The virtual renaissance of all things Cajun and Creole has captivated enthusiasts throughout America and invigorated the culture back home. Who, just fifteen years ago, could have predicted that this regional music would become so astonishingly popular throughout the nation and the world? This new edition of a book first published in 1984 celebrates the music makers in the generation most responsible for the survival of Cajun music and zydeco and showcases many of the young performers who have emerged since them to give the music new spark.

More than 100 color photographs, show them in their homes, on their front porches, and in their fields, as well as in performance at local clubs and dance halls and on festival stages. In interviews they speak directly about their lives, their music, and the vital tradition from which their rollicking music springs. Many of the legendary performers featured here-- Dewey Balfa, Clifton Chenier, Nathan Abshire, Dennis McGee, Canray Fontenot, Varise Connor, Octa Clark, Lula Landry, and Inez Catalon--are no longer alive. Others from the early days continue to perform--Bois-sec Ardoin, Michael Doucet, D. L. Menard, and Zachary Richard. Their grandeur, humor, and humility are precisely the qualities this book captures. Featured too are young musicians who are taking their place in the dance halls, on festival stages, and on the folk music circuit. Cajun and Creole music makers, both young and old, still play in the old ways, but as young musicians--such as Geno Delafosse and the French Rockin' Boogie, and Steve Riley and the Mamou Playboys-- experiment and enrich the tradition with new sounds of rock, country, rap, and funk, the music evolves and

enlivens a whole new audience. Barry Jean Ancelet, a native French-speaking Cajun, is chair of the Department of Modern Languages and director of the Center for Acadian and Creole Folklore at the University of Southwestern Louisiana. Among his many books are *Cajun Country* and *Cajun and Creole Folk Tales* (both from the University Press of Mississippi). Elemore Morgan, Jr., is an artist and retired professor of visual art at University of Southwestern Louisiana.

The use of historical recordings as primary sources is relatively well established in both musicology and performance studies and has demonstrated how early recording technologies transformed the ways in which musicians and audiences engaged with music. This edited volume offers a timely snapshot of a wide range of contemporary research in the area of performance practice and performance histories, inviting readers to consider the wide range of research methods that are used in this ever-expanding area of

scholarship. The volume brings together a diverse team of researchers who all use early recordings as their primary source to research performance in its broadest sense in a wide range of repertoires within and on the margins of the classical canon – from the analysis of specific performing practices and parameters in certain repertoires, to broader contextual issues that call attention to the relationship between recorded performance and topics such as analysis, notation and composition. Including a range of accessible music examples, which allow readers to experience the music under discussion, this book is designed to engage with academic and non-academic readers alike, being an ideal research aid for students, scholars and performers, as well as an interesting read for early sound recording enthusiasts.

Ce récit raconte les aventures de deux cyclistes sexagénaires, Francis et Gilbert, surnommés l'Aveugle et le Paralytique par autodérision, survenues en 2000 lors de leur voyage à bicyclette de Vienne en Autriche à Lisbonne au Portugal, soit plus

de 3400 kilomètres en complète autonomie et en 17 étapes. Ce récit est le second volet de la saga de ces deux aventuriers, débutée en 1997 par une Grand Boucle autour de l'Hexagone et suivi en 2002 par une Grande Diagonale d'Europe de Copenhague à Malaga (Objectif 3000) et par un aller et retour de Brest à Inverness en Écosse en 2003 (Hello Nessie !)

This wide-ranging presentation of applied superconductivity, from fundamentals and materials right up to the details of many applications, is an essential reference for physicists and engineers in academic research as well as in industry. Readers looking for a comprehensive overview on basic effects related to superconductivity

and superconducting materials will expand their knowledge and understanding of both low and high T_c superconductors with respect to their application. Technology, preparation and characterization are covered for bulk, single crystals, thin films as well as electronic devices, wires and tapes. The main benefit of this work lies in its broad coverage of significant applications in magnets, power engineering, electronics, sensors and quantum metrology. The reader will find information on superconducting magnets for diverse applications like particle physics, fusion research, medicine, and biomagnetism as well as materials processing. SQUIDs and their usage in medicine or geophysics are thoroughly covered, as are superconducting radiation and particle detectors, aspects on superconductor digital electronics, leading

Rumba on the River Camarades

Traditional African musical forms have long been accepted as fundamental to the emergence of blues and jazz. Yet there has been little effort at compiling recorded evidence to document their development. This discography brings together hundreds of recordings that trace in detail the evolution of the African American musical experience, from early wax cylinder

recordings made in West Africa to voodoo rituals from the Caribbean Basin to the songs of former slaves in the American South.
