Nursing Leadership and Management

University of Toronto Press

Draw upon the foundations necessary for finding and interpreting research evidence across all healthcare professions. Revised to reflect the most current changes in the field of clinical research in rehabilitation and medicine, you'll find a growing emphasis on evidence-based practice (EBP) as well as new vocabulary that is being integrated into research and practice across

disciplines.

NDNQI Case Studies in Nursing Quality Improvement

John Wiley & Sons

CARING FOR THE DISPLACED AND

UNINSURED An essential text to

understanding key aspects of caring for uninsured people from underserved populations Caring for the Displaced and Uninsured presents clinical case studies that focus on the issues faced primarily by patients who are uninsured, self-paying, or are visiting from their home countries. While addressing the clinical aspects of primary care for a variety of conditions, these case studies go a step

further to confront the issues faced by patients who seek care in clinics for the uninsured. Each case highlights the challenges presented by cultural, language and economic differences to providing high quality care, in particular for those whose jobs negatively affect their health, such as through musculoskeletal pain, neurological problems, prolonged standing, depression, or anxiety about feeding and housing their families. The cases explore how the healthcare provider approaches care with insufficient resources for patients who may have fled torture and violence, poverty and homelessness to face new challenges in the United States. The healthcare provider plays a key role in the adjustment of people seeking a better life for themselves and

their families. Caring for the Displaced and Uninsured addresses: Issues related to family, medication, food, housing, finances, work, trauma, mental health, specialty access, delayed screening, visitors, and immigration How to think in broader terms when treating immigrant or uninsured patients The nuances of treating patients who have lived outside of their home country, apart from their families, for many years Tips for providing quality healthcare within the parameters that currently exist in the healthcare system This text provides valuable insight and perspective for nursing and healthcare students, particularly those taking community health classes and classes that focus on uninsured and underserved populations. Evolve Apply John Wiley & Sons

LPN to RN Transitions, 4th Edition makes it easy for you to take the next step in your nursing career with all of the essential information you need to pursue your RN degree and practice as a registered nurse. This new edition includes practical information on role transition, cultural competency, delegation, classroom study habits, professional writing, and more. Plus, newly-revised chapters provide the latest information for one complete, indispensable resource to help you succeed in everything from the classroom to clinical practice! Improved organization gives you a clear vision of what the profession of nursing encompasses and ends with a career-affirming review of the path you must travel to reach the goal of registered

nurse. Critical thinking questions give you practice applying the critical-thinking skills you will need on the job. Clear, succinct coverage helps you focus on the issues that an RN must address for a successful practice. FYI boxes encourage you to think about how your day-to-day interactions will change as an RN. Additional illustrations create a more engaging reading experience. Revised table of contents helps you quickly locate information. Casual writing style makes it easier to read the text and gain practical advice. Key Terms and Key Points help you learn vocabulary words central to the topic discussed. Learning objectives in each chapter orient you to the broad range of topics that will be emphasized in the RN curriculum. NEW! Information on Role Transition prepares

you to begin working in a clinical practice environment. NEW! Cultural Competency information covers how to work with a diverse set of patients. NEW! Prepare Now to Pass NCLEX® chapter provides strategies to use throughout the ADN curriculum to help you prepare a study plan tailored for success on the NCLEX-RN exam. NEW! Additional case studies demonstrate how the concepts discussed apply to real-life patients and colleagues. NEW! Math and Calculations content streamlined online for quick access.

