### **International Conference on Innovative Computing and Communications**

Springer

Volume 3 of the PoC ||  
GTF0 collection--read  
as Proof of Concept or  
Get the Fuck Out--  
continues the series of  
wildly popular  
collections of this  
hacker journal.  
Contributions range  
from humorous poems  
to deeply technical  
essays bound in the  
form of a bible. The  
International Journal of  
Proof-of-Concept or Get  
The Fuck Out is a  
celebrated collection of

short essays on  
computer security,  
reverse engineering  
and retrocomputing  
topics by many of the  
world's most famous  
hackers. This third  
volume contains all  
articles from releases  
14 to 18 in the form of  
an actual, bound bible.  
Topics include how to  
dump the ROM from  
one of the most secure  
Sega Genesis games  
ever created; how to  
create a PDF that is  
also a Git repository;  
how to extract the  
Game Boy Advance  
BIOS ROM; how to sniff  
Bluetooth Low Energy  
communications with  
the BCC Micro:Bit; how  
to conceal ZIP Files in  
NES Cartridges; how to  
remotely exploit a  
TetriNET Server; and

more. The journal exists to remind us of what a clever engineer can build from a box of parts and a bit of free time. Not to showcase what others have done, but to explain how they did it so that readers can do these and other clever things themselves.

Second International Conference of the South Asian Society of Criminology and Victimology (SASCV), 11-13 January 2013, Kanyakumari, Tamil Nadu, India No Starch Press

Advanced Computing, Networking and Informatics are three distinct and mutually exclusive disciplines of knowledge with no apparent sharing/overlap among them. However, their convergence is observed in many real

world applications, including cyber-security, internet banking, healthcare, sensor networks, cognitive radio, pervasive computing amidst many others. This two volume proceedings explore the combined use of Advanced Computing and Informatics in the next generation wireless networks and security, signal and image processing, ontology and human-computer interfaces (HCI). The two volumes together include 132 scholarly articles, which have been accepted for presentation from over 550 submissions in the Third International Conference on Advanced Computing, Networking and Informatics, 2015, held in Bhubaneswar, India

during June 23–25, 2015.  
*The Annenbergs CRC Press*  
This book constitutes the post-conference proceedings of the 5th International Conference on Machine Learning, Optimization, and Data Science, LOD 2019, held in Siena, Italy, in September 2019. The 54 full papers presented were carefully reviewed and selected from 158 submissions. The papers cover topics in the field of machine learning, artificial intelligence, reinforcement learning, computational optimization and data science presenting a substantial array of ideas, technologies, algorithms, methods and applications.

**New Products Management** Random

House  
This series of annual reports on the microfinance sector in India which seeks to document developments, clarify issues, publicize studies, stimulate research, identify policy choices, generate understanding, and enhance support for the sector. It highlights recent developments under each of the two main models of microfinance in India – the SHG and MFI models. The book highlights recent developments in Self Help Groups (SHGs) and SHG Bank Linkage Programme (SBLPs), and focuses on microfinance with regard to the investment scenario in India.

*Network Data Analytics*

K. Jaishankar

This book constitutes the thoroughly refereed post-conference proceedings of the third International Symposium on Intelligent Systems Technologies and Applications (ISTA'17), September 13-16, 2017, Manipal, Karnataka, India. All submissions were evaluated on the basis of their significance, novelty, and technical quality. This proceedings contains 34 papers selected for presentation at the Symposium.

**Soft Computing: Theories and Applications**

Academic Press

When it comes to delivering product design innovations to mobile device users, Nokia is the yardstick

by which all others are judged. Now the process and working methods that have enabled Nokia to revolutionize usability are fully explained for the first time in this beautiful, four-color book. Written with insight by two veterans of Nokia's design triumphs (co-author Christian Lindholm was featured in the August 2002 issue of Business 2.0 magazine) this one-of-a-kind reference vividly delivers: \* The complete design process, from concept creation to product testing \* The future of small interfaces \* Usability engineering in practice in the mobile environment \* The elements of a Nokia User Interface \* First person accounts of the product development cycle Learn the

processes that helped Nokia develop the world's most desirable handheld

*Proceedings of International Conference on Advances in Computing*  
Springer

This volume is the fourth part of a four-volume set (CCIS 190, CCIS 191, CCIS 192, CCIS 193), which constitutes the refereed proceedings of the First International Conference on Computing and Communications, ACC 2011, held in Kochi, India, in July 2011. The 62 revised full papers presented in this volume were carefully reviewed and selected from a large number of submissions. The papers are the papers of the Workshop on Cloud Computing:

