EUGENE SHANNON

Gantenbein Springer

This book addresses main issues concerned with the future learning, learning and academic analytics, virtual world and smart user interface, and mobile learning. This book gathers the newest research results of smart learning environments from the aspects of learning, pedagogies, and technologies in learning. It examines the advances in technology development and changes in the field of education that has been affecting and reshaping the learning environment. Then, it proposes that under the changed technological situations, smart learning systems, no matter what platforms (i.e., personal computers, smart phones, and tablets) they are running at, should be aware of the preferences and needs that their users (i.e., the learners and teachers) have, be capable of providing their users with the most appropriate services, helps to enhance the users' learning experiences, and to make the learning efficient.

Wally and Mae Rowman & Littlefield

The application of the Fourier transform is being seen to an increasing extent in all branches of chemistry, but it is in the area of chemical analysis that the greatest activity is taking place. Fourier transform infrared and nuclear magnetic resonance spectrometry are already routine methods for

obtaining high-sensitivity IR and NMR spectra. Analogous methods are now being developed for mass spectrometry (Fourier transform ion cyclotron resonance spectrometry) and microwave spectroscopy, and Fourier transform techniques have been successfully applied in several areas of electrochemistry. In addition the fast Fourier transform algorithm has been used for smoothing, interpolation, and more efficient storage of data, and has been studied as a potential method for more efficient identification of samples using pattern recognition techniques. Linear transforms have also been shown to be useful in analytical chemistry. Probably the most important of these is the Hadamard transform, which has been applied in alternative methods for obtaining IR and NMR data at high sensitivity. Even though measurements involving this algorithm will probably not be applied as universally as their Fourier transform analogs, in the area of pattern recognition application of the Hadamard transform will in all probability prove more important than application of the Fourier transform.

Erziehungswissenschaftliche Dokumentation Cornelsen Verlag

Das Buch setzt sich mit Entwicklungen der letzten Jahrzehnte auseinander und diskutiert sie zusammen mit aktuellen Ansätzen, schulpolitischen Vorgaben und wissenschaftlichen Erkenntnissen. Dabei entsteht ein stimmiges Gesamtkonzept, Traditionelles wie Aktuelles wird hier berücksichtigt. Das Standardwerk im Lehramt Grundschule und Förderschule! Aus dem Inhalt: Lernbereich Sprache: fünf Prinzipien des Sprachunterrichts das Fach Deutsch: Entwicklung zu einer Didaktik des sprachlichen Handelns die verschiedenen Kompetenzbereiche im Deutschunterricht Anfangsunterricht Deutsch "Gute Aufgaben" Leistungsbeurteilung inklusiver Deutschunterricht]

"Today the weather's going to be crazy. What should Sara and David wear?"--Page 4 of cover

Börsenblatt für den deutschen Buchhandel John Wiley & Sons

Human beings come equipped with a tendency to generally not want to leave thinking to others. With the endeavor to professionally, reflectively, and gracefully support each individual on the basis of this tendency, the paradigm of a curious, self-determined, and inquiring human is developed in this volume, which might point the way towards a promising future. In view of such a perspective, the authors regard the pedagogical construct of self-determined Inquiry Learning as just such a promising concept. The Theory of Inquiry Learning Arrangements (TILA) concretizes this approach according to the principles of critical multiplism. The effectivity of TILA is scrutinized via the personalized concepts AuRELIA (Authentic Reflective Exploratory Learning and Interaction Arrangements) and CrEEd (Criteria-based Explorations in Education). These concepts are presented in detail, empirically investigated, and underpinned with practical examples. In the current edited volume, the concept of self-determined Inquiry Learning is further empirically substantiated and presented to the international community.

Grammatik lernen leicht gemacht Die Übungsgrammatik ist ideal für alle, die die deutsche Grammatik von Niveau A1 bis B1 üben und wiederholen möchten. Sie eignet sich sowohl zum Selbstlernen als auch für den Einsatz im Unterricht. Die 2. aktualisierte Ausgabe bietet unterhaltsame Grammatik-Videos zur Erklärung grammatikalischer Phänomene. Mit dem Doppelseiten-Prinzip zum Erfolg Die 85 Kapitel sind übersichtlich aufgebaut: Auf der linken Seite finden Sie die einfachen, visuell gestützten Erklärungen, auf der rechten Seite die abwechslungsreichen Übungen mit niveaugerechtem Wortschatz. Alle Audios und Videos lassen sich über die kostenlose Cornelsen PagePlayer-App oder auf cornelsen.de/codes abspielen.

