Engineers' Guide to Technical Writing
Psychology Press

This volume presents an innovative approach to understanding the language socialization process of second language learners in study abroad programs, focusing on the case of study abroad programs in Japan. Study abroad experiences are so diverse that both macro and micro viewpoints are needed to capture such complexity. This book looks for a way forward by adopting a novel approach which integrates social network analysis and conversation analysis and allows for a fuller, more nuanced understanding of varying experiences of study abroad participants. Chapters draw

on data from a wide range of sources, including participant observation, semi-structured interviews, social network surveys, and audio and visual recordings, to demonstrate the ways in which broader social forces, environmental factors, and individuals' dispositions interact in myriad social contexts within the study abroad experience. Taken together, the volume offers readers a comprehensive portrait of social processes in study abroad programs and their implications for language development, making this key reading for students and scholars in second language acquisition, pragmatics, and applied linguistics.

InfoWorld Indiana University Press (Book). Now in paperback! In this collection of interviews conducted between 1982 and 2004, music journalist, cultural commentator and Rolling Stone contributing editor Anthony DeCurtis conjures themes of songwriting, spirituality, making music and filmmaking out of his subjects. They include such icons as Keith Richards, Bono, Johnny Cash, Iggy Pop, Woody Allen, Eminem, Trey Anastasio, Paul McCartney, George Harrison, Bruce Springsteen, Phil Spector, Martin Scorsese, and Al Pacino. "Few are as qualified as DeCurtis to take you along for the ride, be it in Harrison's black Ferrari or in his other revealing sit-downs with pop culture's most captivating figures." Rolling Stone

The Broadcast Announcing Worktext provides you with the skills, techniques, and procedures necessary to enter this highly competitive field of broadcast performance. In addition to the principles of good performance, this book addresses the importance of audience and how to communicate effectively to various groups. Television and radio studio environments, announcer specializations and responsibilities, and developing a broadcast delivery style are just a few of the many topics covered. Factual information is presented in brief, easy-to-digest modules and is enhanced with self-study questions and projects. The self-study provides an immediate check on what you learn, and the projects allow for a practical hands-on application of key concepts in the material. The worktext format, with many real-life examples, combines both traditional teaching and practical experience. A companion CD illustrates techniques and concepts in each chapter with audio and visual examples. This third edition will give you knowledge of other non-traditional forms of announcing, such as online radio announcing, podcast announcing, and other forms of online announcing, such as online shows, clips, and news.

The focus of Sports Medicine and Neuropsychology is the question of what role the neuropsychologist should have in the diagnosis, treatment, and management of sports-related concussions. The goal of this special issue is to examine the most current issues facing this growing and dynamic field of neuropsychology. The first article is dedicated to reviewing current issues in the neuropsychological assessment of concussions in sports-related events. The next paper examines data on over six million practice-and-game-exposures among athletes participating in the NCAA's Injury Surveillance System. Two contributions examine the empirical role that neuropsychologists can have in the area of concussion research. The final two papers review the advantages and limitations on computer-based assessment of sports-related concussions and discuss neuropsychology's role in return-to-play decisions following them.

 Twenty-first century media has

increasingly turned to provocative sexual content to generate buzz and stand out within a glut of programming. New distribution technologies enable and amplify these provocations, and encourage the branding of media creators as "provocateurs" known for challenging sexual conventions and representational norms. While such strategies may at times be no more than a profitable lure, the most probing and powerful instances of sexual provocation serve to illuminate, question, and transform our understanding of sex and sexuality. In *Provocateurs and Provocations*, award-winning author Maria San Filippo looks at the provocative in

films, television series, web series and videos, entertainment industry publicity materials, and social media discourses and explores its potential to create alternative, even radical ways of screening sex. Throughout this edgy volume, San Filippo reassesses troubling texts and divisive figures, examining controversial strategies—from "real sex" scenes to scandalous marketing campaigns to full-frontal nudity—to reveal the critical role that sexual provocation plays as an authorial signature and promotional strategy within the contemporary media landscape.