Architecture, Algorithms and Applications (CloudComp2011), of the Workshop on Multimedia Streaming (MultiStreams2011), and of the Workshop on Trust Management in P2P Systems (IWTMP2PS2011).

**Presenting with Credibility** McGraw-Hill Education

This work shows how the various elements of consumer analysis fit together in an integrated framework, called the Wheel of Consumer Analysis. Psychological, social and behavioural theories are shown as useful for understanding consumers and developing more effective marketing strategies. The aim is to enable students to develop skills in

analyzing consumers from a marketing management perspective and in using this knowledge to develop and evaluate marketing strategies. The text identifies three groups of concepts - affect and cognition, behaviour and the environment - and shows how these they influence each other as well as marketing strategy. The focus of the text is managerial, with a distinctive emphasis on strategic issues and problems. Cases and questions are included in each chapter.

*Ringtone* Springer

The book comprises selected papers presented at the International Conference on Wireless Communication (ICWiCOM), which is organized by D. J.

Sanghvi College of Engineering's Department of Electronics and Telecommunication Engineering. The book focuses on specific topics of wireless communication, like signal and image processing applicable to wireless domains, networking, microwave and antenna design, and telemedicine systems. Covering three main areas - networking, antenna designs and embedded systems applicable to communication - it is a valuable resource for postgraduate and doctoral students.

**Intelligent Systems Technologies and Applications** Packt Publishing Ltd

The proceedings covers advanced and multi-disciplinary research on design of

smart computing and informatics. The theme of the book broadly focuses on various innovation paradigms in system knowledge, intelligence and sustainability that may be applied to provide realistic solution to varied problems in society, environment and industries. The volume publishes quality work pertaining to the scope of the conference which is extended towards deployment of emerging computational and knowledge transfer approaches, optimizing solutions in varied disciplines of science, technology and healthcare.

**Advances in Computing and Communications, Part IV** Springer Science & Business

## Media

This book will help readers comprehend technical and policy elements of telecommunication particularly in the context of 5G. It first presents an overview of the current research and standardization practices and lays down the global frequency spectrum allocation process. It further lists solutions to accommodate 5G spectrum requirements. The readers will find a considerable amount of information on 4G (LTE-Advanced), LTE-Advance Pro, 5G NR (New Radio); transport network technologies, 5G NGC (Next Generation Core), OSS (Operations Support Systems), network deployment and end-to-end 5G network

architecture. Some details on multiple network elements (end products) such as 5G base station/small cells and the role of semiconductors in telecommunication are also provided. Keeping trends in mind, service delivery mechanisms along with state-of-the-art services such as MFS (mobile financial services), mHealth (mobile health) and IoT (Internet-of-Things) are covered at length. At the end, telecom sector's burning challenges and best practices are explained which may be looked into for today's and tomorrow's networks. The book concludes with certain high level suggestions for the growth of telecommunication, particularly on the importance of basic

research, departure from ten-year evolution cycle and having a 20–30 year plan. Explains the conceivable six phases of mobile telecommunication's ecosystem that includes R&D, standardization, product/network/device & application development, and burning challenges and best practices Provides an overview of research and standardization on 5G Discusses solutions to address 5G spectrum requirements while describing the global frequency spectrum allocation process Presents various case studies and policies Provides details on multiple network elements and the role of semiconductors in telecommunication

Presents service delivery mechanisms with special focus on IoT

**Proceedings of the 3rd International Conference on Frontiers of Intelligent Computing: Theory and Applications (FICTA) 2014** Springer Science & Business Media

