BESTSELLER • protect us,
 An urgent told through
 wake-up call the story of
 about the the deadly
 future of 2013-2014
 emerging Ebola
 viruses and a epidemic
 gripping “Crisis in the
 account of the Red Zone
 doctors and reads like a
 scientists thriller. That
 fighting to the story it

tells is all true
makes it all
more
terrifying.”—El
izabeth
Kolbert,
Pulitzer
Prize-winning
author of *The
Sixth
Extinction*
From the #1
bestselling
author of *The
Hot Zone*, now
a National
Geographic
original
miniseries . . .
This time,
Ebola started
with a two-
year-old child
who likely had
contact with a
wild creature
and whose
entire family
quickly fell ill
and died. The
ensuing global
drama

activated
health
professionals
in North
America,
Europe, and
Africa in a
desperate
race against
time to
contain the
viral wildfire.
By the
end—as the
virus mutated
into its
deadliest
form, and
spread farther
and faster
than ever
before—30,00
0 people
would be
infected, and
the dead
would be
spread across
eight
countries on
three
continents. In

this taut and
suspenseful
medical
drama,
Richard
Preston
deeply
chronicles the
pandemic, in
which we saw
for the first
time the
specter of
Ebola jumping
continents,
crossing the
Atlantic, and
infecting
people in
America. Rich
in characters
and
conflict—physi
cal, emotional,
and
ethical—*Crisis
in the Red
Zone* is an
immersion in
one of the
great public
health

calamities of our time. Preston writes of doctors and nurses in the field putting their own lives on the line, of government bureaucrats and NGO administrators moving, often fitfully, to try to contain the outbreak, and of pharmaceutical companies racing to develop drugs to combat the virus. He also explores the charged ethical dilemma over who should and did receive the rare doses of an

experimental treatment when they became available at the peak of the disaster. Crisis in the Red Zone makes clear that the outbreak of 2013–2014 is a harbinger of further, more severe outbreaks, and of emerging viruses heretofore unimagined—in any country, on any continent. In our ever more interconnected world, with roads and towns cut deep into the jungles of

equatorial Africa, viruses both familiar and undiscovered are being unleashed into more densely populated areas than ever before. The more we discover about the virosphere, the more we realize its deadly potential. Crisis in the Red Zone is an exquisitely timely book, a stark warning of viral outbreaks to come.

Capitalism and Class in the Gulf Arab States
Temple

<p>University Press Richard Neuse here explores the relationship between two great medieval epics, Dante's Divine Comedy and Chaucer's Canterbury Tales. He argues that Dante's attraction for Chaucer lay not so much in the spiritual dimension of the Divine Comedy as in the human. Borrowing Bertolt Brecht's phrase "epic theater," Neuse underscores</p>	<p>the interest of both poets in presenting, as on a stage, flesh and blood characters in which readers would recognize the authors as well as themselves. As spiritual autobiography , both poems challenge the traditional medieval mode of allegory, with its tendency to separate body and soul, matter and spirit. Thus Neuse demonstrates that Chaucer and Dante embody a humanism not</p>	<p>generally attributed to the fourteenth century. This title is part of UC Press's Voices Revived program, which commemorate s University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, Voices Revived makes high- quality, peer- reviewed scholarship accessible</p>

"The Italian Legacy in Philadelphia examines the impact and influence of Italian arts, culture, people, and ideas on the city of Philadelphia from the founding to the present"--

Sit on a Potato Pan, Otis! Food & Agriculture

Org. The Handbook of Polish, Czech, and Slovak Holocaust Fiction aims to increase the visibility and show the versatility of works from East-Central European countries. It is the first encyclopedic work to bridge the gap between the literary production of countries that are considered to be main sites of the Holocaust and their recognition in international academic and

public discourse. It contains over 100 entries offering not only facts about the content and motifs but also pointing out the characteristic fictional features of each work and its meaning for academic discourse and wider reception in the country of origin and abroad. The publication will appeal to the academic and broader public interested in the representation of the

