Night Night Spot!

Perfection Learning Newbery-winning Rules meets Counting by 7s in this affecting story of a girl's devotion to her brother and what it means to be home. When eleven-year-old Thyme Owens' little brother, Val, is accepted into a new cancer drug trial, it's just the second chance that he needs. But it also means the Owens family has to move to New York, thousands of miles away from Thyme's best friend and everything she knows and loves. The island of Manhattan doesn't exactly inspire new beginnings, but Thyme tries to embrace the change for what it is: temporary. After Val's treatment shows real promise and Mr. Owens accepts a full-time

position in the city, Thyme has to face the frightening possibility that the move to New York is permanent. Thyme loves her brother, and knows the trial could save his life—she'd give anything for him to be well—but she still wants to go home, although the guilt of not wanting to stay is agonizing. She finds herself even more mixed up when her heart feels the tug of new friends, a first crush, and even a crotchety neighbor and his sweet whistling bird. All Thyme can do is count the minutes, the hours, and days, and hope time can bring both a miracle for Val and a way back home. With equal parts heart and humor, Melanie Conklin's debut is a courageous

and charming story of love and family—and what it means to be counted.

A bestselling thriller by Mirjam Mous play my DVD! it's the one with the yellow cover do it within five minutes otherwise all hell will break loose Class 2C sets off on a coach trip to the Ardennes for a work week. At least, that was the plan. They are barely underway when one of the pupils receives a strange message on his phone. There appears to be a bomb on board the bus. No-one may enter or leave, otherwise the bomb will explode. It soon becomes apparent that someone on the bus knows more about this than they are letting on. Does

one of the pupils know who placed the bomb? Or worse still, did someone from class 2C place the bomb themselves? What happened over the preceding months for things to get to this stage? Not just at school but also in the students' and teachers' homes. Plenty of people turn out to have motives and hidden agendas. But who is really behind it? And while the whole of the Netherlands watches from a distance via live broadcasts, it is up to class 2C to unravel who the perpetrator is and, more importantly, how they can save their own lives.

The Secret Life of

Cows: this

rediscovered gem tells

the charming tale of

how a baby llama

transformed a Welsh

farming family forever

(with a foreword by

John Lewis-Stempel).

Things llamas like:

Snaffling cherry

brandy, Easter eggs,

and the Radio Times. Fluttering movie star eyelashes at surprised visitors. Curling up in 'tea-cosy' position by the fire. Orbiting, helicoptering, and oompahing. Humming along to classical music. Locking victims in the lavatory. Things llamas dislike: Having toenails trimmed by a visiting circus. Being adopted mother to an orphaned lamb. Invitations to star on Blue Peter. Accidentally swimming. Snowdonia's rainfall. The dark. Ruth Ruck's family live on a Welsh mountain farm, no strangers to cow pats on the carpet and nesting hens in the larder. When dark days strike, they embark on a farming experiment to cheer them all up - but raising a baby llama proves more of

an adventure than expected .

"God has a special providence for fools, drunks and the United States of America."-- Otto von Bismarck
America's response to the September 11 attacks spotlighted many of the country's longstanding goals on the world stage: to protect liberty at home, to secure America's economic interests, to spread democracy in totalitarian regimes and to vanquish the enemy utterly. One of America's leading foreign policy thinkers, Walter Russell Mead, argues that these diverse, conflicting

impulses have in fact been the key to the U.S.'s success in the world. In a sweeping new synthesis, Mead uncovers four distinct historical patterns in foreign policy, each exemplified by a towering figure from our past. Wilsonians are moral missionaries, making the world safe for democracy by creating international watchdogs like the U.N. Hamiltonians likewise support international engagement, but their goal is to open foreign markets and expand the economy. Populist Jacksonians support a strong military, one that should be used rarely, but then with overwhelming force to bring the enemy to its knees. Jeffersonians, concerned primarily with liberty at home, are suspicious of both

big military and large-scale international projects. A striking new vision of America's place in the world, Special Providence transcends stale debates about realists vs. idealists and hawks vs. doves to provide a revolutionary, nuanced, historically-grounded view of American foreign

policy.