Anthropology has two main tasks: to understand what it is to be human and to examine how humanity is manifested differently in the diversity of culture. These tasks have gained new impetus from the extraordinary rise of the digital. This book brings together several key anthropologists working with digital culture to demonstrate just how productive an

anthropological approach to the digital has already become. Through a range of case studies from Facebook to Second Life to Google Earth, Digital Anthropology explores how human and digital can be defined in relation to one another, from avatars and disability; cultural differences in how we use social networking sites or practise religion; the practical consequences of the digital for politics, museums, design, space and development to new online world and gaming communities. The book also explores the moral universe of the digital, from new anxieties to open-source ideals. Digital Anthropology reveals how only the intense scrutiny of

ethnography can overturn assumptions about the impact of digital culture and reveal its profound consequences for everyday life.

Combining the clarity of a textbook with an engaging style which conveys a passion for these new frontiers of enquiry, this book is essential reading for students and scholars of anthropology, media studies, communication studies, cultural studies and sociology.

**Ham and Shortwave Radio for the Electronics Hobbyist**

Oxford University Press  
 "This is the colorful and dramatic biography of two of America's most controversial entrepreneurs: Moses Louis Annenberg, 'the racing wire king,' who built his fortune in

racketeering, invested it in publishing, and lost much of it in the biggest tax evasion case in United States history; and his son, Walter, launcher of TV Guide and Seventeen magazines and former ambassador to Great Britain."--Jacket.

Intelligent Systems, Technologies and Applications SAGE Publications Pvt. Limited

Crawford's New Product Management 12e provides the management approach to teaching new products, with the perspective of marketing. Adopters of previous editions will notice that the format is slimmed down to 18 chapters. This streamlined presentation focuses on the topics that will be of most importance

and interest to new product managers. Significant updates can be found throughout, and great pains have been taken to present the "best practices" of industry and relevancy to readers. Past adopters of New Products Management will notice major changes in this edition. While there are some changes in virtually every chapter, some of the most substantial changes are as follows: 1. We have made major additions and updates to the cases to provide more plentiful and more current examples. We retired several cases from the previous edition, wrote many new cases, and thoroughly updated many others. New cases for this edition include: Oculus Rift, Adidas Parley

sustainable running shoes, Google Glass, Indiegogo, Tesla, Chipotle, Chick-fil-A, Corporate Social Responsibility at Starbucks, and many others. As always, we aim to offer a mix of high tech products and consumer products and services in the set of cases. 2. In addition, we have substantially updated examples throughout the text wherever possible. We try to make use of illustrative examples that will resonate with today's students wherever possible. Of course, we welcome the reader's comments and suggestions for improvement. 3. There continues to be much new research in new products, and we have tried to stay current on all of these topics. Readers will notice new

or expanded coverage of portfolio management, value curve creation, the TRIZ method, crowd-sourcing, crowdfunding, observational research, open innovation, organizational structure, 3D modeling, beta testing, sustainable product development, and frugal innovation, among other topics. 4. We continue the practice of referencing Web sites of interest throughout the text, and we have added the web addresses for several useful YouTube videos and other resources.

**PoC or GTFO,**  
**Volume 3** Springer  
 Essays exploring the relationship between environmental disaster and visions of

apocalypse through the lens of science fiction Contemporary visions of the future have been shaped by hopes and fears about the effects of human technology and global capitalism on the natural world. In an era of climate change, mass extinction, and oil shortage, such visions have become increasingly catastrophic, even apocalyptic. Exploring the close relationship between science fiction, ecology, and environmentalism, the essays in *Green Planets* consider how science fiction writers have been working through this crisis. Beginning with H. G. Wells and passing through major twentieth-century writers like Ursula K. Le Guin, Stanislaw Lem,

and Thomas Disch to contemporary authors like Margaret Atwood, China Miéville, and Paolo Bacigalupi—as well as recent blockbuster films like *Avatar* and *District 9*—the essays in *Green Planets* consider the important place for science fiction in a culture that now seems to have a very uncertain future. The book includes an extended interview with Kim Stanley Robinson and an annotated list for further exploration of "ecological SF" and related works of fiction, nonfiction, films, television, comics, children's cartoons, anime, video games, music, and more. Contributors include Christina Alt, Brent Bellamy, Sabine Höhler, Adeline Johns-

Putra, Melody Jue, Rob Latham, Andrew Milner, Timothy Morton, Eric C. Otto, Michael Page, Christopher Palmer, Gib Prettyman, Elzette Steenkamp, Imre Szeman.

