DANIEL KENDALL

The National Paint Dictionary Elsevier
As the demand for cleaner, safer, and more environmentally friendly finishing products increases, more woodworkers are turning to water-based finishes. This informative book is the only thorough treatment of water-based finishes. It will help woodworkers achieve superb finishes safely and quickly.

Final Report of the Committee, Chemical Section, National Safety Council, on Spray Coating Simon and Schuster

Oct. 1937- include: Review of patents recently granted.

Ednl Health & Safety Manl Press de
Laplantz, Incorporated

Covers the conventions of the Federation of paint and varnish production clubs and of the National paint, varnish and lacquer association.

Paint, Varnish and Lacquer Statistical

Handbook Springer

Summarizes core information for quick reference in the workplace, using tables and checklists wherever possible. Essential reading for safety officers, company managers, engineers, transport personnel, waste disposal personnel, environmental health officers, trainees on industrial training courses and engineering students. This book provides concise and clear explanation and look-up data on properties, exposure limits, flashpoints, monitoring techniques, personal

protection and a host of other parameters and requirements relating to compliance with designated safe practice, control of hazards to people's health and limitation of impact on the environment. The book caters for the multitude of companies, officials and public and private employees who must comply with the regulations governing the use, storage, handling, transport and disposal of hazardous substances. Reference is made throughout to source documents and standards, and a Bibliography provides guidance to sources of wider ranging and more specialized information. Dr Phillip Carson is Safety Liaison and QA Manager at the Unilever Research Laboratory at Port Sunlight. He is a member of the Institution of Occupational Safety and Health, of the Institution of Chemical Engineers' Loss Prevention Panel and of the Chemical Industries Association's 'Exposure Limits Task Force' and 'Health Advisory Group'. Dr Clive Mumford is a Senior Lecturer in Chemical Engineering at the University of Aston and a consultant. He lectures on several courses of the Certificate and Diploma of the National Examining Board in Occupational Safety and Health. [Given

5 star rating] - Occupational Safety & Health, July 1994 - Loss Prevention Bulletin, April 1994 - Journal of Hazardous Materials, November 1994 - Process Safety & Environmental Prot., November 1994
The National Paint Dictionary Taunton
This circular was developed to fill the need for a set of simple, yet sufficient tests, that would permit users of finishing materials for wood products to make certain that a given shipment was within allowable tolerances of a previously set standard. It should be used as a guide after full discussion by wood finishes manufacturers with their customers. [...] This circular deals solely with control testing as differentiated from evaluation testing, which should be conducted by skilled technologists. It is designed for use by those who are not necessarily technically trained, but who have been given comprehensive training in performing the tests and in properly reading the measuring devices recommended.--
Foreword (page 3).

The Paint Industry Magazine

Does the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated

temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Questions like these and more are answered in the Emergency Response Guidebook. Learn how to identify symbols for and vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous

materials.