Orthopedic and Sports Medicine Case Studies for Nurse Practitioners F.A. Davis
" This is the first research-based book to confront workplace issues facing nurses who have disabilities. It not only examines in depth their experiences,

roadblocks to successful employment, and misperceptions surrounding them, but also provides viable solutions for creating positive attitudes towards them and a welcoming work environment that fosters hiring and retention. From the perspectives and actual voices of nurses with disabilities, nurse leaders, nurse administrators, and patients, the book identifies nurses with disabilities (including sensory, musculoskeletal, emotional, and mental health issues), discusses why they choose to leave nursing or hide their disabilities, and analyzes how their disabilities may influence career choices. "

Nursing Health Assessment Jones & Bartlett Publishers

These online case studies provide an introduction to a real-world, patient

situation - with critical-thinking questions to help students learn to manage complex patient conditions and make sound clinical judgements. These questions cover nursing care for clients with a wide range of physiological and psychosocial alterations, as well as related management, pharmacology, and nursing concepts. Complete PN Online Case Studies The Complete PN Online Case Studies collection provides a comprehensive student remediation solution that encompasses review of content and test item practice from the major PN speciality content areas, including Fundamentals, Medical/Surgical Nursing, Maternity/Pediatrics, and Psychiatric/Mental Health Nursing.

Case Studies in LPN/LVN Nursing E-Book Elsevier Health Sciences

A clinical focus with unfolding case studies, stimulating questions, and an outstanding art program of 550 photographs and line illustrations make important concepts easy to understand and apply. You'll also find a discussion, unique to this text, of the pathology of

what necessitates amputations and why you would choose one prosthetic/orthotic over another.

Children's Nursing Case Book Elsevier

Get much-needed exposure to real-world clinical scenarios and psychiatric evaluations, with this invaluable guide to positive, effective psychiatric advance practice nursing care. For an expert guide to providing patient-centered, evidence-based psychiatric care, keep *Psychiatric Case Studies for Advanced Practice* by your side. Practical and easy-to-follow, these more than 50 case scenarios clearly display the complaints, diagnoses, and treatments of the most common psychiatric disorders, supporting the critical decision-making skills of nurses practicing in a broad range of settings. Psychiatric, family,

emergency, and general practice nurse practitioners of all experience levels will find this an invaluable aid for creating an informed, holistic practice. Follow the real-life cases and expert analysis of psychiatric patients of a wide variety of ages, backgrounds, and conditions . . . Real-world child, adolescent, adult, and geriatric inpatient and outpatient psychiatric case studies that emphasize problem-based learning and an evidence-based practice Current diagnostic content from the *Diagnostic and Statistical Manual of Mental Disorders, 5th Edition (DSM-5)*, that includes DSM-5's newer diagnoses—gender dysphoria, binge eating disorder, and autism spectrum, plus current treatments for alcohol and opiate addiction Sample routine

screening tools that offer convenient checklists and handouts to support patient treatment. Content presented in a simple format—organized by age and indexed by diagnostic category for quick reference. Each case presented in a standard format: chief complaint, history, mental status, diagnosis, differential diagnosis, treatment plan, and rationale for treatment prescribed—with questions at the end that guide you to create a diagnosis using the DSM-5. Cases addressing a wide range of disorders and supporting all experience levels in a variety of treatment settings—counseling centers, correctional facilities, homeless shelters, inpatient psychiatric units, and hospital consultation and liaison services. Treatments and rationales that

represent current, evidence-based research—treatment sections divided into psychopharmacology, diagnostic tests, referral, psychotherapy, and psychoeducation. Supplemental teaching tool for graduate psychiatric nurse practitioner/APN programs.

Clinical Case Studies in Home Health Care Elsevier

Gain expertise in primary care of older adults with a case-based approach to geriatric primary care and multimorbidity management. Written by two leading academic and clinical experts in geriatric primary care, *Case Studies in Geriatric Primary Care and Multimorbidity Management*, 1st Edition uses detailed Exemplar Case Studies and Practice Case Studies to teach you how to think like an expert geriatric clinician.

