Acoustic Design of Schools Construction Law in the United Arab Emirates and the Gulf
 Chitty on Contracts is the single most pre-eminent reference work on the whole range of English contract law available anywhere in the common law world. It has been used for generations by lawyers as the leading guide to contracts, and is relied on to provide insight and aid in knotty areas of the law. The work is in two volumes: Volume One covers the General Principles of contract law, whilst Volume Two offers guidance on Specific Contracts, namely contractual issues in specific industry sectors. (Volume One of the work is available as a standalone for those who need coverage of the general principles of contract law only).

Current Trends in Geotechnical Engineering and Construction John Wiley & Sons

Sustainability is a topic of great interest today, particularly for the Gulf Cooperation Council (GCC) countries, which have witnessed very rapid economic and demographic growth over the past decade. The observed growth has led to unsustainable consumption patterns of vital resources such as water, energy, and food, highlighting the need for an urgent shift towards green growth and sustainable development strategies. Sustainability in the Gulf covers the region's contemporary development challenges through the lens of the UN's Sustainable Development Goals (SDGs), which place sustainability at the centre of the solution to the current environmental, economic, and social imbalances facing GCC countries. The book presents multiple analyses of Gulf-specific sustainability topics, examining the current status, challenges, and opportunities, as well as identifying key lessons learned. Innovative and practical policy recommendations are provided, as well as new conceptual angles to the evolving academic debates on the post-oil era in the Gulf. Through chapters covering sector-related studies, as well as the socio-economic dimensions of the sustainability paradigm, this volume offers valuable insights into current research efforts made by the GCC states, proposing a way forward based on lessons learned. This is a valuable resource for students, academics, and researchers in the areas of Environmental Studies, Political Economy, and Economics of the GCC states.

MEED. "O'Reilly Media, Inc."

Building Sharjah reveals how modern architecture unfurled across the United Arab Emirates' third-largest city. An oil discovery in 1972 positioned Sharjah as one of the world's final cities shaped by transformative fortune. In the footsteps of Kuwait, Riyadh, and Dubai, Sharjah faced a metamorphosis: either one that repeated the past's mistakes or one that reimagined how wealth can build a city. Sharjah's potential enticed an international cast of experts to create a bold, new city. As their projects begin to vanish, this book preserves them through unseen photographs and recovered documents. New writing chronicles how local and arriving residents arranged the designed, concrete environment into a home. Beyond just a local artifact, this book examines the confident promises made by global practices of urbanization.

Transforming Distressed Global Communities Taylor & Francis

Winner of the Restless Books Prize for New Immigrant Writing "Guest workers of the United Arab Emirates embody multiple worlds and identities and long for home in a fantastical debut work of fiction, winner of the inaugural Restless Books Prize for New Immigrant Writing.... The author's crisp, imaginative prose packs a punch, and his whimsical depiction of characters who oscillate between two lands on either side of the Arabian Sea unspools the kind of immigrant narratives that are rarely told. An enchanting, unparalleled anthem of displacement and repatriation." —Kirkus Reviews, starred review In the United Arab Emirates, foreign nationals constitute over 80 percent of the population. Brought in to construct and serve the towering monuments to wealth that punctuate the

