 In the city of R., nothing bad ever happens, because the residents maintain the status quo at all costs. But the children of R. have had enough. When a new family--two moms and their three kids--arrive just before Christmas, they team up with the local kids on a magical adventure to save Christmas and bring community back to the city of R.
Jewish History Atlas Tara Publishing
 The ultimate quest for the world's most mysterious creatures The Loch Ness Monster, Bigfoot, the Abominable Snowman -- these are the names of the elusive beasts that have caught the eye and captured the imaginations of people around the world for centuries. Recently, tales of these "monsters" have been corroborated by an increase in sightings, and out of these legends a new science has been born: cryptozoology -- the study of hidden animals. *Cryptozoology A to Z*, the first encyclopedia of its kind, contains nearly two hundred entries, including cryptids (the name given to these unusual beasts), new animal finds, and the explorers and scientists who search for them. Loren Coleman, one of the world's leading cryptozoologists, teams up with Jerome Clark, editor and author of several encyclopedias, to provide these definitive descriptions and many never-before-published drawings and photographs from eyewitnesses' detailed accounts. Full of insights into the methods of these scientists, exciting tales of discovery, and the history and evolution of this field, *Cryptozoology A to Z* is the most complete reference ever of the newest zoological science.

 Jacob Freisten's goal in life is to go about unnoticed. He's perfect at gliding past the jocks' lockers and sneaking into his English class. That was, until now. If Jacob wants to pass English, he must work for extra credit on the stage crew of the school production of *The Wizard of Oz*. Jacob, who is usually in a fog anyway, has the job of running the fog machine. The problem is that Maria Tresser, the girl of his dreams, is cast as the Wicked Witch. Jacob's already made a fool of himself in front of Maria. How can he face her again?

 This book explains in a clear and simple way what life is and how it flows within our cells, between people and through people. It is a practical manual that will help us to "feel" life, to vibrate and breathe the life inside of our bodies and of all living beings. A key focus of this work is how emotional impact affects our pericardium, which is the membrane that envelops, maintains and protects the heart.
100 Steps for Science Flashes of Genius
 When Charles Darwin published *The Origin of Species* in 1859, he shocked the world. In it he claimed that humans were just another

animal species that had evolved from more primitive life forms. Years earlier, Darwin had collected thousands of animal specimens during a five-year voyage around the world, specimens that he used to make his case for biologic evolution through natural selection. Darwin and the True Story of the Dinosaurs tells the story of the brilliant naturalist who changed humankind's understanding of its origins.