Because most older adults have more than one condition when seeking care, both Exemplar and Practice Case Studies place a strong emphasis on "multimorbidity" management, (the management of patients with a host of complex, interacting conditions). To provide extensive practice in learning how to think like an expert, case studies reflect the reality that care does not necessarily begin or end in the primary care setting. Cases therefore move fluidly from primary care to acute care to inpatient rehabilitation to assisted living to long-term care. Building on foundational introductory chapters, cases also call on you to develop interprofessional collaboration skills and reflect the diversity of today's older adults, in terms of age (young-old to old-

old), gender, culture, ethnicity, sexuality, socioeconomic status, and more! As you work through both basic-level and advanced Practice Case Studies, you can make extensive notes in the printed book and then go online to submit answers for grading and receive expert feedback for self-reflection. NEW! Introductory unit on the core principles of caring for older adults gives you a strong foundation in the principles of geriatric primary care and multimorbidity management. NEW! and UNIQUE! Exceptionally detailed, unfolding Exemplar Case Studies demonstrate how an expert advanced practitioner "thinks clinically" to provide care to older adults with multiple conditions. NEW and UNIQUE! Exceptionally detailed, unfolding Practice

Case Studies emphasize patient diversity and multimorbidity management across healthcare settings to help you develop advanced clinical reasoning skills for geriatric primary care. NEW and UNIQUE! Strong emphasis on multimorbidity management focuses on caring for older adults with multiple chronic conditions. NEW! Emphasis on the continuum of care across settings reflects the reality that care does not necessarily begin or end in the primary care setting but can move from primary care to acute care to inpatient rehabilitation to assisted living to long-term care, and so forth. NEW! Online answer submission for grading and expert feedback for self-reflection. NEW! Emphasis on patient diversity reflects the makeup of today's older adult,

population in terms of age (young-old to old-old), gender, culture, ethnicity, sexuality, socioeconomic status, and more. NEW! Emphasis on interprofessional collaboration use Exemplar Case Studies and Practice Case Studies to allow you to demonstrate your interprofessional collaboration skills.

The book that set the standard for the role of correlating imaging findings to clinical findings as part of a comprehensive patient evaluation, more specific treatment plans and better outcomes is back in a New Edition. Here's everything Physical Therapists need to know about medical imaging. This comprehensive guide helps you

develop the skills and knowledge you need to accurately interpret imaging studies and understand written reports. Begin with a basic introduction to radiology; then progress to evaluating radiographs and advanced imaging from head to toe. Imaging for commonly seen traumas and pathologies, as well as case studies prepare you to meet the most common to most complex challenges in clinical and practice.

Case Studies in LPN/LVN Nursing

F.A. Davis

Covering a wide range of issues, the 22 cases included in *Case Studies in Canadian Health Policy and Management* constitute an exceptional resource for bringing real-life policy questions into the classroom. Based on actual events, the cases have been developed with

input from mid-career professionals with strong field experience and extensively tested in Raisa B. Deber's graduate case study seminar at the University of Toronto. Each case features both a substantive health policy issue and a selection of key concepts and methods appropriate to examining public policy, public health, and health care management issues. In each case, the authors provide a summary of the case and the related policy issues, a description of events, suggested questions for discussion, supporting information, and both works cited and further reading. Suitable for graduate and undergraduate classrooms in programs in a variety of fields, *Case Studies in Canadian Health Policy and Management* is an exceptional

educational resource. This second edition features all new cases, as well as adding an introductory chapter that provides a framework and tools for health policy analysis in Canada.

Prioritization, Delegation, and Assignment in LPN/LVN Nursing - E-Book

DEStech Publications, Inc
This one-of-a-kind book delivers challenging, clinically relevant case-based learning tools regarding orthopedics and sports medicine for advanced practicenursing students and practitioners. Written by nurse practitioner/educators, it fills a gap in information and guidelines for treatment of this population in primary and acute care environments. Cases across the lifespan cover areas of orthopedics and sports medicine most likely to be

encountered. Cases are described in depth to foster a comprehensive learning experience and to facilitate inductive and deductive critical reasoning. Each follows a template that encompasses the context for the case, chief patient complaints and history along with physical assessment findings, diagnostic evaluation, interventions, evaluation of care and outcome, and references for additional information. An accompanying teaching guide aids instructors in accelerating critical thinking. Key Features: Fills an identified gap in available literature Reflects both primary care and acute care across the lifespan Includes referral red flags and scope of practice for each case Formats cases for both inductive and deductive reasoning Offers focused instructor

