Balancing respect for religious conviction and the values of liberal democracy is a daunting challenge for judges and lawmakers, particularly when religious groups seek exemption from laws that govern others. Should students in public schools be allowed to organize devotional Bible readings and prayers on school property? Does reciting "under God" in the Pledge of Allegiance establish a preferred religion? What does the Constitution have to say about displays of religious symbols and messages on public property? Religion and the Constitution presents a new framework for addressing these and other controversial questions that involve competing demands of fairness, liberty, and constitutional validity. In this second of two major volumes on the intersection of constitutional and religious issues in the United States, Kent Greenawalt focuses on the Constitution's Establishment Clause, which forbids government from favoring one religion over another, or religion over secularism. The author begins with a history of the clause, its underlying principles, and the Supreme Court's main decisions on establishment, and proceeds to consider specific controversies. Taking a contextual approach, Greenawalt argues that the state's treatment of religion cannot be reduced to a single formula. Calling throughout for acknowledgment of the way religion gives meaning to people's lives, Religion and the Constitution aims to accommodate the maximum expression of religious conviction that is consistent with a commitment to fairness and the public welfare.

Rafik Schami's award-winning novel. In the classical Arab tradition of tale-telling, here is a magical book that celebrates the power of storytelling, delightfully transformed for modern sensibilities by an award-winning author. The time is present-day Damascus, and Salim the coachman, the city's most famous storyteller, is mysteriously struck dumb. To break the spell, seven friends gather for seven nights to present Salim with seven wondrous "gifts"—seven stories of their own design. Upon this enchanting frame of tales told in the fragrant Arabian night, the words of the past grow fainter, as ancient customs are yielding to modern turmoil. While the hairdresser, the teacher, the wife of the locksmith sip their tea and pass the water pipe, they swap stories about the magical and the mundane: about djinnis and princesses, about contemporary politics and the difficulties of bargaining in a New York department store. And as one tale leads to another... and another... all of Damascus appears before your eyes, along with a vision of storytelling—and talk—as the essence of friendship, of community, of life. A sly and graceful work, a delight to readers young and old, Damascus Nights is, according to Publishers Weekly, "a highly atmospheric, pungent narrative."

Baummanagement im städtischen Raum ist die wichtigste Grundlage für zukünftig grünere Städte. Zu diesem praxisorientierten Ansatz gehören Auswahl, Pflanzung, Pflege und Schutz von Bäumen sowie das gesamte Management des Baumbestands als eine kollektive Ressource. Urban Tree Management versucht, das Bewusstsein für die positiven Auswirkungen und Vorteile von Bäumen im städtischen Raum und deren Bedeutung für die Stadtbewohner zu schärfen. Beschrieben werden die Vorzüge und ausführlich die Folgen für die Lebensqualität in der Stadt und das Wohlbefinden ihrer Bewohner? Aspekte, die in Zeiten fortschreitender Urbanisierung zunehmend an Bedeutung gewinnen. Inhalte - Grundlagen, Methoden und Werkzeuge des urbanen Baummanagements - aktuelle Informationen zu Urban Forestry und Baumbiologie - positive Effekte und Einsatzmöglichkeiten von Stadtbaumen - Eigenschaften von, Anforderungen an und Auswahlkriterien für Stadtbaume - Zustand und Probleme von Stadtbaumen - Governance- und Managementaspekte - Programme im Rahmen der Umwelterziehung Urban Tree Management, herausgegeben von dem führenden Experten Dr. Andreas Roloff, ist ein ausgezeichnetes Referenzwerk für Pflanzenwissenschaftler, Gartenbauer, Dendrologen, Baumpfleger, Forstwissenschaftler, Stadtplaner, Experten für Parkanlagen und Landschaftsarchitekten. Dieses Praktikerbuch ist eine wichtige Ergänzung für Studierende einschlagiger Fachrichtungen und für Bibliotheken.