Holocaust, anti-Semitism, and World War II in literature and the arts. Besides prose, it also considers poetry and theatrical plays from 1943 through 2018. An introduction to the historical events and cultural developments in Poland, Czechoslovakia, Czech, and Slovak Republic, and their impact on the artistic output helps to contextualise the motif changes and fictional strategies that authors have been applying for decades. The publication is the result of long-term scholarly cooperation of specialists from four countries and several dozen academic centres. Cyclopedia of Music & Musicians Moshe Dayan Center for Middle Eastern and African Studies Published in occasion of the first retrospective outside Brazil of the Italian-born artist, held at the Nouveau Musée National de Monaco, the book is an opportunity to shed some light on Alfredo Volpi, a name that might not sound too familiar to the European public, but of great popularity in South America. The catalogue offers a thorough exploration in words and images of the painter's peculiar life and career?from the bounds and relationships

with the Brazilian art community, to his special link to the city of São Paulo and his adopted country, leading to the development of his unique artistic language.00E xhibition: Nouveau Musée National de Monaco (09.02.-20.05. 2018). *Fodder Oats* Yale University Press The Renaissance studiolo was a space devoted in theory to private reading. The most famous

studiolo of all was that of Isabella d'Este, marchioness of Mantua. This work explores the function of the mythological image within a Renaissance culture of collectors. *The Grass Is Always Greener over the Septic Tank* Grand Central Publishing The Day Before the War recounts the events of August 31, 1939 along the German-Polish frontier and the history preceding

these false flag attacks that led to the second European continental war in the 20th century. The book looks back to the aftermath of the First World War and the Treaty of Versailles that redrew the map of Europe, laying the foundations for the rise of fascism and future worldwide conflict. Many of the events and political behaviors demonstrated in the 1930s, particularly in Germany, can

be found developing in today's world. At the center of the story is the poorly orchestrated attack on the radio transmitter in Gliwice - Sender Gleiwitz and this book reveals new information and details. <u>Handbook of Polish, Czech, and Slovak Holocaust Fiction</u> JHU Press George Hull (1590-1659) and his family emigrated in 1630 from England to Dorchester, Massachusetts , moving in	1636 to Windsor, Connecticut. Joseph Hull (1596-1665), his brother, emigrated in 1635 and died at York, Maine. Richard Hull (1599-1662), not a relative, immigrated before 1636 to Massachusetts , moving to New Haven, Connecticut in 1639. Descendants of these three immigrants lived mainly in New York, New Jersey, Connecticut, Rhode Island, New Hampshire, Tennessee and California.	<i>Rivista Di Astronomia E Scienze Affini</i> Univ of California Press Rodent Malaria reviews significant findings concerning malaria parasites of rodents, including their taxonomy, zoogeography, and evolution, along with life cycles and morphology; genetics and biochemistry; and concomitant infections. This volume is organized into eight chapters and begins by sketching out
--	---	--

the history of the discovery of rodent as well as aspects of parasitology, immunology, and chemotherapy. These concepts are investigated two decades following Ignace Vincke's major discovery and Meir Yoeli's successful establishment of the method of cyclical transmission of the parasite. The following chapters focus on the taxonomy and systematics of the subgenus *Vinckeia*, with

reference to the concepts of species and subspecies of animals and the degree to which they apply to malaria parasites, in particular to those of rodents. The discussion then shifts to how the rodent malaria parasites provide a unique insight into the subcellular organization of *Plasmodium* species, the use of rodent malaria as an experimental model to study immunological responses,

and infectious agents that interact with malaria parasites. The book concludes with a chapter on malaria chemotherapy, with emphasis on the value of rodent malaria in antimalarial drug screening and the use of antimalarial drugs as biological probes. This book will be of interest to protozoologists and physicians as well as those from other disciplines including biochemistry,

immunology,
pharmacology
, cell biology,
and genetics.

Rodent
Malaria
Medieval and
Renaissance
Texts
This volume
begins with a
short history
of malaria and
follows with a
summary of
its biology. It
then traces
the
fascinating
history of the
discovery of
quinine for
malaria
treatment,
and then
describes
quinine's
biosynthesis,
its mechanism

of action, and
its clinical use,
concluding
with a
discussion of
synthetic
antimalarial
agents based
on quinine's
structure. It
also covers
the discovery
of artemisinin
and its
development
as the source
of the most
effective
current
antimalarial
drug,
including
summaries of
its synthesis
and
biosynthesis,
its mechanism
of action, and
its clinical use
and
resistance. A
short

discussion of other clinically used antimalarial natural products leads to a detailed treatment of additional natural products with significant antiplasmodial activity, classified by compound type. Although the search for new antimalarial natural products from Nature's combinatorial library is challenging, it is very likely to yield new antimalarial drugs. This book thus ends by

identifying ten natural products with development potential as clinical antimalarial agents.