manual to facilitate meaningful learning

This new edition includes practical information on classroom study habits, professional writing, knowledge and skills acquisition, and more. Plus, newly-revised chapters provide the latest information for one complete, indispensable resource to help you succeed in everything from the classroom to clinical practice! Clear, succinct coverage focuses your attention on the issues that an RN must address

for a successful practice. Critical thinking questions gives you practice applying the critical-thinking skills you will need on the job. FYI boxes encourage you to think about how your day-to-day interactions will change as an RN. Key terms at the beginning of each chapter help you master vocabulary words central to the topic discussed. Learning objectives in each chapter touch on the broad range of topics that will be emphasized in the RN curriculum. NEW! Passing NCLEX chapter provides strategies to help you succeed on the NCLEX-RN exam. Case studies in each chapter demonstrate how the concepts discussed apply to real-life patients and colleagues. Summary content presented in a bulleted-list format offers a quick chapter-review for test preparation. Two-

color text creates a more engaging reading experience. Revised table of contents helps you quickly locate information. Improved organization in each chapter gives you a clear picture of what the profession of nursing encompasses and ends with a career-affirming review of the path you must travel to become a registered nurse. Casual writing style makes it easier to read the text and gain practical advice.

Foundations of Clinical Research

Springer Publishing Company

Nursing children and young people is increasingly complex requiring nurses to apply their knowledge and skills to a wide scope of illnesses and situations. The challenges to nurses to analyse, reflect on different perspectives and then adapt practices to the benefit of

service users are reflected in this book. Each scenario in this text is created based on real life cases and practice. The 23 cases connect knowledge with practice and guide you through the anatomy and physiology and the physical and psychological responses to stressors, which are then linked to intervention decisions. Cases include:

- Providing care for children and young people with life-limiting conditions
- Acutely ill children including those with asthma, and an infant with pyrexia and febrile convulsions
- Long term conditions including diabetes, renal disease and the transfer to adult services
- Those who are critically ill such as a child with typhoid fever and a toddler with a head injury
- Supporting emotional and mental health in anorexia

and autistic spectrum disorder • Promoting healthy lifestyles, considering obesity and risky behaviour • Care for children with trauma, including a child with a learning disability Remaining vigilant for indicators of safeguarding concern, encouraging self-care, and promoting mental resilience are all incorporated, with examples from a range of care environments. Calculation exercises are interspersed to keep these skills sharp. This Case Book is an ideal learning resource, tailored to help nurses learn in a focused way about practice and excel, whether on placements, in academic work, or in professional practice. "Developed from a partnership between a University Research Group and an NHS Trust, this practical children's nursing case textbook bridges

theory and practice by presenting 23 case scenarios on complex, sensitive and difficult to manage clinical situations in an accessible and user-friendly manner. The inbuilt activities, calculation exercises, question and answer format and extra resources make this an excellent interactive resource for nurses to engage in critical thinking and reflection about each case." Dr. Veronica Lambert, Senior Lecturer Children's Nursing, Dublin City University, Ireland "This book will be useful for nurses in the UK who work with children and families in a variety of settings. Its format based on case studies and 'what would you do' and 'what do you need to do' scenarios will make it a useful tool for teaching clinical care for children and families." Professor Linda Shields, School of

Nursing, Midwifery and Indigenous Health, Charles Sturt University, Bathurst, Australia "What Tony Long has achieved is to produce a textbook with contributions from esteemed practicing children's nurses which gives enhanced credibility to each of the case studies. Tony and his colleagues have created these case studies to help children's and young people's nurses fully understand the complexities of the needs of both children and their families or carers during their healthcare trajectory. This new book crucially never forgets the primary mission of the children's nurse which is to uphold their mantra of 'the child first and always'." Alan Glasper, Emeritus Professor of children's and young people's nursing at the University of Southampton, UK