skylines of Abu Dhabi and Dubai, this labor force is not given the option of citizenship. Some ride their luck to good fortune. Others suffer different fates. Until now, the humanitarian crisis of the so-called "guest workers" of the Gulf has barely been addressed in fiction. With his stunning, mind-altering debut novel *Temporary People*, Deepak Unnikrishnan delves into their histories, myths, struggles, and triumphs. Combining the linguistic invention of Salman Rushdie and the satirical vision of George Saunders, Unnikrishnan presents twenty-eight linked stories that careen from construction workers who shapeshift into luggage and escape a labor camp, to a woman who stitches back together the bodies of those who've fallen from buildings in progress, to a man who grows ideal workers designed to live twelve years and then perish—until they don't, and found a rebel community in the desert. With this polyphony of voices, Unnikrishnan maps a new, unruly global English and gives personhood back to the anonymous workers of the Gulf. "Guest workers of the United Arab Emirates embody multiple worlds and identities and long for home in a fantastical debut work of fiction, winner of the inaugural Restless Books Prize for New Immigrant Writing.... The author's crisp, imaginative prose packs a punch, and his whimsical depiction of characters who oscillate between two lands on either side of the Arabian Sea unspools the kind of immigrant narratives that are rarely told. An enchanting, unparalleled anthem of displacement and repatriation." —Kirkus Reviews, Starred Review "Inventive, vigorously empathetic, and brimming with a sparkling, mordant humor, Deepak Unnikrishnan has written a book of Ovidian metamorphoses for our precarious time. These absurdist fables, fluent in the language of exile, immigration, and bureaucracy, will remind you of the raw pleasure of storytelling and the unsettling nearness of the future." —Alexandra Kleeman, author of *You Too Can Have a Body Like Mine* "Inaugural winner of the Restless Books Prize for New Immigrant Writing, this debut novel employs its own brand of magical realism to propel readers into an understanding and appreciation of the experience of foreign workers in the Arab Gulf States (and beyond). Through a series of almost 30 loosely linked sections, grouped into three parts, we are thrust into a narrative alternating between visceral realism and fantastic satire.... The alternation between satirical fantasy, depicting such things as intelligent cockroaches and evil elevators, and poignant realism, with regards to necessarily illicit sexuality, forms a contrast that gives rise to a broad critique of the plight of those known euphemistically as 'guest workers.' VERDICT: This first novel challenges readers with a singular inventiveness expressed through a lyrical use of language and a laserlike focus that is at once charming and terrifying. Highly recommended." —Henry Bankhead, *Library Journal*, Starred Review "Unnikrishnan's debut novel shines a light on a little known world with compassion and keen insight. The *Temporary People* are invisible people—but Unnikrishnan brings them to us with compassion, intelligence, and heart. This is why novels matter." —Susan Hans O'Connor, *Penguin Bookshop* (Sewickley, PA) "Deepak Unnikrishnan uses linguistic pyrotechnics to tell the story of forced transience in the Arabian Peninsula, where citizenship can never be earned no matter the commitment of blood, sweat, years of life, or brains. The accoutrements of migration—languages, body parts, passports, losses, wounds, communities of strangers—are packed and carried along with ordinary luggage, blurring the real and the unreal with exquisite skill. Unnikrishnan sets before us a feast of absurdity that captures the cruel realities around the borders we cross either by choice or by force. In doing so he has found what most writers miss: the sweet spot between simmering rage at a set of circumstances, and the circumstances themselves." —Ru Freeman, author of *On Sal Mal Lane* "Deepak writes brilliant stories with a fresh, passionate energy. Every page feels as if it must have been written, as if the author had no choice. He writes about exile, immigration, deportation, security checks, rage, patience, about the homelessness of living in a foreign land, about historical events so strange that, under his hand, the events become tales, and he writes tales so precisely that they read like history. Important work. Work of the future. This man will not be stopped." —Deb Olin Unferth, author of *Revolution* "From the strange Kafka-esque scenarios to the wholly original language, this book is amazing on so many different levels. Unlike anything I've ever read,

Temporary People is a powerful work of short stories about foreign nationals who populate the new economy in the United Arab Emirates. With inventive language and darkly satirical plot lines, Unnikrishnan provides an important view of relentless nature of a global economy and its brutal consequences for human lives. Prepare to be wowed by the immensely talented new voice.” —Hilary Gustafson, Literati Bookstore (Ann Arbor, MI) “Absolutely preposterous! As a debut, author Unnikrishnan shares stories of laborers, brought to the United Arab Emirates to do menial and everyday jobs. These people have no rights, no fallback if they have problems or health issues in that land. The laborers in Temporary People are sewn back together when they fall, are abandoned in the desert if they become inconvenient, and are even grown from seeds. As a collection of short stories, this is fantastical, imaginative, funny, and even more so, scary, powerful, and ferocious.” —Becky Milner, Vintage Books (Vancouver WA)