Precision

Public Health

Farrar, Straus & Giroux (BYR)

This book analyzes the recent development of Gulf capitalism through to the aftermath of the 2008 economic crisis.

Situating the Gulf within the evolution of capitalism at a global scale, it presents a novel theoretical

interpretation of this important region of the Middle East political economy.

The Italian Legacy in the Dominican Republic

Elsevier

"[Erma Bombeck] is marvelously funny, direct as a hypodermic, a virtuoso in the field of suburban living."—Vogue
It's the exposé to end all exposés—the truth about the suburbs: where they planted trees and crabgrass

came up, where they planted the schools and taxes came up, where they died of old age trying to merge onto the freeway and where they finally got sex out of the schools and back into the gutters.

Treatment of the

Neuroses

Bloomsbury Publishing USA

In fifteenth- and sixteenth-century Italy, many leading citizens constructed and furnished distinctive studies for themselves.

The study was an individually designed room for private and social use - as an office, library, a family archive or treasury, as the nucleus of an art collection, or as a space for contemplation . This book is an account of the Renaissance Italian study and its contents. Illustrated with depictions of studies and the precious and unusual objects they contained, the book examines the

significance of the study to its owner and visitors, its structure and location, and the prized possessions that might fill such a special room.

The Bloomsbury Handbook of Sound Art
Springer

Nature
The aim of this grammar is to analyze in some detail the mechanisms of the Aleut language as represented by older speakers and by earlier sources, and is intended for both students

of Aleut and linguists in general. An introductory chapter gives background on the language's history, linguistic documentation, Aleut dialects, and outside influences. Subsequent chapters address these topics: phonology (phonemes, phonotactics, internal and external sandhi, contours, and expressive features); morphology (inflection and word classes, derivation/pos

tbases); and syntax (subject and predicate, object, oblique terms, addition and removal of terms, construction of indefiniteness, noun phrases, temporal adverbials, verb phrases, conjoined predicates, clauses of purpose, linked clauses, anterior, conditional, participle clauses, report clauses, sentence connections). Some crucial structural differences from the

cognate Eskimo language are discussed in the final chapter. (Contains 52 references.) (MSE)
Our Hearts Were Young and Gay

 Palindromes-- words and phrases that read the same both forward and backward-- are accompanied by cartoons in this collection of clever wordplay
The Cabinet of Eros
 Cambridge University Press

The first romance written by an Englishwoman, Mary Wroth's *Countess of Montgomery's Urania* is a literary tour de force in its own right. As the niece of Sir Philip Sidney, Mary Wroth was ideally situated as an observer and reporter of the social, literary, and political milieu of her time. This abridged modern-spelling edition, with a useful introduction and index of characters, makes this

work newly accessible to general readers, students, and scholars.

The #1 New York Times and Wall Street Journal bestseller, named one of the best books of the year by The Boston Globe and National Geographic: acclaimed journalist Douglas Preston takes readers on a true adventure deep into the Honduran rainforest in this riveting

narrative about the discovery of a lost civilization -- culminating in a stunning medical mystery. Since the days of conquistador Hernán Cortés, rumors have circulated about a lost city of immense wealth hidden somewhere in the Honduran interior, called the White City or the Lost City of the Monkey God. Indigenous tribes speak of ancestors who fled there to escape the Spanish invaders, and

they warn that anyone who enters this sacred city will fall ill and die. In 1940, swashbuckling journalist Theodore Morde returned from the rainforest with hundreds of artifacts and an electrifying story of having found the Lost City of the Monkey God-but then committed suicide without revealing its location. Three quarters of a century later, bestselling author Doug Preston joined

a team of scientists on a groundbreaking new quest. In 2012 he climbed aboard a rickety, single-engine plane carrying the machine that would change everything: lidar, a highly advanced, classified technology that could map the terrain under the densest rainforest canopy. In an unexplored valley ringed by steep mountains, that flight revealed the unmistakable image of a sprawling
