This book considers institutional racism as a problem that exists within modern societies. Its roots lie with the

transatlantic slave trade and slavery and the solution involves ridding society of the problem. It is argued here that, first, there needs to be an acceptance of its existence, then developing the tools needed to deal with it and, finally, to implement those tools so that institutional racism can be permanently removed from society. The book has four themes: the first considers the nature of institutional racism, the second theme looks at instances of institutional racism through matters such as deaths in custody and skin lightening, the third considers the concept of reparations and the final area looks at the development of social movements as a way of pushing institutional racism up the political agenda. The development of a social movement is part of a social discourse

which would, for example, push mentoring as a form of reparations. There is a need for more research on the manifestations of institutional racism and this book is part of that discourse. It is argued that the legacy of the slave trade and slavery is continuing and contemporary through the presence of institutional racism in society. This problem has not been addressed through legislation and policies devised to combat racial discrimination. Institutional racism needs to be understood as being located in the processes and procedures of societal institutions.

Shattering any idea that librarianship is

a politically neutral realm, this insider's account of seven debates from the floor of the American Library Association Council illustrates the mechanisms the governing body used to maintain the status quo on issues like racism, government surveillance and climate change. At play in each debate are rules of parliamentary procedure, appeals to authority, denial, and chastisement of librarians who pushed the ALA to make real its commitments to human rights and social justice. Providing a fascinating look at the Council's inner workings, the author parses debates concerning anti-apartheid boycotts; partnerships between ALA, McDonald's and the Boy Scouts of America; spying by the National Security Agency; censorship in Israel and the Occupied Territories; fossil

fuel industry divestment; and the recent revival by ALA's Office of Intellectual Freedom of the infamous film *The Speaker*.

An eye-opening, unapologetic explanation of what "racial profiling" is in modern-day America: systematic targeting of communities and placing of suspicion on populations, on the basis of not only ethnicity but also certain places that are linked to the social identity of that group. In 21st-century, post-civil rights era America, "race" has become complex and intersectional. It is no longer simply a matter of color—black versus white—contends author D. Marvin Jones, but equally a matter of space or

"geographies of fear," which he defines as spaces in which different groups are particularly vulnerable to stereotyping by law enforcement: blacks in the urban ghetto, Mexicans at the functional equivalent of the border, Arabs at the airport. *Dangerous Spaces: Beyond the Racial Profile* demonstrates how society has constructed a set of threat narratives in which certain widespread problems—immigration, drugs, gangs, and terrorism, for example—have been racialized and explains the historical and social origins of these racializing threat narratives. The book identifies how these narratives have led directly to relentless profiling that results in arrest, deportation, massive surveillance, or even death for members of suspect populations. Readers will come to

understand how the problem of profiling is not merely a problem of institutional bias and individual decision making, but also a deeply rooted cultural issue stemming from the processes of meaning-making and identity construction.

Until now, you've only heard one side of the story, but Chinese American history extends far beyond the railroads. Here's the true story of America, from the Chinese American perspective. A Junior Library Guild Gold Standard Selection If you've learned about the history of Chinese people in America, it was probably about their work on the railroads in the 1800s. But more likely, you may not have learned about it at all. This may make it feel like Chinese immigration is a newer part of this country, but some scholars believe the

first immigrant arrived from China 499 CE--one thousand years before Columbus did! When immigration picked up in the mid-1800s, efforts to ban immigrants from China began swiftly. But hope, strength, and community allowed the Chinese population in America to flourish. From the gold rush and railroads to entrepreneurs, animators, and movie stars, this is the true story of the Chinese American experience.

This volume examines the development

of the non-liturgical parts of the Central Conference of American Rabbis' Haggadot. Through an understanding of the changes in American Jewish educational patterns and the CCAR's theology, it explores how the CCAR Haggadah was changed over time to address the needs of the constituency. While there have been many studies of the Haggadah and its development over the course of Jewish history, there has been no such study of the non-liturgical parts of the Haggadah that reflect the needs of the audience it reaches. How the CCAR, the first and largest of American-born Judaisms, addressed the changing needs of its members through its literature for the Passover Seder reveals much about the development of the movement. This in turn provides for

the readers of this book an understanding of how American Judaism has developed.

One prayer can change everything. Martin Luther. Sojourner Truth. Helen Keller. St. Patrick. We read their stories, and of other people like them, in history books, and hear about the amazing things they did to change the world. But one part of the story is often left out: Each one of them wouldn't have accomplished what they did without prayer. In this book from bestselling author Tricia Goyer, the stories of twenty-five notable people are presented along with the major prayer that changed their lives, and changed history. Following each historical

example is a biblical story that ties to that person's life and actions, as well as ways you can use the power of prayer in your life as well. Because God isn't done changing the world yet, and he would love to use you to make history. Includes images of each historical figure.

Is there a linkage between "smart power" and Hillary Clinton's leadership style? Can she advance American leadership and women's development worldwide? The Global Hillary addresses these questions and many others.

Bringing together two key aspects of Clinton's ongoing career—her advocacy for international women's rights and the

mission to foster democratic development around the world—The Global Hillary critically analyzes Clinton's role as a transformative leader of global influence. Essays in this collection provide insight into Clinton's leadership style, particularly her use of American "smart power" in foreign policy, while examining her impact on the continuing worldwide struggle for women's rights. Using international perspectives on the historical and cultural contexts of Clinton's leadership, this book also looks toward the future of women's political leadership in the 21st century with special attention to the prospect of electing a woman to the United States presidency.

Exclusion and the Chinese American Story

This book informs the public for the first time about the impact of American psychiatry on soldiers during World War II. *Breaking Point* is the first in-depth history of American psychiatry in World War II. Drawn from unpublished primary documents, oral histories, and the author's personal interviews and correspondence over years with key psychiatric and military policymakers, it begins with Franklin Roosevelt's endorsement of a universal Selective Service psychiatric examination followed by Army and Navy pre- and post-induction examinations. Ultimately, 2.5 million men and women were rejected or discharged from military service on neuropsychiatric grounds. Never before

or since has the United States engaged in such a program. In designing Selective Service Medical Circular No. 1, psychiatrist Harry Stack Sullivan assumed psychiatrists could predict who might break down or falter in military service or even in civilian life thereafter. While many American and European psychiatrists questioned this belief, and huge numbers of American psychiatric casualties soon raised questions about screening's validity, psychiatric and military leaders persisted in 1942 and 1943 in endorsing ever tougher screening and little else. Soon, families complained of fathers and teens being drafted instead of being identified as psychiatric 4Fs, and Blacks and Native Americans, among others, complained of bias. A frustrated General George S.

Patton famously slapped two "malingering" neuropsychiatric patients in Sicily (a sentiment shared by Marshall and Eisenhower, though they favored a tamer style). Yet psychiatric rejections, evacuations, and discharges mounted. While psychiatrist Roy Grinker and a few others treated soldiers close to the front in Tunisia in early 1943, this was the exception. But as demand for manpower soared and psychiatrists finally went to the field and saw that combat itself, not "predisposition," precipitated breakdown, leading military psychiatrists switched their emphasis from screening to prevention and treatment. But this switch was too little too late and slowed by a year-long series of Inspector General investigations even while numbers of psychiatric casualties

soared. Ironically, despite and even partly because of psychiatrists' wartime performance, plus the emotional toll of war, postwar America soon witnessed a dramatic growth in numbers, popularity,

and influence of the profession, culminating in the National Mental Health Act (1946). But veterans with "PTSD," not recognized until 1980, were largely neglected.
