General John A. Wickham, commander of the famous 101st Airborne Division in the 1970s and subsequently Army Chief of Staff, once visited Antietam battlefield. Gazing at Bloody Lane where, in 1862,

several Union assaults were brutally repulsed before they finally broke through, he marveled, "You couldn't get American soldiers today to make an attack like that." Why did those men risk certain death, over and over again, through countless bloody battles and four long, awful years? Why did the conventional wisdom -- that soldiers become increasingly cynical and disillusioned as war progresses -- not hold true in the Civil War? It is to this question-- why did they fight--that James McPherson, America's preeminent Civil War historian, now turns his attention. He shows that, contrary to what many scholars believe, the soldiers of the Civil War remained powerfully convinced of the ideals for which they fought throughout the conflict. Motivated by duty and honor, and often by religious faith, these men wrote frequently of their firm belief in the cause for which they fought: the principles of liberty, freedom, justice, and patriotism. Soldiers on both sides harkened back to the Founding Fathers, and the ideals of the American Revolution. They fought to defend their country, either the Union-- "the best Government ever made"--or the Confederate states, where their very

homes and families were under siege. And they fought to defend their honor and manhood. "I should not like to go home with the name of a coward," one Massachusetts private wrote, and another private from Ohio said, "My wife would sooner hear of my death than my disgrace." Even after three years of bloody battles, more than half of the Union soldiers reenlisted voluntarily. "While duty calls me here and my country demands my services I should be willing to make the sacrifice," one man wrote to his protesting parents. And another soldier said simply, "I still love my country." McPherson draws on more than 25,000 letters and nearly 250 private diaries from men on both sides. Civil War soldiers were among the most literate soldiers in history, and most of them wrote home frequently, as it was the only way for them to keep in touch with homes that many of them had left for the first time in their lives. Significantly, their letters were also uncensored by military authorities, and are uniquely frank in their criticism and detailed in their reports of marches and battles, relations between officers and men, political debates, and morale. For

Cause and Comrades lets these soldiers tell their own stories in their own words to create an account that is both deeply moving and far truer than most books on war. *Battle Cry of Freedom*, McPherson's Pulitzer Prize-winning account of the Civil War, was a national bestseller that Hugh Brogan, in *The New York Times*, called "history writing of the highest order." For Cause and Comrades deserves similar accolades, as McPherson's masterful prose and the soldiers' own words combine to create both an important book on an often-overlooked aspect of our bloody Civil War, and a powerfully moving account of the men who fought it.

An ALA Best Book for Young Adults: Firsthand accounts of the experiences of boys sixteen and younger who fought in the Civil War, with photos included. Winner of the Golden Kite Award for Nonfiction "Making extensive use of the actual words—culled from diaries, journals, memoirs, and letters—of boys who served in the Union and Confederate armies as fighting soldiers as well as drummers, buglers, and telegraphers, Murphy

describes the beginnings of the Civil War and goes on to delineate the military role of the underage soldiers and their life in the camps and field bivouacs. Also included is a description of the boys' return home and the effects upon them of their wartime experiences...An excellent selection of more than 45 sepia-toned contemporary photographs augment the text of this informative, moving work.” —School Library Journal (starred review)

“This wrenching look at our nation’s bloodiest conflict through the eyes of its youthful participants serves up history both heartbreaking and enlightening.” —Publishers Weekly “This well-researched and readable account provides fresh insight into the human cost of a pivotal event in United States history.” —The Horn Book (starred review)

From a Pulitzer Prize winner comes the story of an unforgettable moment in American history: the historic meeting between General Robert E. Lee and General Ulysses S. Grant that ended the Civil War. MacKinlay Kantor captures all the emotions and the details of those few days: the aristocratic Lee’s feeling of resignation; Grant’s crippling headaches; and Lee’s request--which Grant generously allowed--to permit his soldiers to keep their horses so they could plant crops for food.

Printed in color. U.S. History is designed to meet the scope and sequence requirements of most introductory courses. The text provides a balanced approach to U.S. history, considering the people, events, and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience). U.S. History covers key forces that form the American experience, with particular attention to issues of race, class, and gender.

Within two months of Confederate General Robert E. Lee's surrender at Appomattox Court House on 9 April 1865, the Confederacy had collapsed, and its armed forces had ceased to exist. In the spring of 1865, the U.S. Army faced the unprecedented task of occupying eleven conquered Southern states and administering "Reconstruction"-the process by which the former rebellious states would be restored to the Union. But

a rapid demobilization of the Army placed the remaining occupation troops at a disadvantage almost from the start. This brochure traces the Army's law enforcement, stability, and peacekeeping roles in the South from May 1865 to the end of Reconstruction in 1877, marking a unique period in American history. During that time, the Southern states remained under military occupation, and for several years, they were also ruled by military government. Veteran Army commanders such as Philip H. Sheridan, John M. Schofield, Daniel E. Sickles, Edward R. S. Canby, and Winfield S. Hancock may have found the work of Reconstruction less dangerous than fighting the Civil War had been, but they also found it no less challenging.

World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity

from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine "smart factories" in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government,

business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress. *Rise of American Democracy* UNC Press Books

Lucille Mathurin Mair (née Walrond) made a mammoth contribution to women in Jamaica and across the world. In this biography, Verene Shepherd traces Mair's evolving ideology through her roles as professional historian, wife, mother, mentor, diplomat, national and international civil servant, legislator, and women's rights activist. Mair's tireless commitment to the principles of justice and equality for women guided her work and she particularly sought to centre women of the Global South in the development agenda. The accounts of Mair's myriad and often uncredited contributions at the University of the West

Indies, the United Nations, and as a senator in the Government of Jamaica are enhanced by previously unpublished extracts from her notes and personal papers and interviews with her friends and colleagues. Shepherd weaves these sources together to give us a thought-provoking study of the evolution of a rebel woman.

Though best known for *The Red Badge of Courage*, his classic novel of men at war, in his tragically brief life and career Stephen Crane produced a wealth of stories—among them "The Monster," "The Upturned Face," "The Open Boat," and the title story—that stand among the most acclaimed and enduring in the history of American fiction. This superb volume collects stories of unique power and variety in which impressionistic, hallucinatory, and realistic situations alike are brilliantly conveyed through the cold, sometimes brutal irony of Crane's narrative voice.

How did Civil War soldiers endure the

brutal and unpredictable existence of army life during the conflict? This question is at the heart of Peter S. Carmichael's sweeping new study of men at war. Based on close examination of the letters and records left behind by individual soldiers from both the North and the South, Carmichael explores the totality of the Civil War experience—the marching, the fighting, the boredom, the idealism, the exhaustion, the punishments, and the frustrations of being away from families who often faced their own dire circumstances. Carmichael focuses not on what soldiers thought but rather how they thought. In doing so, he reveals how, to the shock of most men, well-established notions of duty or disobedience, morality or immorality, loyalty or disloyalty, and bravery or cowardice were blurred by war. Digging deeply into his soldiers' writing, Carmichael resists the idea that there was "a common soldier" but looks into their own words to find common threads in soldiers' experiences and ways of understanding what was happening around them. In the end, he argues that a pragmatic philosophy of soldiering emerged, guiding members of the rank

and file as they struggled to live with the contradictory elements of their violent and volatile world. Soldiering in the Civil War, as Carmichael argues, was never a state of being but a process of becoming.