Case Studies in Gerontological Nursing for the Advanced Practice Nurse Sigma Theta Tau

Designed for health care professionals in multiple disciplines and clinical settings,

this comprehensive, evidence-based wound care text provides basic and advanced information on wound healing and therapies and emphasizes clinical decision-making. The text integrates the latest scientific findings with principles of good wound care and provides a complete set of current, evidence-based practices. This edition features a new chapter on wound pain management and a chapter showing how to use negative pressure therapy on many types of hard-to-heal wounds. Technological advances covered include ultrasound for wound debridement, laser treatments, and a single-patient-use disposable device for delivering pulsed radio frequency.

Ethical Case Studies for Advanced Practice Nurses F.A. Davis

This one of a kind book delivers

challenging, clinically relevant case-based learning tools regarding orthopedics and sports medicine for advanced practice nursing students and practitioners. Written by nurse practitioner/educators, it fills a gap in information and guidelines for treatment of this population in primary and acute care environments. Cases across the life span cover areas of orthopedics and sports medicine most likely to be encountered.

LPN to RN Transitions Jones & Bartlett Learning

Praise for the first edition: “This is an excellent teaching guide and resource manual for instructors, gerontological nursing students, and practicing nurses and social workers who wish to learn more about geriatric concerns and care.

It will be kept by nursing students long after they graduate as a guide to resources that will be valuable throughout their nursing careers. As a home care nurse working mainly with the geriatric community, I found the resources helpful in my practice. As an instructor, I found the book to be a very useful guide for teaching geriatrics.”
Score: 90, 4 Stars —Doody’s Medical Reviews “[This] is a unique volume that effectively addresses the lack of gerontology case studies for use with undergraduate nursing students. Case studies are a pedagogically powerful approach to active learning that offer opportunities to apply content to clinical practice.” —The Gerontologist “The case narrative approach of this book promotes active learning that is more

meaningful to students (and practicing nurses) and more likely to increase the transfer of evidence into practice. An excellent resource for faculty (staff educators) to facilitate critical learning skills.” —Liz Capezuti, PhD, RN, FAAN Dr. John W. Rowe Professor in Successful Aging Co-Director, Hartford Institute for Geriatric Nursing New York University College of Nursing Vivid case examples help guide nurses in developing appropriate interventions that include complementary and alternative health therapies and provide a basis for evaluating outcomes. Exercises interspersed throughout each case study include numerous open-ended and multiple-choice questions to facilitate learning and critical thinking. The text is unique in that some of the presented

cases focus on psychosocial issues such as gambling addiction, hoarding behavior, emergency preparedness, and long-distance caregiving. Cases also depict geriatric clients who are living healthy, productive lives to counter myths and negative attitudes about older adults. Scenarios demonstrating ethical dilemmas prepare students to appropriately respond to “gray area” situations. The text is geared for AACN and NLN accreditation and is organized according to the needs of actual clinical settings. With cases that take place in the home and community or within primary, acute, and long-term care facilities, this book will be useful for courses specific to gerontology nursing or across any nursing curriculum. New to the Second Edition: A completely new

section of Aging Issues Affecting the Family New cases addressing health care disparities, aging in place, and prevention of catheter-associated urinary tract infection Additional contemporary case studies The addition of Quality for Safety in Nursing Education (QSEN) initiatives A greater focus on prioritization and delegation of client's needs infused throughout exercises Gerontology Nursing Case Studies, Second Edition Elsevier Health Sciences Provides a practical approach to leadership and management principles specific to clinical settings Coverage includes clinical decision-making, technology to improve patient outcomes, and leadership and management practice in inter-professional healthcare delivery Multiple case studies This