The International Application of FIDIC Contracts Taylor & Francis

This Open Access book is an anthropological urban study of the Emirate of Dubai, its institutions, and their evolution. It provides a contemporary history of disability in city planning from a non-Western perspective and explores the cultural context for its positioning. Three insights inform the author’s approach. First, disability research, much like other urban or social issues, must be situated in a particular place. Second, access and inclusion forms a key part of both local and global planning issues. Third, a 21st century planning education should take access and inclusion into consideration by applying a disability lens to the empirical, methodological, and theoretical advances of the field. By bridging theory and practice, this book provides new insights on inclusive city planning and comparative urban theory. This book should be read as part of a larger struggle to define and assert access; it’s a story of how equity and justice are central themes in building the cities of the future and of today.

Computerization and Networking of Materials Databases Lulu.com

Smart Buildings Systems for Architects, Owners and Builders is a practical guide and resource for architects, builders, engineers, facility managers, developers, contractors, and design consultants. The book covers the costs and benefits of smart buildings, and the basic design foundations, technology systems, and management systems encompassed within a smart building. Unlike other resources, Smart Buildings is organized to provide an overview of each of the technology systems in a building, and to indicate where each of these systems is in their migration to and utilization of the standard underpinnings of a smart building. Written for any professional interested in designing or building smart Buildings systems, this book provides you with the fundamentals needed to select and utilize the most up to date technologies to serve your purpose. In this book, you’ll find simple to follow illustrations and diagrams, detailed explanations of systems and how they work and their draw backs. Case studies are used to provide examples of systems and the common problems encountered during installation. Some simple Repair and Trouble shooting tips are also included. After reading this book, builders, architects and owners will have a solid understanding of how these systems work which of these system is right for their project. Concise and easy to understand, the book will also provide a common language for ensure understanding across the board. Thereby, eliminating confusion and creating a common understanding among professionals. - Ethernet, TCP/IP protocols, SQL databases, standard fiber optic - Data Networks and Voice Networks - Fire Alarm Systems, Access Control Systems and Video Surveillance Systems - Heating, Ventilating and Air Conditioning Systems and Electric Power Management Systems, Lighting Control Systems - Facility Management Systems

The Engineers’ Review World Bank Publications

FIDIC contracts are the most widely used contracts for international construction around the world and are used in many different jurisdictions, both common law and civil law. For any construction project, the General Conditions of Contract published by FIDIC need to be supplemented by Particular Conditions that specify the specific requirements of that project. The International Application of FIDIC Contracts: A Practical Guide provides readers with detailed guidance and resources for the preparation of the Particular Conditions that will comply with the requirements of the applicable laws that apply to the site where the work is carried out, and for the governing law of the contract, for a number of the jurisdictions in which FIDIC contracts are used. This book is essential reading for construction professionals, lawyers and students of construction law.

Building the Inclusive City John Wiley & Sons

This Research Handbook provides a comprehensive overview of the role of project management in sustainable development. Examining how to successfully integrate sustainability into the processes and practices involved, it highlights the significant development in sustainable project management whilst exploring potential future directions for the field.

Temporary People Stationery Office Books (TSO)

Relations between the European Union (EU) and the Gulf Cooperation Council (GCC) are at a crossroads. After the derailment of the negotiations for the Free Trade Agreement (FTA) in 2008, the cooperation between the two regional blocs has remained low-key in a number of different areas, while the unprecedented changes that have taken place in North Africa and the Middle East, the common neighbourhood of the EU and the GCC, have not led to a renewed, structured cooperation on foreign and security policy issues. This volume addresses the shortcomings and potential of EU-GCC relations by taking stock of their past evolution and by advancing policy recommendations as to how to revamp this strategic cooperation. In this light, it highlights the areas where greater room for manoeuvre exists in order to enhance EU-GCC relations, discusses the instruments available and sheds light on the features of the regional and international context that are likely to significantly influence the new phase in the mutual relation between the two blocs. The book is the result of the research conducted in the framework of the project ‘Sharaka - Enhancing Understanding and Cooperation in EU-GCC Relations’ co-funded by the European Commission.