This book brings together internationally prominent scholars renowned for their work on post-Soviet republics, as well as outstanding emerging scholars native of Central Asia in order to discuss the state of education in the Central Asian Republics of Kazakhstan, Kyrgyzstan, Tajikistan, Turkmenistan, and Uzbekistan. Drawing on their individual contexts and research, the authors offer analyses and critiques of some of the social, political, and economic issues in education in their respective countries, and some insights about how local actions engage with the challenges and problems, as well as with the possibilities and opportunities they face. Since gaining their independence in 1991, the five republics of Central Asia have been undergoing some enormous political, social, linguistic, cultural, and economic changes, even as we write. This collection shows that researchers are increasingly interested in exploring the development of education in this part of the world. In these countries, education plays a significant role in transitioning from centrally planned to market economies and is seen as the key resource to facilitate entry into the global competitiveness sphere. This book will be of particular interest to educators, researchers, and policy makers engaged in research or with a particular interest in curricula, and education systems and reforms, and to undergraduate and graduate students studying and researching education in Central Asia or in other post-Soviet contexts.

Assessment Cultures Königshausen & Neumann

Eight-year-old Emma and her little dog, Tristan, take a magic carpet ride to the distant land of Barakash to help a genie recover his stolen magical nose ring.

Kevin Oxford University Press, USA

Thirteen-year-old Declan lives only for revenge. His mother, father and sister were all killed on the streets of Belfast, and Declan will stop at nothing to settle the score. When he is torn away from his native soil and sent to live with relatives in Canada, he is disgusted by their efforts to welcome him into their lives, and determined to make them regret their hospitality. Can he devise a plan to return to Ireland and rejoin his cause? Or will the strange beauty of his new life and surroundings weaken his resolve?

[The New Robinson Crusoe](#) Random House Books for Young Readers

Signs, artwork, stories, and photographs from the March for Science Movement and community. In January 2017, an idea on social media launched the global March for Science movement. In a few short months, more than 600 cities, 250 partners, and countless volunteers banded together to organize a historical event that drew people of all backgrounds, interests, and political leanings. On April 22, 2017, more than one million marchers worldwide took to the streets to stand up for the importance of science in society and their own lives—and each of them has a story to tell. Through signs, artwork, stories, and photographs, Science Not Silence shares some of the voices from the March for Science movement. From Antarctica to the North Pole, from under the sea to the tops of mountains, whether alone or alongside thousands, people marched for science. A citizen scientist with advanced ALS spent countless hours creating an avatar using technology that tracks his eye movements so that he could give a speech. Couples carrying babies born using in vitro fertilization dressed them in shirts that said “Made By Science.” The former U.S. Chief Data Scientist spoke about what really makes America great. Activists championed the ways science should serve marginalized communities. Artists created stunning signs, patients marched with the doctors who saved them, and scientists marched with the community that supports them. Every story is a call to action. The march was just the beginning. Now the real work begins. Science Not Silence celebrates the success of the movement, amplifies the passion and

The second edition of «Schools of Tomorrow, » Schools of Today: Progressive Education in the 21st Century documents a new collection of child-centered progressive schools founded in the first half of the twentieth century and provides histories of some contemporary examples of progressive practices. Part I discusses six progressive schools founded in the first part of the twentieth century (City and Country; Dalton; the Weekday School at Riverside Church; The Laboratory School at the Institute of Child Study; Alabama State Teachers College Laboratory High School; and Highlander), tracing them from their beginnings. Part II examines four more contemporary schools (Central Park East 1; Central Park East Secondary; Learning Community Charter School; and KIPP TEAM Academy), showing how progressive practices gained momentum from the 1960s onward. As a volume in the History of Schools and Schooling series, this book seeks to look to the past for what it can teach us today.

Wesen und Werden der Schulreform in Österreich MIT Press

Doing Practitioner Research focuses on helping practitioners conduct research in their own organisations, and attention is given to the best methods for doing this effectively and sensitively. The authors also attend to the theoretical, political and organisational context of doing research, as well as addressing the ethical and practical issues of undertaking research. The authors cover in detail the range of skills and techniques necessary to make a successful start to the process of becoming an effective practitioner researcher. This is an ideal text for growing number of practitioners working in health, education and social care who are undertaking research. Fox et al have provided the perfect introduction to why practitioners are in the unique position to conduct research that actually improves professional practice. This book will be essential reading for those professionals/practitioners engaged in research in their own organisation or undertaking a post-graduate qualification in Health, Social Care, or Education.

Large scale assessment influences national and international educational policy debates and reforms. Assessment data is increasingly used as a government instrument. However, within the contemporary realm of the current global testing regime both the cultural and the historical conditions of assessment are often neglected. This volume is therefore devoted to the reconstruction of "assessment cultures" (interpretation patterns, discourses, instruments, practices) and their involved groups of actors. The contributions cover examples of Western European, Eurasian, East Asian, Latin, and North American as well as international settings and refer to epochs ranging from the early modern period up to the current context.