(Piano Solo Songbook). "I think there is a similarity between the infinite big and the infinite smallness of everything," says Yann Tiersen. "It's the same experiment looking through a microscope as it is a telescope." Named after a chapel in a small village on the island of Ushant, Kerber marks a new chapter in critically-acclaimed composer Yann Tiersen's career. A chapter still true to Tiersen's nuanced and subtle approach but one that sets out with his most overtly electronic material to date. Beautifully textured, highly immersive and thoughtfully constructed, Tiersen creates an electronic world, providing an environment in which the piano source exists. A sense of place has often been a central theme in Tiersen's work and here that is no different. Each track is tied to a place mapping out the immediate landscape that surrounds Tiersen's home, linking back to his thoughts on the possibilities of the infinite smallness. This official, exclusive folio is beautifully printed on high-quality, uncoated paper with striking graphic artwork. All seven pieces are presented for solo piano and follow an exclusive introduction to the project.

This book presents an interpretive, macro-historical, and sociological account of martyrdom. Moving

away from the notion of martyrdom as an object of individual behavior and seeing it instead as a significant cultural work performed by communities in the wake of a violent death, it provides a novel interpretation of Western political and religious history. In addition to thus redressing the disproportionate attention given to the concept's relationship to Islam, the author offers a new perspective on two defining historical processes: secularization and the rise of modern sovereignty in the form of the nation-state. An innovative analysis of the role of sacrifice in contemporary culture, which constitutes a timely critique of long-dominant theories of disenchantment and the privatization of religion, *The Ultimate Sacrifice* will appeal to sociologists and social theorists with interests in religion, politics, and the connection between the two.

ETHIOPIA is a compendium on Ethiopia and Northeast Africa for travellers, students, businessmen, people interested in Africa, policymakers and organisations. In this book 85 specialists from 15 countries write about the land of our fossil ancestor 'Lucy', about its rock-hewn churches and national parks, about the coexistence of Christians and Muslims, and about strange cultures, but also about contemporary developments and major challenges to the region. Across ten chapters they describe the land and people, its history, cultures, religions, society and politics, as well as recent issues and unique destinations, documented with tables, maps, further reading suggestions and photos.

It's time to get off the beaten path. Inspiring equal parts wonder and wanderlust, *Atlas Obscura* celebrates over 700 of the strangest and most curious places in the world. Talk about a bucket list: here are natural wonders—the dazzling glowworm caves in New Zealand, or a baobab tree in South Africa that's so large it has a pub inside where 15 people can drink comfortably. Architectural marvels, including the M.C. Escher-like stepwells in India. Mind-boggling events, like the Baby Jumping Festival in Spain, where men dressed as devils literally vault over rows of squirming infants. Not to mention the Great Stalacpipe Organ in Virginia, Turkmenistan's 40-year hole of fire called the Gates of Hell, a graveyard for decommissioned ships on the coast of Bangladesh, eccentric bone museums in Italy, or a weather-forecasting invention that was powered by leeches, still on display in Devon, England. Created by Joshua Foer, Dylan Thurau and Ella Morton, *ATLAS OBSCURA* revels in the weird, the unexpected, the overlooked, the hidden and the mysterious. Every page expands our sense of how strange and marvelous the world really is. And with its compelling descriptions, hundreds of photographs, surprising charts, maps for every region of the world, it is a book to enter anywhere, and will be as appealing to the armchair traveler as the die-hard adventurer. Anyone can be a tourist. *ATLAS OBSCURA* is for the explorer.

This volume investigates the place of Dutch history and Dutch-derived culture in America over the last four centuries. It considers how the Dutch have fared in America, and it explores how American conceptions of Dutchness have developed, from Henry Hudson's historic voyage to Manhattan in 1609 through the rise of Dutch design at the turn of the twenty-first century. Essays probe a rich array of topics: Dutch themes in American arts and letters; the place of Dutch paintings in American collections; shifting American interests in Dutch art, literature, and architecture; the experience of Dutch immigrants in America; and the Dutch Reformed Church in America. "Going Dutch" presents a much needed overview of the Dutch-American experience from its beginnings to the present.

Set in the Warring States period, Jiang Li, Warrior Woman of Yueh tells the story of one of the epic battles of Ancient China between the enemy states of Yueh and Wu. Marked by the magic of White Tiger Mother and trained to use the staff by the great mountain ape, Grandfather Wang, Jiang Li grows into a beautiful woman, loved by all in Yueh who meet her. Faced with the choice of becoming concubine to the Prince whom she loves, or a warrior and savior of Yueh, she forfeits love of a man for love of her country. While Jiang Li trains to save the State of Yueh, another woman warrior, Brother Rat, trains to save her State of Wu. The two women meet in dreams, and by the time they meet in life, they have become friends who must fight to the death.