Environmental Law in Arab States Sweet & Maxwell

Construction Law in the United Arab Emirates and the Gulf is an authoritative guide to construction law in the United Arab Emirates and the Gulf. The principal theme is the contrast between construction law in an Islamic civil law jurisdiction and construction law in a common law jurisdiction. • the first authoritative text on the application of the laws of the UAE • extensive extracts from the region’s applicable laws, all translated from Arabic, and hundreds of judgments of the most senior courts used to back up the analysis provided

Sustainability in the Gulf Butterworth-Heinemann

This book gathers the proceedings of the EPPM 2019 conference, and highlights innovative work by researchers and practitioners active in various industries around the globe. Recent advances in science and technology have made it possible to seamlessly connect and integrate various elements of engineering systems, and opened the door for innovations that have transformed how we live and work. While these developments have yielded enhanced efficiency and numerous improvements in our current practices, the problems caused by the increased complexity of these integrated systems can be extremely difficult. Accordingly, solving these problems involves applying cross-disciplinary expertise to address the heterogeneity of the various elements inherent in the system. These proceedings address four main themes: (I) Smart and Sustainable Construction, (II) Advances in Project Management Practices, (III) Toward Safety and Productivity Improvement, and (IV) Smart Manufacturing, Design, and Logistics. As such, they will be of interest to and valuable to researchers

and practitioners in a range of industries seeking an update on the translational fields of engineering, project, and production management.

UAE and the Gulf Springer Nature

Environmental Law in Arab States offers a comprehensive and authoritative account of the guiding principles and rules relating to environmental protection in the Arab region. Taking an international and comparative approach, the book introduces readers to the latest developments of environmental law across the Arab region through applicable legislation, green finance, and climate technologies. The impact of these is assessed in each of the major areas of environmental regulation, air pollution, water pollution, biodiversity, conservation of nature and cultural heritage, infrastructure development, and Islamic ecology. Consideration is given to participatory and bottom-up legal strategies – focusing on transparency, accountability, gender justice, and other human rights safeguards – that are needed to achieve greater coherence and coordination in the implementation and enforcement of environmental regulation across the region. The book closes by providing legal assessments and reflections on how Arab countries can, through clear and comprehensive legislation, advance existing national strategies and visions on trade and investment, green growth, Islamic green finance, circular economy, blue economy, and low carbon future amongst others.

A Model Environmental Code: The Dubai Environment Law Simon and Schuster

Construction Law in the United Arab Emirates and the Gulf is an authoritative guide to construction law in the United Arab Emirates and the Gulf. The principal theme is the contrast between construction law in an Islamic civil law jurisdiction and construction law in a common law jurisdiction. • the first authoritative text on the application of the laws of the UAE • extensive extracts from the region’s applicable laws, all translated from Arabic, and hundreds of judgments of the most senior courts used to back up the analysis provided

Computing in Civil and Building Engineering (2014) John Wiley & Sons

This is the first book to fully present, analyse and interpret the Dubai real estate market. Dubai is fast becoming one of the world’s most attractive places to invest in real estate and this book examines the market from three interlinked sectors that drive its performance: occupiers, investors and developers. It examines the market’s historical growth and lays the foundations to examine future trends. The book provides a synopsis of Dubai’s market practices, economic trends and social change that impacts the value of real estate. Chapters also debate issues such as property investment, house price performance, local valuation practices, spatial planning, the economics of the city, market practices and regulation, property-led economic growth and future trends such as sustainability and digitalization. This book offers a comprehensive, in-depth and up-to-date account of the Dubai property market and presents a full assessment of the investment potential of Dubai real estate. It is a must read for students, academics and real estate professionals interested in this fascinating real estate market that has implications for both Dubai and wider GCC markets as well as the international investment market and senior professionals who come to work in the region.