**Using ICTs and blended learning in transforming technical and vocational education and training** Springer Nature

Get up and running as a ham radio operator—or just listen in on the shortwave bands! *Ham and Shortwave Radio for the Electronics Hobbyist* shows you, step by step, how to set up and operate your own ham radio station. It's also perfect for those interested in shortwave listening, without getting a ham radio license. This

practical guide covers communications modes, assigned frequency ranges in the United States, details on fixed, mobile, and portable ham stations, antennas, and much more. Ham radio will work even when the Internet and other utilities fail. So get on the air and keep the lines of communication open in any situation! Inside, you'll find out all about: Radio waves and how they travel Shortwave and allwave listening Communications modes for ham radio operators, including using the Internet as a supplement Ham radio licenses and assigned frequency ranges (bands) used in the United States Wave-propagation characteristics and tips

on the bands best suited for use at different times of the day, year, and sunspot cycle Selecting and installing equipment for fixed ham radio stations Setting up mobile and portable ham radio stations Antennas and transmission lines for various frequencies and station types How to operate your station using popular voice and digital modes Schematic symbols and Q signals for ham radio operators *Cinemas Dark and Slow in Digital India* Irwin Professional Publishing This book includes high-quality research papers presented at the Third International Conference on Innovative Computing and Communication (ICICC 2020), which is held at the Shaheed

Sukhdev College of Business Studies, University of Delhi, Delhi, India, on 21-23 February, 2020. Introducing the innovative works of scientists, professors, research scholars, students and industrial experts in the field of computing and communication, the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real-time applications. *Environmental Life-cycle Assessment* Springer Nature Introduction to Python Programming is written for students who are beginners in the field of computer programming. This book presents an

intuitive approach to the concepts of Python Programming for students. This book differs from traditional texts not only in its philosophy but also in its overall focus, level of activities, development of topics, and attention to programming details. The contents of the book are chosen with utmost care after analyzing the syllabus for Python course prescribed by various top universities in USA, Europe, and Asia. Since the prerequisite know-how varies significantly from student to student, the book's overall overture addresses the challenges of teaching and learning of students which is fine-tuned by the authors' experience with large sections of students.

This book uses natural language expressions instead of the traditional shortened words of the programming world. This book has been written with the goal to provide students with a textbook that can be easily understood and to make a connection between what students are learning and how they may apply that knowledge. Features of this book This book does not assume any previous programming experience, although of course, any exposure to other programming languages is useful. This book introduces all of the key concepts of Python programming language with helpful illustrations. Programming examples are presented in a clear

and consistent manner. Each line of code is numbered and explained in detail. Use of f-strings throughout the book. Hundreds of real-world examples are included and they come from fields such as entertainment, sports, music and environmental studies. Students can periodically check their progress with in-chapter quizzes that appear in all chapters.

**Smart Intelligent Computing and Applications** McGraw-Hill/Irwin

Taking a managerial approach, in order to acquaint students with the managerial steps and processes involved in new product development, this work includes coverage of product protocol.

Advances in Computing and Communications.

Part III Springer

This volume contains 87 papers presented at FICTA 2014: Third International Conference on Frontiers in Intelligent Computing: Theory and Applications. The conference was held during 14-15, November, 2014 at Bhubaneswar, Odisha, India. This volume

contains papers mainly focused on Network and Information Security, Grid Computing and Cloud Computing, Cyber Security and Digital Forensics, Computer Vision, Signal, Image & Video Processing, Software Engineering in Multidisciplinary Domains and Ad-hoc and Wireless Sensor Networks.