textbook is intended for students preparing as advanced practice nurses, doctoral physical therapists, doctoral pharmacists, and other advanced practice professionals. The book provides practical approaches to the application of leadership and management principles while systematically presenting the content needed for skilled leadership in varied clinical settings. Chapters are devoted to leadership change, understanding health organizations and systems, technology to improve population-based care, using critical thinking principles to improve patient outcomes, clinical decision-making using evidence-based practice, and inter-professional healthcare delivery. Telehealth and the impacts of the Affordable Care Act are also

discussed. A case study is presented at the beginning of each chapter and incorporated into the theoretical material as a continuing illustration. *Porth* Springer Publishing Company Med-Surg Success in the Palm of Your Hand Master the art of critical thinking and clinical reasoning with this book designed to help you develop and utilize the nursing process and prioritization in real to life case studies surrounding the most commonly seen and tested patient diagnosis. After Reading This Book You Will Improve your clinical reasoning skills Develop confidence in answering difficult Med-Surg questions Become familiar with the most common patient disorders Learn how to answer hard NCLEX(R) style questions Improve prioritization skills Master the nursing process in

clinical settings Case Study Layout Client case presentation Questions regarding client background Case progression Additional critical thinking questions Rational Each case study includes 8-15 questions that require you to think beyond the most simple rational. Case studies also include highly detailed and in depth rationales (over 500 words) to insure that you are learning as much as possible about the disease process. Disease Processes Covered in this Book Congestive Heart Failure Ischemic Stroke Pneumothorax Hypertensive Crisis End Stage Renal Disease Cirrhosis Acute MI (STEMI) Hypothyroidism End Stage Renal Disease COPD Seizure Disorder Sepsis CABG Pancreatitis Respiratory Acidosis The selection process for the 15 diseases covered in this book included drawing on

my experience as a CCRN in a large metropolitan ICU, speaking with other nurses in various specialties, referring to a mountain of NCLEX(R) prep books, reviewing CCRN study materials, speaking with physicians, and reviewing NIH (National Institute of Health) data regarding the most commonly presenting conditions in hospitals. Scroll up to buy!

The LPN's Companion Createspace Independent Publishing Platform Real-life primary care case studies* from more than 50 primary care providers, including physician assistants, nurse practitioners, and physicians! 101 Primary Care Case Studies offers real-life patient scenarios and critical thinking exercises to help you work through a patient's chief complaint. Through

narrative case studies, you will determine how best to diagnose, treat, and manage your patient based on the history of present illness, review of systems, relevant history, and physical examination findings. This workbook will ask probing questions to help you determine differential and most likely diagnoses, diagnostic tests to order, and appropriate patient management strategies using relevant and timely references to support your decisions. The organization of each case study simulates the patient care journey from chief complaint to outcome. Serving as a virtual clinical preceptor, this workbook can be used independently or in a classroom setting. It is accompanied by a robust online student supplement that provides answers to all questions, real

outcomes of the cases, and valuable personal insights from the authors on how the patient was successfully managed. Not only will this workbook help you work through patient cases clinically, it will also share important, but often overlooked, bedside manner skills needed to successfully communicate with and care for your patients. Covering conditions across all organ systems and across the lifespan, this workbook is organized by chief complaint, providing an authentic perspective on what to expect in the patient care environment. It even includes information on pathophysiology and how to use ICD-10 and CPT (E/M) codes in your documentation. The book uniquely weaves together both the science and art of medicine by including personal

insights into quality and compassionate care. Key Features Provides real-life patient cases from an interprofessional author team of physician assistants, nurse practitioners, and physicians Uses a templated case study design and critical thinking exercises to help you methodically work through various patient scenarios Teaches clinical and bedside manner skills imperative for delivering quality patient care Covers patients across the lifespan, including pediatric, adolescent, adult, and geriatric populations Offers additional insight on patient education, medical and legal concerns, and interprofessional collaboration Includes a robust online student supplement with valuable insights from the authors on how they successfully managed the cases Provides

instructors with a table of contents that is filterable by chief complaint,

diagnosis, patient population, and organ system *Details changed to protect patient information.
