate follies, as challenges for arboreal designers, for

merrymaking, and for keeping the spirit of fairy tales alive. But treehouses can also be social places. We will visit many that were built to entertain, to hang out with friends, or as guest houses. Trees come in all types. Master treehouse builders Peter and Judy Nelson, with David Larkin, have embarked on yet another treehouse-discovery expedition across America, this time adding the investigation of backyard playhouses to their agenda. Now, in *The Treehouse Book*, they

reveal their findings, illustrated and described in the most complete volume yet. From casual treeshacks made from discarded lumber to multitiered feats of fancy, they found shelters representing myriad builders--interesting characters ranging from childhood fanatics grown up, to weekend carpenters, to those who want their grandkids to have the best clubhouse on the block. Detailed how-to information, including plans and drawings, is woven with

behind-the-scenes tales of each structure's occupants and stunning interior and exterior photographic exploration. [Treehouses and Playhouses You Can Build](#)

Since the publication of *Treehouses of the World*, the community of treehouse builders has grown tremendously, and many more innovative treehouses have been built around the world. In *New Treehouses of the World*, world-renowned treehouse designer and builder Pete Nelson takes readers on an exciting, international tour of more than 35 new treehouses that reveal how treehouses are designed, constructed, and appreciated in a wide array of cultures and

settings. Both beautifully photographed and thoughtfully written by Pete Nelson, *New Treehouses of the World* documents Nelson's travels, discoveries, and epiphanies, and explores the ever-growing new frontier of arboreal architecture. The message that Nelson promotes is simple: As sustainable living issues stand poised to become the most important challenges facing the post-millennial age, the positive power and goodwill that a simple

treehouse engenders is of greater importance than ever before.

As children's hideaways, ornamental garden

features, spiritual

retreats, and even as

offices, studios, and full-

time homes, treehouses

provide places of

isolation, independence,

and imagination where one can literally rise above the demands of daily life. Here, architect Adam Mornement and historian Paula Henderson explore extraordinary aeries past and present, from the treehouse-dwelling tradition of South Sea hunter-gatherers to the Green Magic eco-treehouse resort in Kerala, India; from Normandy's 400-year-old chapel-in-the-oak to the tree nests and tree tunnels that movie star John Malkovich created for his children; from

treehouses in literature to the ecologically sustainable dwellings built from modern technology that will be the treehouses of tomorrow's world. Engaging, thoroughly researched, and packed with hundreds of fabulous photographs and illustrations, *Treehouses* is destined to become the classic reference work on this magical subject. *The Great Treehouse War* Harry N. Abrams A contemporary, eccentric architect who draws on Japanese tradition,

Terunobu Fujimori's designs manage to be simultaneously whimsical, beautifully designed, and environmentally sensitive. The projects in this volume will appeal to both architectural professionals and fans of innovative design. This book is an in-depth analysis from a formal, design, and cultural point of view of Terunobu Fujimori's entire architectural production to date. It is not a mere collection of his works, but an exhaustive review delving into many sources, which finally

offers a complete critical interpretation of his work. Fujimori has made a name for himself in Japan by crafting beguiling little buildings that refuse to follow any of the usual rules. His hand-made structures look like the nests or cocoons of curious creatures, woven, whittled and thatched with organic, earthy materials that could have been scavenged from the forest floor. This comprehensive monograph provides a complete review of his boldly imaginative

projects. The works are presented through lavish and striking photographs, and the volume includes extensive use of sketches and drawings by Fujimori, a section dedicated to his architectural models, and an original essay written by Fujimori for this publication.

Treehouses, Towers, and Tea Rooms Alma Books

All children dream of having a secret house where they can live on their own, far from any rules and regulations. But not all of them are as lucky as Aglaia, who lives

at the top of a magical tree together with her friend Bianca and an incredible host of flying dogs, talking cats, carnivorous flowers and children who speak in verse. Inventively illustrated by Quentin Blake, Aglaia's adventures – and her battles with the gruff Signor Brullo and the woodmen who want to cut down the tree – are sure to enchant and inspire the imagination of every child.

Treedom is an exploration

of Japan's most well-known treehouse builder Takashi Kobayashi. Takahashi, who has been featured in the New York Times and on Animal Planet's Treehouse Masters, as well as many

television programs, newspapers, and magazines in Japan, examines being an outcast in a rigid society of rules and conformity and finding salvation in

the trees. Treedom, filled with photography, poetry, and Takashi's personal accounts of treehouse building, describes how treehouse living is not just a lifestyle but a philosophy.