Bridging the Gulf: EU-GCC Relations at a Crossroads Oxford Business Group

This text contains A Model Environmental Code: The Dubai Environment Law

Construction Law in the United Arab Emirates and the Gulf UN-HABITAT

Dubai has continued to meet its targets in becoming the global capital of Islamic finance, nearly doubling the number of sukuk (Islamic bonds) listings on its exchanges since 2017. Furthermore, eased policy restrictions to encourage foreign investment and the 2019 budget’s continued commitment to infrastructure development ahead of Expo 2020 are expected to continue driving economic activity. As one of the most diversified economies in the region, Dubai continues to present growth opportunities in various sectors including tourism, logistics, manufacturing and education. Although the emirate has benefitted from its proximity to oil and gas fields, Dubai is right at the forefront of the emerging cleaner energy world, and developing and promoting renewable technologies, including solar energy and electric vehicles.

Applying the Building Code Routledge

Many of our global cities are distressed and facing a host of issues: economic collapse in the face of rising expectations, social disintegration and civil unrest, and ecological degradation and the threats associated with climate change, including more frequent and more severe natural disasters. Our long-held assumptions about man and nature and how they interact are defunct. We realize now that we can no longer continue to build without addressing the long-term impacts of our actions and their spillovers. Energy and natural resources are finite. The way we configure economies has come into question. In the developed world, especially in the United States, infrastructure and the notions that underpin it are outdated. Meanwhile, the developing world is experiencing major, rapid transformations in lifestyles and economies that are affecting billions of people and requiring a whole new way of planning human settlements. Cities are the key to our future; they represent the most effective vehicle for positive advancements in the human condition and environmental change. This volume argues for the need to redesign and re-plan our cities in holistic ways that reflect our new understanding and relate to their diversity and multi-dimensionality. Presenting a range of case studies from around the world, this volume examines how these distressed cities are dealing with these issues in planning for their future. Alongside these empirical chapters are philosophical essays that consider the future of distressed cities. Bringing together a team of leading scholars, United Nations agencies, non-governmental organizations, private consulting firms, international organizations and foundations, and policy officials, this volume provides a unique and comprehensive overview on how to transform distressed communities into more livable places.

Building Codes Illustrated Restless Books

At the end of the 20th century, Dubai attracted international media attention as the world sought to make sense of the city’s extraordinary growth. Exuberant projects such as the Burj Arab, the Burj Khalifa and the Palm Islands attracted investment in dreams to transform the region. While the global financial crisis kept dreams from becoming reality, this issue of AD seeks to present a view of architecture and urbanism in the United Arab Emirates (UAE) and other states in the wider Gulf Cooperation Council (GCC) at a time when greater economic stability promises new beginnings. The issue presents examples of architecture that transcends preoccupation with fabricating images, and traces the process of making contemporary Gulf cities, from material tectonics to large-scale masterplans. By presenting the architecture of UAE and the Gulf within the context of broader regional developments and global trends, it highlights how projects in the UAE, Qatar, Kuwait and Saudi Arabia have contributed to unprecedented urban growth, while emphasising the continuing environmental challenges of building in the region. In addition to highlighting various sustainable initiatives intended to counteract these challenges, the issue also explores how computational design and new technologies are being innovatively employed to mitigate the impact of arid climates. Contributors include: Aameena Ahmadi, Kelly Hutzell, Varkki Pallathucheril, Todd Reisz, Rami el Samahy, Terri Meyer Boake, Jeffrey Willis. International architects: Foster + Partners, Frank Gehry, HOK, IM Pei, Legoretta + Legoretta, Jean Nouvelle, Reiser + Umemoto, Allies and Morrison. Regional architects: AGI (Kuwait), DXB.lab (UAE), X Architects (UAE).

The Architecture of the United Arab Emirates Springer Nature

Seventeen in a series of annual reports comparing business regulation in 190 economies, Doing Business 2020 measures aspects of regulation affecting 10 areas of everyday business activity.