This book traces the evolution of theory of structures and strength of materials - the development of the geometrical thinking of the Renaissance to become the fundamental engineering science discipline rooted in classical mechanics. Starting with the strength experiments of Leonardo da Vinci and Galileo, the author examines the emergence of individual structural analysis methods and their formation into theory of structures in the 19th century. For the first time, a book of this kind outlines the development from classical theory of structures to the structural mechanics and computational mechanics of the 20th century. In doing so, the author has managed to bring alive the differences

between the players with respect to their engineering and scientific profiles and personalities, and to create an understanding for the social context. Brief insights into common methods of analysis, backed up by historical details, help the reader gain an understanding of the history of structural mechanics from the standpoint of modern engineering practice. A total of 175 brief biographies of important personalities in civil and structural engineering as well as structural mechanics plus an extensive bibliography round off this work.

One Health addresses health challenges arising from the intertwined spheres of humans, animals and ecosystems. This handbook is the product of an interdisciplinary effort to provide science-based guidance for the evaluation of One Health and other integrated approaches to health. It guides the reader through a systems approach and framework to evaluate such approaches in a standardised way. It provides an overview of concepts and metrics from health and life sciences, social sciences, economics, and ecology that are relevant for the evaluation of the processes involved, as well as the characterisation of expected and unexpected outcomes of One Health initiatives. Finally, the handbook provides guidance and practical protocols to help plan and implement evaluations in order to generate new insights and provide meaningful information about the value of One Health. The handbook is intended for practitioners, researchers, evaluators as well as funders of integrated approaches to health and beyond.

The present volume studies three oral epic traditions in the Tulu language (a Dravidian language). They have been living performance traditions in the Tulu speaking coastal districts of Karnataka up to the present day. For the first time, Indian, European and American scholars working on Tulu oral epics, folklorists, anthropologists as well as Indologists are brought together. All texts discussed belong to the indigenous Tulu genre called paddana, which ranges from shorter invocations of local

deities to texts of epic dimensions. Because paddanas had been transmitted exclusively orally until the 19th century, it is very difficult to assign their composition to a particular historical period. The social universe described in some of them may reflect a late medieval setting. Texts of one of the epic traditions have been collected over a period of almost 150 years, from the mid-19th century to the early 2000s. Two papers (H. Bruckner / V. Rai and V. Nandavara) deal with this tradition which is part of the oldest collections. In contrast, the popular epic of the Bant heroine, Siri, only attracted the attention of scholars from the 1970s onwards. In this book, the Siri tradition is studied by C. Gowda, A. Alva, and P. Schuster-Lohlau. Peter J. Claus' important paper introduces Koddabba, the champion of a Dalit community. The wealth of texts and versions reflected in this volume allows, for the first time, to make systematic comparisons between different texts of the same tradition as well as between narrative elements and cultural concepts found in different traditions. Linguistic analysis, too, is just beginning to reveal possibly unique textual and narrative features.

Anthropologists have written a great deal about the coastal adaptations and seafaring traditions of Pacific Islanders, but have had much less to say about the significance of rivers for Pacific island culture, livelihood and identity. The authors of this collection seek to fill that gap in the ethnographic record by drawing attention to the deep historical attachments of island communities to rivers, and the ways in which those attachments are changing in response to various forms of economic development and social change. In addition to making a unique contribution to Pacific island ethnography, the authors of this volume speak to a global set of issues of immense importance to a world in which water scarcity, conflict, pollution and the degradation of riparian environments afflict growing numbers of people. Several authors take a political ecology approach to their topic, but the emphasis here is less on hydro-politics than on the cultural meaning of rivers to the communities we describe. How has the cultural significance of rivers shifted as a result of colonisation, development and nation-building? How do people whose identities are fundamentally rooted in their relationship to a particular river renegotiate that relationship when the river is dammed to generate hydro-power or polluted by mining activities? How do blockages in the flow of rivers and underground springs interrupt the intergenerational transmission of local ecological knowledge and hence the ability of local communities to construct collective identities rooted in a sense of place?
